### **1. INTRODUCTION**

The following brief will provide the Members of the Portfolio Committee on International Relations and Cooperation (the Committee) with a summary of the 2021/22 First Quarter Expenditure Report of the Department of International Relations and Cooperation (hereafter referred to as “the Department”).

### **2. OVERVIEW OF THE 2021/22 FINANCIAL YEAR**

According to the 2021 Estimates of National Expenditure, over the medium term, the Department will focus on<sup>1</sup>:

- Strengthening the African Agenda;
- Active participation in the United Nations (UN);
- Developing and managing state-owned properties in foreign missions.

According to the 2021 Estimates of National Expenditure, expenditure is expected to increase at an average annual rate of 1.5 per cent, from R6.3 billion in 2020/21 to R6.6 billion in 2023/24. The Department’s work is mainly realised through the 125 diplomatic missions in 108 countries in which South Africa has representation. As the Department largely relies on its personnel to perform its functions, compensation of employees is its main cost driver, accounting for an estimated 43.8 per cent (R8.5 billion) of expenditure over the period ahead. However, spending on compensation of

employees is set to decrease at an average annual rate of 0.5 per cent, from R2.9 billion in 2020/21 to R2.8 billion in 2023/24, to remain within government's expenditure ceiling for this item.<sup>2</sup>

### ***Strengthening the African Agenda***

Africa remains the focal point of South Africa's foreign policy. Accordingly, the Department will continue to play an active role in the structures and processes of the African Union (AU) to advance peace, security and conflict prevention in Africa. In 2020, South Africa assumed the chair of the AU with the clear purpose of making a difference on the continent by ensuring that linkages exist between development, good governance, peace and stability. The COVID-19 pandemic has forced South Africa, in its capacity as chair, to take a different approach in ensuring that the threats and challenges posed by the disease are dealt with in a multifaceted way. This includes: establishing the COVID-19 Response Fund, which is aimed at raising additional funds for the African Centres for Disease Control and Prevention; and lobbying for a comprehensive and robust economic stimulus package for Africa to alleviate the economic impact of the pandemic. Related activities are carried out in the Africa subprogramme in the International Relations programme, in which spending is expected to increase at an average annual rate of 4.6 per cent, from R952.3 million in 2020/21 to R1.1 billion in 2023/24.<sup>3</sup>

South Africa continues to be one of the largest contributors to the AU's budget through its membership fees. To this end, over the medium term, the Department intends to spend R779.7 million in the Membership Contribution subprogramme in the International Transfers programme towards AU membership fees.<sup>4</sup>

### ***Active participation in the United Nations***

The 2021 Estimates of National Expenditure notes that with its near-universal membership and vast agenda, the UN remains the most important multilateral institution and global governance centre. As such, engagements with the UN, and active participation in its processes, are of vital importance to South Africa and the advancement of the country's foreign policy priorities. Over the period ahead, South Africa will continue to honour its membership fee obligation to the United Nations, which is expected to increase at an average annual rate of 1.4 per cent, from R190.7 million in 2020/21 to R199.1 million in 2023/24.<sup>5</sup>

### ***Developing and managing infrastructure projects and properties***

Over the period ahead, the Department will continue to manage its international property portfolio, which comprises 127 state-owned properties and more than 1 000 rented properties. To reduce its rental portfolio and the associated operational costs, the Department will focus on developing state-

owned vacant land and the renovation and maintenance of the portfolio to extend its lifespan. Property renovations, repairs and maintenance will continue to be informed by annual property condition assessments. Over the medium term, the Department plans to commence with building 4 properties on state-owned land (2 in Luanda, Angola; 1 in New Delhi, India; and 1 in Gaborone, Botswana).<sup>6</sup>

The Department also plans to conduct condition assessments of all state-owned properties over the medium term, beginning with those in Europe, followed by those in Africa, then those in the Americas and Asia. The outcome of these assessments will inform the need for accelerated maintenance and repairs to each property. State-owned properties in Mbabane (Eswatini), the Hague (Netherlands), Windhoek and Walvis Bay (Namibia), and Brasilia (Brazil) will be renovated for state use. Professional condition assessments of properties in London (United Kingdom), Paris (France), Vienna (Austria), Rome (Italy), Brussels (Belgium), Madrid (Spain) and Copenhagen (Denmark) will be undertaken to inform decisions on future holding and use. The Administration programme is allocated R892 million over the medium term to carry out these activities.<sup>7</sup>

### 3. SUMMARY OF THE SECOND QUARTER EXPENDITURE REPORT

#### 3.1 Overview of Expenditure

According to the 2021/22 Second Quarter Expenditure Report, the Department of International Relations and Cooperation spent R2.915 billion or 45.2 per cent of its 2021/22 budget allocation of R6.452 billion as at the end of September 2021. The R2.915 billion in actual spending is R561.7 million lower than the projected expenditure of R3.477 billion for this period.<sup>8</sup>

The lower than projected expenditure is mainly attributed to<sup>9</sup>:

- **low spending on goods and services** due to the failure of the Information and Communication Technology systems (in programmes 2 and 3) to timeously interface with the Basic Accounting System and report on spending by seven missions, delays in the processing of invoices for Bandwidth services due to expiration of the contract with the service provider, reduced travel or official trips (due to the COVID-19 pandemic), and delays in the implementation of the property management strategy,
- **the non-transmission of transfers and subsidies** (Foreign governments and international organisations) in Programme 5 to the Commonwealth of Nations, which is now expected to take place in October 2021, and
- **low expenditure on the budget for payments** for capital assets due to delays in the delivery of laptops and desktops for the head office.

<sup>8</sup> 2021/22 Second Quarter Expenditure Report of the Department of International Relations and Cooperation.

<sup>9</sup> Ibid.

According to the 2020/21 Second Quarter Expenditure Report, the Department reported the following<sup>10</sup>:

- **Programme 1: Administration** spent R575.2 million or 27.8 per cent lower than the projected spending of R796.8 million. The lower than projected spending is mainly on the budgets for goods and services and payments for capital assets. Lower than projected spending on the budget for goods and services is attributed to the Bandwidth (computer services) ICT invoices that could not be processed for payment as a result of the department's challenges in the processing of invoices for Bandwidth services due to expiration of the contract with the service provider, and delays in the implementation of the property management strategy. The low spending on the budget for payments for capital assets is due to delays in the delivery of laptops and desktops for Head Office staff.
- **Programme 2: International Relations** spent R1.547 billion or 12.1 per cent lower than the projected spending of R1.760 billion. The R1.547 billion in actual expenditure is R212.6 million lower than the projected expenditure, mainly as a result of low spending on the budget for goods and services (mainly on communication, legal services, property payments, operating leases, operating payments, and travel and subsistence), due to expenditure for six missions which was not timeously entered into the department's Basic Accounting System.
- **Programme 3: International Cooperation** spent R224.5 million or 14.3 per cent lower than the projected spending of R262.1 million. The R224.5 million in actual expenditure is R37.6 million lower than the projected expenditure, mainly on the budget for operating leases and travel and subsistence. The low spending on operating leases is attributed to the failure of the Information and Communication Technology system to timeously interface with the Basic Accounting System and report on spending by one mission.
- **Programme 4: Public Diplomacy and Protocol Services** spent R121.9 million or 18.4 per cent lower than the projected spending of R149.3 million. The R121.9 million in actual expenditure is R27.5 million lower than the projected spending, mainly on the budget for goods and services, specifically on venues and facilities and travel and subsistence, due to reduced travel in line with the requirements of the COVID-19 pandemic management regulations.
- **Programme 5: International Transfers** spent R446.3 million or 12.3 per cent lower than the projected spending of R488 million. The R508.9 million is R62.5 million lower than projected spending mainly due to the lower than planned expenditure on transfers and subsidies (Foreign governments and international organisations) due to the non-transmission of transfers and subsidies to the Commonwealth of Nations (due to late receipt of the assessment letter), which is now expected to take place in October 2021

#### 4. KEY ISSUES FOR CONSIDERATION BY PARLIAMENT

- **Covid-19 spending:** According to the Second Quarter Expenditure Report, the Department spent R500 000 on personal protective equipment for the head office.<sup>11</sup>
- **Personnel:** According to the Second Quarter Expenditure Report, the Department spent R1.419 billion or 4.6 per cent lower than the projected spending of R1.488 billion on compensation of employees at the end of September 2021. The R1.419 billion in actual spending is R33.4 million lower than the projected expenditure of R69 million as at the end of September 2021. The underspending is attributed to spending on compensation of employees for seven missions which was not timeously entered into the department's Basic Accounting System.<sup>12</sup>
