**NEGOTIATING MANDATE**

To: Hon D G Mahlangu, MP  
Chairperson: SC on Appropriations

Name of Bill: Division of Revenue Bill

Number of Bill: [B 4 - 2024]

Date of deliberation: 22 April 2024

Vote of Legislature: The Budget Committee reports that it confers on the Western Cape's Permanent Delegate in the NCOP the authority to not support the Bill, with recommendations for the Division of Revenue Bill (B 4-2024) by the NCOP. The recommendations are as follows:

Date: 22 April 2024

Signature

**Budget Committee Chairperson : Hon Deidre Baartman**

(Negotiating Mandate stage) Report of the Budget Committee on the Division of Revenue Bill [B 4-2024] (NCOP), dated 22 April 2024, as follows:

The Budget Committee, having considered the subject of the Division of Revenue Bill [B 4-2024] (NCOP) referred to it in accordance with Standing Rule 217, confers on the Western Cape's delegation in the NCOP the authority to not support the Bill, with recommendations included.

The 2024 Division of Revenue Bill is tabled at a time of great uncertainty for the fiscus, after years of financial mismanagement from the National Government. According to the 2024 Main Budget, national government has allocated 41.9% of national raised funds to provincial governments as equitable share (up 0.2 percentage points from 2023/24 Adjustment Budget) with 9.7% being maintained for local governments (National Treasury, 2024b:62).

The Western Cape will receive:

- **R 62.071 billion** as its equitable share, an increase of R1.478 billion, which represents a 1.13% increase from the 2023/24 Adjustment Budget. This equates to 10.34% of the total provincial equitable share for the 2024/25 financial year. (National Treasury, 2024c:11)
- **R 14.854 billion** in conditional grants, a R1.475 billion (11%) increase from the 2024/25 Budget. (National Treasury, 2024c:11)

That is a **net total of R 76.925 billion, which is a R 2.953 billion (3.82%) increase from the 2023/24 Adjustment Budget.**

There was an increase in the total money going to the 9 Provinces as **Provincial Equitable Share of R15.390 billion (2.63%)** from the 2023/24 Adjustment Budget to the 2024/25 Main Budget, with 9.6% of the total increase coming to the Western Cape. In the medium-term provinces are estimated to see an increase in Provincial Equitable Share of R26.9 billion from 2024/25 to 2025/26, before an increase in 2026/27 of R28.262 billion year-on-year (National Treasury, 2024b:63).

Local governments in the Western Cape will receive:

- R7.84 billion as its local government equitable share, which represents a 6.81% increase from the 2023/24 Adjustment Budget allocation. In the medium-term, local government is expected to see **increases** to their share of nationally raised revenue to 9.8% in 2024/25 and 10% in 2025, year-on-year. Western Cape municipalities receive 7.75% of the total local government equitable share (National Treasury, 2024a:42).

***Provincial Grant Allocations for the Western Cape are as follows:***

The Western Cape does not support the Bill for the following reasons and recommends the following:

1. Provinces have still not received the full amount to cover the public service wage increase that was agreed to last year. Service delivery is being crowded out by the public wage increase, which means that the provincial government will have to cut frontline services to cover the shortfall of the centrally agreed increase. **It is recommended** that the national government must fully fund the public sector wage increase agreement in the current Bill for all provinces. By not fully funding the public sector wage increase agreement for all provinces, the national government is forcing provincial governments to cut provincial budgets to fund the shortfall for the centrally agreed public sector wage increase agreement. **It is also recommended** that all future centrally agreed wage affecting provinces increases be fully funded by the National Government.
2. The increase in Provincial Equitable Share (PES) to the Western Cape is not in line with the increase in the cost of living, with inflation standing at 5.3% year on year in March 2024. This means that the Western Cape is in fact receiving a cut to their PES funding, which places undue pressure on service delivery. **It is recommended** that PES funding should at a bare minimum increase in line with inflation.
3. The cuts to conditional grants for provincial and local governments are excessive and damaging to the service delivery capabilities of these governments, especially to poorer residents who depend on these grants the most. There is a real danger of overspending by provinces due to these cuts, which in turn can lead to provinces being placed under administration by the national government, which will deal a blow to democratic governance and the legitimacy of such governments. **It is recommended** that conditional grants are not cut; and that the National Treasury should instead source these funds from the national governmental budget instead of cutting local government and provincial government budgets.
4. Cuts to infrastructure grants, such as the Municipal Infrastructure Grant, are especially worrying, as infrastructure represents an investment in the future of the province. Infrastructure projects often take place over a number of financial years, with projects needing stability over a number of

years to be completed successfully. The cut to these grants means that there is a risk of some projects that are already in progress not being completed. The long-life cycle of infrastructure-related grants must be taken into account. **It is recommended** that National Treasury do not make any budget cuts to conditional grants affecting infrastructure as this risk's future development; and that these funds should be sourced from the national governmental budget instead of cutting local government and provincial government budgets. **It is also recommended** that no more generalised mid-year cuts to conditional grants take place as happened last year, and if cuts must take place they are based on individual cases.

5. There are huge cuts to the Integrated National Electrification Programme (Municipal) Grant, which places necessary investment in the national grid under pressure and will exacerbate the energy crisis. It is thus recommended that the cuts to this grant be reviewed.
6. There have been several shifts of grants from direct to indirect grants (Schedule 5 moved to Schedule 6), which means less control over their budgets for provincial governments as Schedule 6 grants are implemented by National Government on behalf of provinces. **It is recommended** that these grants not be moved, to enable provincial governments the ability to take responsibility for service delivery in their provinces.
7. Certain conditional grants have been around for years, with the result that provinces and local governments depend on these grants when they set up their budgets and plan their programmes for the financial year. **It is recommended** that the conditional grants directly linked to provincial government mandates should rather be incorporated into the Provincial Equitable Share formula, and form part of the Provincial Equitable Share division of revenue for provinces.
8. The population data that was used to calculate the Provincial Equitable Share is outdated. As was confirmed in the latest Census data released this year, the Western Cape has moved from the 5<sup>th</sup> most populated province to the 3<sup>rd</sup> most populated. The Western Cape also objects to the admission from National Treasury that the newest data will not be used for the 2024/25 Main Budget. **It is recommended** that the data, particularly the population statistics should be incorporated for implementation in as soon as possible. Disaggregated Census data must be released, and immediately implemented and National Treasury must commit to a timeline for implementation of the new Census data and because its already outdated it shouldn't be phased in.
9. Numerous pieces of legislation that have implications for provinces and have been passed nationally, have not been funded by National Treasury (for instance the National Health Insurance Bill, Basic Education Laws Amendment Bill). **It is recommended** that funding for these bills be budgeted by National Treasury before they are implemented so that costs aren't passed on to provinces.
10. Given that debt-servicing costs are the fastest growing line item in the National Budget, **it is recommended** that lending be restricted to only fund investment in infrastructure that will have a return on investment, and not to fund day-to-day expenses such as salaries.
11. The Provincial Equitable Share per capita also shows bias towards more rural provinces, and while this is understandable to an extent, it does not differentiate between areas where poorer persons reside and areas which are considered rural in more geographical terms. Many poor people that

rely on government services are based in urban areas, and this current bias does not seem to be properly take this into account in the Provincial Equitable Share formula. **It is thus recommended** that this metric is reviewed to instead consider where the poorest persons in a province reside.
