Annual Performance Plan 2016/17

FOREWORD

FOREWORD

The National Development Plan (NDP 2030) was conceived as a long term vision and plan not just for government but also for society as a whole. The focus has now shifted to the effective implementation and monitoring of the plan. The Medium Term Strategic Framework (MTSF) 2014-2019 has translated the NDP into a five-year plan which captures the outcomes to be achieved during this period in order to achieve NDP's Vision 2030. The MTSF defined the targets, activities and essential inputs to be achieved. One year into the MTSF 2014-2019 affords the Department an opportunity to reflect on our performance, implement the identified actions and address challenges experienced.

Linking the planning, monitoring and evaluation under the Department of Planning, Monitoring and Evaluation (DPME) is a crucial strategic step in advancing the NDP/MTSF goals, giving us a tool to help enhance performance and realise progress towards vision 2030. The planning function has to provide strategic leadership in identifying key priorities to be addressed to progress the NDP/MTSF, ensuring that sector-wide plans and programme are robust, rigorous and achievable.

DPME cannot monitor everything government does. It has to be strategic and focus on priority plans and programmes being implemented across government that will make the greatest contribution to the NDP goals of reducing poverty, unemployment and inequality. The focus has to be on whether the right actions are targeted and whether government spends in the right areas to achieve the NDP objectives. Monitoring the education and health outcomes, fighting fraud and corruption, infrastructure development and job creation remains our top priorities. To this end, Operation Phakisa initiatives are concentrated in these high impact areas of health, education, economy and mining. We will continue to use this methodology to unlock other areas of high impact in key government programmes.

DPME has through its outcomes planning, monitoring and evaluation work, developed a number of tools, such as, Frontline Service Delivery Programme, Presidential Hotline, Managements Practices Assessment Tool (MPAT), and Local Government Management Improvement Model (LGMIM) and recently, Citizen Based Monitoring (CBM) to fulfil this function. Whereas these tools fulfil the function, they are not adequate to provide a complete picture of the effectiveness of government performance. There is therefore a need for an integrated and credible data war-room that can provide up-to date information about progress being made in pursing government priorities, coming from data gathered from various monitoring tools. The work to create a data warehouse for key government priorities aligned to the NDP goals is underway. DPME will continue to work with Statistics South Africa (StatsSA) who are by law, custodians of the statistics in our country to establish a credible data centre.

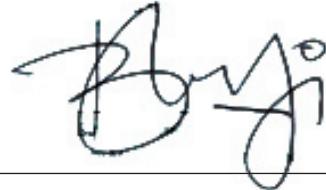

The data nerve centre should, amongst other things, provide information on the commitment to the payment of suppliers within 30 days; provide on-the-ground monitoring and intelligence on service areas such as provision of sanitation, functioning of clinics and hospitals, progress being made on identified big projects such the contraction of power stations, progress on youth employment and employment in general.

The Department will also be strengthening its capacity to monitor the implementation of the National Youth Policy. Youth development is a government priority. The country can benefit immensely if the potential of the youth population is unleashed and directed in the right areas of development.

This Annual Performance Plan (APP) therefore reflects the continuation and enhancement of the work of DPME to fulfil its mandate of planning, monitoring and evaluation of government programmes, guided by the goals espoused in the National Development Plan.

Minister Jeff Radebe (MP)

Deputy Minister Manamela (MP)

PART A: STRATEGIC OVERVIEW

1. Vision

Improved government outcomes and impact on society.

2. Mission

To facilitate, influence and support effective planning, monitoring and evaluation of government programmes aimed at improving service delivery, outcomes and impact on society.

3. Updated situational analysis

To be effective, planning, monitoring and evaluation needs to be reviewed periodically, as such, DPME is continuously assessing the relevance of its work, the service delivery environment and its institutional arrangements in order to enhance its impact in monitoring the implementation of the National Development Plan through the Medium Term Strategic Framework. The Department is also continuously seeking creative ways to do more with limited resources against competing demands.

3.1 Performance environment

The overarching outcome that DPME must achieve is to improve the performance and developmental impact of the state on citizens. To achieve this will require:

- Improved policy coherence and direction
- Seamless and mutually reinforcing planning, monitoring and evaluation systems and practices that clearly spell out the outcomes and targets to be achieved, accountability for the achievement of the targets, rigorous monitoring of progress and evaluation of the impacts
- Effective mechanisms and an enabling environment for coordinated action, collaboration and partnering across departments and with agents outside of government

Many outcomes and targets in the MTSF will not be achieved by a single department, but through coalition building, strategic collaboration, coordination and partnering. This is a critical factor in the capacity and capability of the state. DPME seeks to contribute to this capacity through the development of planning and monitoring frameworks, systems and capacity development initiatives.

3.2 Organisational environment

The Department is currently engaged in a review process to ensure that its strategy, structure, budget allocations and operating model are aligned to its planning, monitoring and evaluation mandate and functions.

Workshops were held in the latter part 2015 with the intention of clarifying DPME's mandate and approach to its work in the context of the National Development Plan Vision 2030. A need was identified to focus on key priorities in which the Department can play a leadership, coordinating and supervisory role in formulating strategy, and tackling service delivery bottle necks and challenges. This will require a shift by the Department from an 'arm's length' planning, monitoring and evaluation role to a more 'hands-on' role. The Department also identified the need to operate in a more integrated way to ensure that it impacts positively on government performance and public service delivery.

It is envisaged that this new approach will require both an enhancement and expansion of what the Department currently does. This in turn requires a review of its logic model (outcomes, outputs, key activities and inputs), service delivery (operating) model and will ultimately result in a revised and expanded organisational structure.

The Department defined its purpose as follows:

"To advance the development goals and objectives of government as embodied in the NDP through effective and dynamic planning, monitoring, evaluation and implementation support".

Within the context of this strategic purpose, the Minister has spelt out a clear set of political responses that should be weaved into the work of DPME. These can be summarised as follows:

- Alignment of the National budget to the NDP goals
- Extensive on the ground monitoring and intelligence
- Mainstreaming youth development in the work of the Department
- Monitoring and reporting on the obligation to pay suppliers within 30 days of receiving a valid invoice
- Reforming the mining sector
- Ensure sector plans for strategic sectors are developed and implemented
- Monitoring the performance and effectiveness of DFI's and directing their resources towards the country's development goals and objectives

Some of the issues identified will be implemented incrementally starting in the financial year 2016/17. Full implementation of the revised strategy, service delivery model and the revised organisational structure will be implemented in the financial year 2017/18 going forward.

4. Revisions to legislative and other mandates

There was no change in the mandates for the current planning cycle. The mandate of the Department of Planning, Monitoring and Evaluation is derived from section 85(2) (b-c) of the Constitution of the Republic of South Africa which states that the President exercises executive authority, together with the other members of the Cabinet, by developing and implementing national policy and coordinating the functions of state departments and administrations.

This has been given concrete expression by the President in his 2010 and 2011 State of the Nation Addresses as well as various Cabinet decisions; and by the "Policy Framework on Performance Monitoring and Evaluation - Our Approach" document and the "Revised Green Paper: National Planning Commission," which were tabled in Parliament.

7. Programme 2: Outcomes Monitoring and Evaluation (OME)

7.1 Programme purpose

The purpose of the programme is to advance the strategic agenda of government through the development and implementation of the outcomes system, monitoring and reporting on progress in the implementation of priority outcomes and evaluating the impact of government policies, programmes and plans.

7.2 Programme Overview

The programme consists of the following three sub-programmes:

1. Programme Management for Outcomes Monitoring and Evaluation

The purpose of the sub-programme is to provide management and administrative support to the branch.

2. Outcomes Support

The purpose of the sub-programme is to coordinate and manage the outcomes system and support departments, other spheres of government, clusters and Cabinet committees to identify and address blockages in achieving the outcomes. The sub-programme is comprised of:

- **Outcomes Facilitation:** To support the implementation of the outcomes approach through performance agreements with Ministers, development and monitoring of delivery agreements and support to implementation forums as well as the implementation of special projects
- **Local Government Performance Assessment:** To measure and support improved management and operational performance in municipalities through the development, implementation and maintenance of a local government management improvement model and tool
- **Operation Phakisa:** To fast-track implementation through facilitation of production of detailed low level plans for cross-cutting issues, coupled with improved project management processes
- **Socioeconomic Impact Assessment System:** To ensure socio-economic impact assessments of both new and existing policy, legislation and regulations are conducted to ensure alignment with the NDP and to ensure that unintended consequences are reduced
- **Programme of Action:** To promote the use of credible data for reporting, monitoring, evaluation and communication of government's priorities

3. Evaluation and Research

The purpose of the sub-programme is to establish and support an effective national evaluation system and influence the research system to inform government's work. The sub-programme focuses on:

- Supporting the government-wide evaluation system and assisting government departments to undertake appropriate evaluations and implement the findings
- Influencing the wider national research system to support the MTSF/NDP, as well as supporting specific research projects
- To pursue the development and advanced agenda of government through outcomes planning, monitoring and reporting To provide advisory services and support to the executive
- To provide support to improve performance of local government
- To support the Cabinet officer and other departments to implement the Social Economic Impact Assessment System
- To conduct evaluations and research aimed at improving the performance of government programmes

4. Programme Objectives

- To pursue the development and advanced agenda of government through outcomes planning, monitoring and reporting
- To provide advisory services and support to the executive
- To provide support to improve performance of local government
- To support the Cabinet officer and other departments to implement the Social Economic Impact Assessment System
- To conduct evaluations and research aimed at improving the performance of government programmes

8. Programme 3: Institutional Performance Monitoring and Evaluation (IPM&E)

8.1 Programme purpose

The purpose of the Institutional Performance Monitoring and Evaluation (IPM&E) is to provide evidence of institutional performance; design and supervise strategies for addressing priority improvements and inculcate a culture of learning and continuous improvement in government.

8.2 Programme Overview

The programme consists of the following sub-programmes:

1. Programme Management for Institutional Performance Monitoring

The sub-programme purpose is to provide programme management and administrative support to the head of the branch.

2. Management Performance Monitoring and Support

The sub-programme involves monitoring the quality of management practices in departments. Four key performance areas are assessed, namely, strategic management, governance and accountability, human resource and systems management and financial management. This is done in collaboration with other organisations at the administrative centre of Government (including DPSA, NT, DCOG, AGSA and OPSC), and draws on performance monitoring information produced by these bodies. The output of the assessment process is a scorecard on the state of management practices in the Department. The Department is then required to develop and implement an improvement plan. DPME provides support to departments via case studies and workshops. DPME and the Offices of the Premier report on the results annually to Cabinet and Provincial Executive Councils respectively.

The sub-programme also involves monitoring a range of indicators of the performance of the public service and reports on these to FOSAD. This enables FOSAD to focus on reviewing the extent to which weaknesses in the management of national and provincial departments are being addressed.

3. Presidential Frontline Service Delivery Performance Monitoring and Support

The sub-programme involves planning and implementing a range of initiatives to monitor the quality of frontline service delivery in collaboration with Offices of the Premier. These include unannounced monitoring visits to sites where government provides a direct service to the public, including schools, health facilities, and vehicle licensing offices, Home Affairs offices, and social grant distribution points. DPME and Offices of the Premier are utilising the data collected at site level to inform improvement initiatives and to catalyse improvements in the operations management of frontline service delivery sites.

4. Presidential Hotline

The Presidential Hotline is a tool for citizens to engage with the Presidency about their service delivery complaints and compliments. Citizens engage through a call centre and through written correspondence. Cases are classified and assigned to the relevant government departments and agencies for resolution. DPME manages the Presidential Hotline, monitors responsiveness and resolution rates, and provides technical support to other departments to improve responsiveness. DPME also has a role of analysing the data arising from the hotline and presenting reports on the service delivery trends emanating from the hotline to Cabinet.

5. Citizen Based Monitoring

Citizen Based Monitoring is an initiative to strengthen government-wide citizen involvement in service delivery monitoring. Over this MTSF period, DPME will support departments to have more impactful citizen-government monitoring partnerships at facility and community level by providing strategic support, making tools available, supporting action learning and through knowledge sharing events. The indicator related to learning events has been rationalised on account of the programme being integrated with other monitoring tools such Frontline Service Delivery and the Presidential Hotline. A new indicator has therefore been developed.

6. Macro Planning, Monitoring and Evaluation (PME), Capacity Building and Knowledge Management

This sub-programme involves leading PM&E capacity development and knowledge management initiatives, and facilitating better use of PM&E knowledge across government. This sub-programme is also responsible for providing the overall policy framework for M&E in government.

7. Programme Objectives

- To monitor the level of compliance by government departments with management practices
- To monitor the quality of services provided by government departments to citizens at institution and facility level
- Increased responsiveness of public servants and accountability to citizens
- To promote active citizenry and leadership
- To lead PM&E, capacity building and knowledge management initiatives, and to facilitate better use of PM&E knowledge across government
