### Clause 2

The composition of the board, including the requirements and its responsibilities needs to be clarified to avoid confusion among the members of the public. Though some of these matters are stated in the existing legislation such as the Companies Act and the Public Finance Management Act which sets out fiduciary duties and legal consequences. It would be beneficial for this section to be synchronised with the relevant sections on the Companies Act to avoid any interpretation issues.

The selection of the Board Members should be transparent and not include Government Officials, Members of political parties but Community Members, Social Workers, and a knowledgeable legal practitioner - all must have no vested interest.

### Clause 4
