Subject: CONCERN ON THE SWITCHING BACK ON OF THE SYSTEMS PROVIDED BY FDA

Importance: High

Good evening Hosting Team

I believe you are aware of the situation whereby two (2) Systems were switched off during the weekend (PCEM and FPS).

The user tried to use the system on Monday, the system probed an error message, that was not a surprise as we were aware that the system will be switched off by the Supply due to dispute.

To our surprise as TMS and the Users the system is switched on again.

Please can you track or investigate who switched on the system as we are not aware what will be the impact on data integrity.

The Divisional Commissioner TMS requires a complete report/ Audit trail that will give us details as to who switched on the system or how it happened for the system to be back on again.

If the team establish that the system is on , SITA must ensure that they systems are not accessible or should completely off until a further executive instructions are issued .

The requested report must reach this office by close of business on 13 April 2018.

Your urgent and prompt response will be highly appreciated !

Kind regards ;

BN Phahlane, Brigadier
