## FACT (FOR A CLEAN TOMORROW)

Capetown  
8200

1. We object to the Nuclear Power Station in terms of section 24 of the constitution (everyone has the right to an environment that is not harmful to their health or wellbeing)
2. We object to the fact that radioactive waste remains hazardous for more than 240 000 years. It is in disregard of future generations to come and our constitution.
3. We object to a Nuclear power station and especially one in such close proximity to our community.
4. A nuclear power station is a terrorist target. We don't want one.
5. We object to the high cost, safety, security and waste problems of nuclear power stations.
6. We support leading world countries with their real government subsidies and tax incentives for solar and wind power and propose we do the same.
7. We propose that nuclear subsidies be switched to renewable energy and improved efficiency today.
