## Executive Authority Statement

The Department of Labour's extension to include 'Employment' has expanded its mandate beyond monitoring of the labour market regulatory framework to creation of employment as well as coordination of employment efforts throughout Government and its agencies. This Annual Performance Plan (APP) for 2020 /21 reflects the expanded mandate of the Department of Labour to include 'Employment'. The reconfiguration of the Department is already underway. There is a roadmap, but it is still a work in progress.

The traditional mandate of the Department of Labour is in no way diminished by this extension of the mandate. The mandate still includes labour market regulation, collective bargaining, social security [through the Unemployment Insurance Fund (UIF) and the Compensation Fund (CF)], health and safety, employment equity, supported employment enterprises, inspection and enforcement services.

I should also mention that we have identified non-compliance in terms of payment of the National Minimum Wage particularly amongst vulnerable workers. With this in mind, we have introduced the Impimpa Hotline, which is a simple, enabling, free and anonymous helpline to report non-compliant employers, considering the limiting environment that domestic workers find themselves in. The accompanying software will allow us to track areas and sectors where non-compliance occurs as well as track the speed with which the inspectors respond to tip-offs.

In relation to the National Minimum Wage, a comprehensive review on the impact of implementation will be published this year. There will also be a review of the amount paid. In the meantime, the National Minimum Wage Commission has recommended an inflation-linked increase to preserve the current value of the Minimum Wage. Whilst this is not a Living Wage, it has already benefited millions of workers, and it provides a foundation for future improvements.

In relation to farm workers, there is often a thin line between labour issues and issues of land rights, particularly in regards to illegal evictions of labour tenants. The law is clear, but the route through the courts to find justice is often long, expensive and cumbersome. That is why we are cooperating with the Departments of Justice, and Agriculture and Rural Development in expanding the mandate of the CCMA (Commission for Conciliation, Mediation and Arbitration) to provide a faster, simpler dispute resolution service to the sector before disputes are escalated to the courts.

In this financial year, there are several legislative amendments for finalisation, which include the Compensation for Occupational Injuries and Diseases Act (COIDA), which will be extended to cover domestic workers. I should also mention that COIDA benefits will be increased in 2020. We will be pushing through Parliament the Occupational Health and Safety Bill, which is aimed at improving the health and safety of workers, thereby keeping them at their workplace resulting in productivity gains. The Employment Equity Act (EEA) is being strengthened after years of minimal compliance. The amendments will allow us to set sector targets, and non-compliant businesses will be excluded from doing business with the State.

This mandate of the Department is critical in promoting the objectives of decent work and in the belief that a well-regulated labour market, stable labour relations and a safe and humane work environment are preconditions for attracting investment for growth and employment creation.

In line with the "Employment" mandate, we will be developing a National Employment Policy, which will be supported by strategies on employment as well as focused programmes. This is all the more important in the present fast changing environment of climate change, energy challenges and the onset of the Fourth Industrial Revolution (4IR).

The Department has outlined its understanding of the extension of the new mandate to include "Employment". We have now started the process of integrating the extended mandate through implementing the reconfiguration process to become the Department of Employment and Labour. This process will unfold in two phases:

- Phase 1: Building on the existing strengths of the Department, and
- Phase 2: In the words of President Ramaphosa in the June 2019 SoNA speech: the 'coordination of all government efforts to create jobs and reduce unemployment'.

Phase 1, which is building on the existing strengths of the Department, has two main legs: leveraging existing resources in the Department and its entities (principally the UIF and CF) and utilising existing capacity and programmes to create and preserve jobs. This is already under way and includes all projects implemented under the Labour Activation Programmes.

We are currently in the process of reviewing the Labour Activation Programme to ensure that its three streams, which are, enterprise development, training of unemployed and TERS are properly resourced for greater impact. The High Impact Social Fund and the Project Development Partnership Fund will be put into greater use to support the growth of small and medium enterprises. This we will do in collaboration with the Department of Small Business Development.

In line with the Job Summit Framework Agreement, we have reviewed the Temporary Employer/Employee Relief Scheme (TERS), shifting our focus from endless training schemes in the past, often unrelated to the demands of the labour market, towards support for actual existing jobs in distressed companies. This involves referrals from the CCMA subsequent to the

Section 189A process. The scheme will expand its impact with the development of improved turnaround times for applications for TERS funding.

The Project Development Partnerships (PDP) programme seeks to assist start-ups and small businesses, where there is no appetite from the usual funding institutions. The programme is expected to create 10 000 direct jobs plus additional jobs downstream. The programme involves incubation of entrepreneurs and assistance to access markets, as well as a specific project to support previously disadvantaged youth and women to establish six new Asset Managers.

The second leg of Phase 1 of the reconfiguration is to strengthen the role of National Economic Development and Labour Council (NEDLAC) to promote social dialogue between the social partners labour, business, communities and Government. This provides a strong foundation for government's priority of attaining 'inclusive growth'. The implementation of the Jobs Summit commitments is an example of this. A major objective is to create the conditions for increased business confidence to unlock investments for growth and jobs.

Since the last SoNA in June 2019, NEDLAC has been effectively mobilised to support the implementation of the Presidential Youth Employment Intervention. This includes accelerating our efforts to pathway young people into the economy. Unemployed work-seekers will receive active support, information and work-readiness training to access employment, education and other opportunities. Through a partnership between the Harambee Youth Employment Accelerator and National Youth Development Agency, we are mapping all of the services that are available to young people so that they can find help and support anywhere in the country. We will be opening new Youth Employment Centres in KwaZulu-Natal (Newcastle and Durban) and Gauteng (Johannesburg), adding to the Cape Town Centre, which is already up, and running.

The implementation of Phase 2: coordinating all Government efforts to create jobs and reduce unemployment is envisaged as a longer-term process and will require further research and resources. This phase will be characterised by heightened engagement across Government and the private sector in order to increase cooperation and alignment in tackling the current unemployment challenges with clear policies and strategies.

Therefore, the practical task of reconfiguring the Department of Labour into the Department of Employment and Labour to incorporate the expanded mandate of "Employment" is underway. In the meantime, we will continue to provide vocational services through our Public Employment Services (PES). Through this programme, the work-seekers will get proper advice on job opportunities, will be registered on our employment database and, where possible, matched to the job opportunities available.

Improving accessibility to our services is very important in connecting us with our clients. To ensure that our suite of services reach almost everyone, we will be implementing a number of initiatives such as our "Taking services to the people" campaign, procurement of mobile buses, and exploring the possibility of extending our service hours. The Department will recruit young unemployed graduates to work at our key service points. This initiative will go a long way in improving service delivery, providing these young graduates with practical work place experience, and 'growing our own timber' in areas of critical skills.

All these initiatives, which are well articulated in our Annual Performance Plan, are intended to give effect to the government's goal of stabilising our labour market, and creating that conducive environment for investment, economic growth and job creation. We will therefore ensure that this plan is fully implemented by the Department.

I wish to thank for all their support, in particular Deputy Minister, Ms. Boitumelo Moloi, and the Director-General, Mr. Thobile Lamati, as well as the management and staff of the Department and its entities: the CCMA, Productivity SA, NEDLAC, the CF, the UIF and SEE (Supported Employment Enterprises).

**MR TW NXESI, MP**

**Executive Authority of Employment and Labour**

## Foreword by the Deputy Minister

President Ramaphosa appointed the Minister TW Nxesi as the new Executive Authority for the reconfigured Department of Employment and Labour. This is the power assigned to the President in terms of Section 91(2) of the Constitution of the Republic of South Africa, 1996. The Constitution further outlines the Ministerial Responsibilities in Chapter 5.

Just recently, the Minister signed a Performance Agreement with the President to deliver on the Electoral Mandate. The contents of which sets out the powers and functions assigned to the Executive Authority. The performance agreement outlines in detail the electoral mandate prioritised in the 2020/2025 MTSF or the five-Year Strategic Plan.

Our 2020/2025 Strategic Plan and the 2020/2021 Annual Performance Plan is a detailed reflection of the SONA Commitments, the NDP Priority areas, specific targets and measurable performance indicators.

Our indicators, baselines and targets also have a direct link to the Medium-Term Strategic Framework (MTSF). The Director General of the Department has submitted to the Executive Authority, the delivery plan towards achieving the set Departmental targets. The Minister and I will be very tough on the evaluation, review and impact assessment of the planned targets and indicators. The 80 to 100% targets set by the President for this Department must be achieved in the following key responsibility areas:

- Provide political leadership contributing to the country's triple challenges, NDP Priorities and Medium-Term Strategic Framework 2020 – 2025
- Work towards achieving a capable, ethical and developmental state
- Provide institutional oversight on the HOD and the Department of Employment and Labour
- Provide political leadership and oversight. We are mandated to ensure that there's optimal political and administrative interface within the Department, provide support for good governance and participate in international and regional integration programmes and commitments.

This Departmental Strategic Plan and APP is a direct and actionable response to the Performance Agreement of the Minister. Our new mandate is to coordinate all government efforts to create jobs and reduce unemployment. The key responsibility area on political leadership contributing to the country's triple challenges, the NDP Priorities and the MTSF 2020 -2025 also responds to this new mandate.

Our target in this regard is to reduce unemployment to 20 - 24% with 1 million jobs especially for Youth, to grow the economy by 2- 3% and grow the country's levels of investment to 23% of the GDP.

This Administration led by the Director- General who brings more than 20 years of experience in the Public Service, with the adequate support of all the Deputy Director-Generals and all Senior Officials, will achieve all these targets.

In our very short period of this 6th Administration, the Minister and I have tabled very crucial pieces of legislation namely the Employment Equity Amendment Bill and the Compensation for Occupational injuries and Diseases Amendment Bill, that impact on the lives of the ordinary people. We owe it to the collective effort of the hardworking Departmental team, all Branches as well as Entities of this Department for the outstanding work. We know there's still much to be done.

The toughest journey of the next five years has just begun. It's going to be very difficult we know. What makes it even more difficult and yet exciting is the will of the people we serve who constantly need government services.

I wish to thank the Minister, Mr TW Nxesi, and the Director-General, Mr Thobile Lamati, as well as the management and staff of the Department and its entities: the CCMA, Productivity SA, NEDLAC, the CF, the UIF and SEE (Supported Employment Enterprises).

## Accounting Officer Statement

The revision of this Annual Performance Plan (APP) is caused by a magnitude of reasons, most predominantly that of the worldwide COVID-19 pandemic causing a decline in economic activity. As a result thereof the budget allocation to the Department was decreased with 7,2% or R261 924 million. Despite the budget cuts, the service delivery of the Department cannot be compromised- particularly in a time of economic hardship faced by so many of our citizens. The work of the Inspectorate and that of PES continues to be prioritised in this amended APP.

On 8 May 2019 South Africa held its sixth general elections to select a new National Assembly and Provincial Legislature. On conclusion of these general elections the President of the Republic of South Africa introduced a number of changes in our operating environment. Our Department is amongst the departments affected by the changes introduced by the President. After the general elections the President announced that the Department of Labour will now be known as the Department of Employment and Labour.

The consequential effect of the name change is an automatic extension of the mandate of the Department of Labour to include employment. There were many debates in the media and amongst ourselves as officials of the Department as to what this extension of mandate entails. Amongst other things, the first thing that came to our minds is that Government is serious about creating jobs and our country is embarking on a serious journey to create decent sustainable jobs.

We welcomed the President's announcement; because it confirmed to us that what we were doing all along as the Department through Public Employment Services; the Unemployment Insurance Fund and Productivity South Africa is aligned with the Sixth Administration's focus on job creation; generating higher income growth and most importantly serving the people of South Africa better.

The Government's focus on job creation initiatives like the Job Summit and the extension of the mandate of the Department of Labour are understandable; because the South African unemployment rate continues to be a challenge. In the last quarter of 2019 the South African unemployment rate remained at 29.1%. The concerning factor is that the net addition of 45 000 jobs over the quarter was not enough to compensate for the 125 000 people entering the workforce over the same period. It is also alarming to note that over the course of 2019 as whole, there was a net loss of 108 000 jobs. The largest loss of jobs was in the craft, and related trade sector, followed by technicians, elementary workers, plant and machine operators.

The 108 000 job losses had a knock on effect on other sectors such as the Domestic Worker sector. At the end of 2019 the Domestic Worker sector had a net loss of 16 000 jobs. It should be understood that when difficult economic conditions hit, households take a knock and resort to dropping their domestic workers, a way to cut monthly costs. This seems to suggest that we have a deep rooted structural unemployment challenge that affects everyone at all levels and immediate measurable action is required. We believe as the Department of Employment and Labour we cannot tackle this huge responsibility of creating jobs alone.

Therefore, there is only one question that stems out from the Department of Labour's extension of its mandate; the massive numbers of people entering the workforce and job losses. That question is "What are we as the Department of Employment and Labour planning to do to accommodate the new entrants in the labour force and prevent further job losses." At face value this appears to be a simple question to answer; therefore, a no brainer. The response to this question is not as simple as the question suggests; however, we are excited to respond to the challenge through detailed time bound strategies.

In responding to the challenge the Department has taken stock of all job creation instruments we have as a country; engaged in discussions with our strategic private and public stakeholders entrusted with these job creation instruments and now we are busy crafting a detailed long term Employment Strategy that will inform the mandate of the Department of Employment and Labour. However, the work cannot wait while we are doing all of that; therefore, we had to align our strategic direction as the Department of Employment and Labour with the Sixth Administration Government priorities.

Our Strategic Plan, over the next five-years, 2020/2025 and Annual Performance Plan for 2020/21 gives an indication of our strategic direction and the performance targets; which amongst others will ensure that immediate actionable steps are put in place to stabilize the climbing unemployment rate. I am confident that with the support received from the Minister; Deputy Minister; Oversight Committees; Top Management and the entire staff of the Department of Employment and Labour the actionable steps outlined in our Strategic Plan and Annual Performance Plan will bear positive results.

## Part A: Our Mandate

### 1. Updates to the relevant legislative and policy mandates

The Department of Employment and Labour derives its mandate from the Constitution of the Republic of South Africa and gives effect thereto through a number of Acts which regulate labour matters in South Africa. Such legislation includes the Labour Relations Act (1995), the Basic Conditions of Employment Act (1997), the Employment Equity Act (1998), and the Occupational Health and Safety Act (1993).

The Department of Employment and Labour's legislative framework is informed by the South African Constitution, Chapter 2, and Bill of Rights:

- Section 9, to ensure equal access to opportunities
- Section 10, promotion of labour standards and fundamental rights at work
- Section 18, Freedom of association
- Section 23, To ensure sound Labour relations
- Section 24, To ensure an environment that is not harmful to the health and wellbeing of those in the workplace
- Section 27, To provide adequate social security nets to protect vulnerable workers
- Section 28, To ensure that children are protected from exploitative labour practices and not required or permitted to perform work or services that are inappropriate for a person of that child's age or their well-being, education, physical or mental health or spiritual, moral or social development is placed at risk and
- Section 34, Access to courts and access to fair and speedy labour justice.

### 3. Updates to Institutional Policies and Strategies

#### STRATEGIES

**Inspection and Enforcement Services (IES) Branch** started with its first strategy in 1999 and by 2001 it was being implemented. The premise of the first strategy was to offer a one-stop service to clients in order to avoid duplications of services and to avoid several inspectors pitching up at the workplaces of employers.

By 2008, IES was ready to implement its second strategy, this strategy was different from the first in that it sought to introduce four Pillars of service delivery and in so doing, ensure the professionalisation of the inspectorate. The process was broken up in phases with the first phase focusing primarily on changes to the inspectorate in the provinces in relation to the structure specifically in the provincial offices. The second phase included changes to the inspectors in the Labour Centres, this was halted due to amongst other things, funding.

There was also the introduction of the Standard Operating Procedure which focussed on the standardisation of the manner in which the inspector conducted his/her work daily (before, during and after the inspection or other similar work).

The Pillars are comprised as follows:

1. **Professionalisation of inspectors and services** - Task base inspector to professional inspector.
2. **Customer centred approach** - The client comes first
3. **Improved compliance** - Re-active response to self-monitoring. Prosecutions are prioritised.
4. **Effective and supportive business process management** - Silo to teams and systems –and includes: ICT; Operationalise service package and Appropriate structure.

#### POLICIES

On 1 January 2019, the National Minimum Wage Act (NMWA) was introduced for implementation by IES (monitoring and enforcement) and Labour Policy and Industrial Relations (establishment and implementation of a National Minimum Wage Commission). The primary purpose was to provide for a minimum wage for the most vulnerable. Certain sectoral determinations would still be applicable after the introduction of the NMWA.

The recent updates of various pieces of legislation such as the Employment Equity Act were also being fully implemented in order to give effect to the recent changes introduced.

**The Public Employment Services Branch** will develop a number of policies during the MTEF period to respond to a number of identified challenges:

1. **Employment Policy** – the policy will be developed in line with the ILO Employment Policy guidelines to ensure that the country has a coordination framework for all employment initiatives in the country. The policy will be consulted extensively to receive maximum input and to ensure buy in or support during its implementation stages
2. **Labour Migration Policy** – the policy is in line with the South African Development Countries (SADC), Ministers of Employment/Labour and Ministers of Interior/Home Affairs for all member states to have Migration Policies that will assist in the management of movement of labour and the African Union (AU) protocol on the movement of labour in the region

3. **Strategy or Employment Schemes framework** – the framework is intended to provide short term employment in the midst of oversupply of labour and few employment opportunities available. The framework is intended to provide short term employment relief especially amongst young people, to stimulate the economy through multiple exit strategies that will allow participants to generate own income
4. **Partnership Agreements** - PES will also embark on a number of partnership agreements that are intended to assist in the capacity development of staff, to expand the PES services and secure commitment by employers to use PES services.

#### **4. Updates to Relevant Court Rulings**

##### ***a) African Labour Civil Rights Union (ALCRU) v Registrar of Labour Relations: (J 1605/17)***

This was an appeal in terms of section 111(3)(b) of the Labour Relations Act. The Registrar of Labour Relations refused to register the Applicant (ALCRU) as a trade union as a result of its shortcomings in terms of the relevant sections of the Labour Relations Act, 66 of 1995 as amended. The Registrar found that the union:

1. Had no members
2. Could not account financially
3. There was no proper formation of the union.

The court found that the Registrar was correct in finding that the union was not formed as a genuine trade union. The Court further found that the Registrar was correct to conclude that the union did not have proper financial control measures. The appeal of the Appellant (ALCRU) was dismissed.

Judgement was delivered on 9 November 2018.

##### ***b) Solidarity v Minister of Employment and Labour and 5 Others (J 3092/2018)***

The Human Rights Commission published their Equality report titled “Achieving substantive economic equality through rights-based radical socio-economic transformation in South Africa. In short, this report finds that the definition of designated groups as determined in the Employment Equity Act (EEA) is non-compliant with both the Constitution and international law obligations. This report therefore recommends that the EEA be amended in order to target more nuance groups, based on needs and socio economic indicators. Solidarity took the view that the report cannot merely be ignored due to its factual existence. Solidarity was of the view that the Equality report has recommendations that ought to be actioned by the Respondents including the Minister of Employment and Labour.

In summary: The court held that there is no statutory or other regulatory provision that deems the Equality Report binding on government or any other party. The court placed emphasis on the fact that the South Africa Human Rights Commission itself did not intend the Report to be binding and considered it to be a research report intended to contribute to the public discourse and to provide advice and guidance to government in fulfilling its constitutional obligations. Hence, the court found that there was no basis on which this court is empowered to confirm or otherwise enforce the report’s findings and recommendations for the purpose sought by Solidarity or for any other purpose. The court dismissed the application with no cost.

Judgement was delivered on 8 October 2019.

## Part B: Our Strategic Focus

### 5. Updated Situation Analysis

As the country adjusts to the drastic technical recession, questions are inevitably being asked about the impact of Covid-19. At this stage, it is reported that no one knows when the pandemic will be brought under control, or what the multiplier effects of different negative economic shocks will bring. However, it is reported that Covid-19 is a health shock, which has mutated into a complicated tangle of a demand shock, a supply shock and a financial shock, all coming together at a time when South Africa was poorly fortified economically to deal with it<sup>1</sup>.

According to Statistics South Africa (Stats SA), the South African economy slipped already into recession in quarter four of 2019 by 1.4% followed a contraction of 0.8% (revised) in the third quarter of 2019. Again, the real GDP decreased by 2.0% in the first quarter of 2020<sup>2</sup>. This is the third consecutive quarter of economic decline while the Covid-19 impact is still looming. Furthermore, the International Monetary Fund (IMF) projections reported that: *"...Because of the Covid-19, the global economy is projected to contract sharply by -3% (but by -5.8% in South Africa) in 2020, much worse than during the 2008/09 financial crisis. Because the economic fallout is acute in specific sectors, policymakers will need to implement substantial targeted fiscal, monetary, and financial market measures to support affected households and businesses domestically<sup>3</sup>..."*

Besides, an experimental survey study conducted by Stats SA<sup>4</sup> has also deepened our understanding on the business impact resulting from Covid-19. Only 707 businesses that were VAT registered have participated to the survey for the reference period from 30 March - 13 April 2020. In the report, the following key results are highlighted amongst others<sup>5</sup>:

- ✓ 46.4% indicated temporary closure or paused trading activity;
- ✓ 50.4% expected their workforce size to stay the same in the two weeks after the survey, while 36.8% reported that their workforce size is expected to decrease;
- ✓ 28.3% indicated that their workforce has decreased working hours and 19.6% reported laying off of staff in the short term;
- ✓ 38.2% of businesses applying for financial assistance reported that they would use government relief schemes;
- ✓ 30.6% indicated they can survive less than a month without any turnover, while 54% can survive between 1 and 3 months;
- ✓ 46.3% of the workforce was able to meet business demands, and 43% of the workforce was not able to meet business demands (the rest reported 'unsure').

In view of this, the South African President Cyril Ramaphosa announced<sup>6</sup> an R500 billion (\$26bn) stimulus package about 10% of the Gross Domestic Product (GDP) to deal with the devastating socio-economic impact of Covid-19 and days of lockdown. He said *"the money would come from its adjustment budget, the Unemployment Insurance Fund and multilateral institutions... he stressed that the pandemic requires an economic response that is equal to the scale of the disruption it is causing..."* Thus, the measures introduced to assist the economy include:

- R20 billion to assist efforts that address the pandemic;

- R20 billion for municipalities for the provision of emergency water supply, increased sanitisation of public transport and facilities, and providing food and shelter for the homeless;
- A six-month temporary Covid-19 grant of R50 billion. This means that child support grant beneficiaries will receive an extra R300 in May and from June to October they will receive an additional R500 each month. All other grant beneficiaries will receive an extra R250 per month for the next six months;
- A special Covid-19 Social Relief of Distress grant of R350 a month for the next 6 months will be paid to individuals who are currently unemployed and do not receive any other form of social grant or UIF payment;
- R100 billion for protection of jobs and to create jobs;
- R40 billion for income support payments for workers whose employers are not able to pay their wages;
- R200 billion-loan guarantee scheme to be introduced to help businesses pay salaries, rents and suppliers. Companies with a turnover of less than R300 million a year can participate;

With regard to the above, the Department of Employment and Labour (DEL) has made significant progress in the payment of applications. As of 24 June 2020, the Unemployment Insurance Fund (UIF) has paid R8.4 billion (R 8 401 750 767.94) to 149 120 employers who submitted applications on behalf of 2 037 458 employees. In total, the Funds has disbursed close to R28 billion (R27 717 930 315.10) since 16<sup>th</sup> April 2020. The payments were intended as a stopgap measure for a period of three months or until such time that lockdown restrictions were eased and the economy slowly reopened.

### **5.1. External Environment Analysis**

South Africa is faced with triple socio-economic challenges of high unemployment, inequalities and poverty as identified in the National Development Plan (NDP), Vision 2030. The unemployment rate is among the highest in the world, in the third quarter of 2019, unemployment remained at 29% (official definition) or 38.5% (expanded definition) from June 2019. Young people are the most affected group with a youth unemployment rate of 41% (official definition) and 52% (expanded definition)<sup>7</sup>.

Over half of unemployed young people including those that are discouraged from looking for jobs, find it difficult to access opportunities in the labour market as a result of their low levels of education, low skills, lack of experience and other social and economic related factors. The high levels of unemployment also mirror the low levels of economic growth of the country.

Compliance levels to labour laws in the country remains relatively static with one in every three employers complying when inspected. Some sectors have better compliance levels than others. Transformation in the market place remains a challenge with very low compliance levels at Employment Equity - DG review level with little or no movement in relation to black people in senior management level positions and little movement in relation to women in senior positions.

The National Minimum Wage Act that was introduced on 1 January 2019 will receive most of the attention throughout the 2019/2020 financial year. There will be a concerted effort to intensify inspections in order to contribute to improved compliance.

<sup>7</sup> Statistics South Africa, Quarterly Labour Force Survey, (Quarter two 2019), Statistical release P0211, South Africa

OHS has been focused more on the formal sector and to some degree on the SMMEs but very little attention has been given to the informal sector that makes up most of the population. Very little attention has also been paid to the important aspect of HIV/AIDS at the workplace and this should change as it has the potential to destabilise the existing workforce.

## 5.2 Internal Environment Analysis

In line with the Presidential Cabinet announcement post National and Provincial Elections in June 2019, the purpose of an internal strategic session was to concretise the President's injunction to expand the mandate of the Department of Labour and to establish the Department of Employment and Labour along the following lines:

Department of Employment and Labour "*will coordinate all government efforts to create jobs and reduce unemployment*", and by extension, it "*will be required to change its approach from mere compliance enforcement to facilitating job creation.*" [SONA, 20 June 2019]

The strategic session undertaken by the Department followed extensive engagements between the Project Management Office (PMO) in the Presidency and the Department, research and analysis into possible options and the practical steps already taken to strengthen the employment dimension of the Department, which is already implicit in the mission of the Department.

The process of the reconfiguration of the Department of Labour to Department of Employment and Labour is not taking place in a vacuum. The department and its entities have a massive physical and digital footprint. It has established structures, processes and programmes – though there are challenges around ICT, financial controls (in certain cases) and lack of coordination resulting in working in silos. In addressing these challenges, the Department builds a basis for the expanded mandate, whilst strengthening its capacity to implement the traditional mandate of labour market regulation, compliance enforcement, decent work, etc.

Politically, the department is tasked with expanding the mandate and charting a way forward towards the creation of the Department of Employment and Labour. Legally and administratively, before the promulgation process is finalised and at the time of tabling this Strategic Plan in March 2020, the Department is still constituted as the Department of Labour. The task at hand is to close this gap as part of a larger project to streamline the architecture of government. The President will announce the new configuration of government departments at the end of March 2020. The Department is expected to take a lead in making proposals on the future shape and direction it intends to take.

After extensive strategic sessions it was resolved that:

1. That the reconfiguration of Department of Labour to Department of Employment and Labour would take place in two phases:
  - *Phase 1: Building on the strengths of the current department*
  - *Phase 2: Coordinating all government efforts to create jobs and reduce unemployment.*
2. **Phase 1** to consist of the following:
  - Expanding the employment dimensions of the current department and leveraging existing resources for greater job creation and retention. The Temporary Employee Relief Scheme programme would be an example of this. Therefore, in practical terms, the process of reconfiguration is already underway, albeit in an ad hoc fashion.

- Strengthen the role of NEDLAC for greater engagement with business to foster confidence and investment and to promote participation in job creation and protection. The Department/NEDLAC's leadership of the Presidential Jobs Summit implementation process has provided important indicators of what would be required in this respect. Again, this is an indication that, on the ground, reconfiguration is already taking place.

3. **Phase 2** will entail the following:

- Coordinating all government efforts to create jobs and reduce unemployment is envisaged as a process involving further research, expanded capacity in relation to labour market policy and extensive engagement with stakeholders.

***In achieving the abovementioned it was further resolved as follows::***

4. The Department will engage the Technical Advisory Centre (GTAC) of National Treasury to provide an objective rapid diagnosis of the Department and its entities to:
  - Identify strengths and weaknesses of the Department and entities as is, and in the light of the new mandate
  - Undertake a skills and resources audits – and deficits/gap analysis
  - Assess the impact and cost effectiveness of current programmes and structures of the Department and its entities, as is – and in relation to the new mandate
  - Provide proposals/options to strengthen/leverage existing programmes and for remedial action where necessary.
5. The Department will engage the ILO to assist to conceptualise the 'End State' for the Department and the entities:
  - Drawing on best international practice
  - Concretising the expanded mandate on employment
  - Continuing its work on the role of NEDLAC – with a view to expanding its role in relation to employment creation and driving social dialogue.
6. The Department will further strengthen NEDLAC by:
  - Finalising processes to appoint an Executive Director and Chief Financial Officer
  - Resourcing NEDLAC to provide the necessary services to social partners in line with the previous ILO review of NEDLAC and any further research.

### **5.3 Strategic Planning Process in the Department of Employment and Labour: STOP, START and CONTINUE Concept.**

From 2018 to date, to further strengthen its situational analysis and respond to emerging challenges, the Department adopted a new strategic planning approach where Branches and the Funds were assigned a responsibility to complete a the STOP (Current State), START (Strategy) and CONTINUE (Desired State) Concept. This concept was further developed for strategic planning aligned to the new MTSF of the sixth administration and the Theory of Change in the Public Sector. The STOP (Current State), START (Strategy) and CONTINUE (Desired State) Concept informs the impact statement devised by the Department: **A labour market which is conducive to decent employment.** The process entailed the institutional outcomes of the four executing programmes of DEL. Linked to these, interventions, indicators and assumptions upon which the execution of the strategy of the Department would be based were devised below.

- To analyse the current state of affairs and to stop anything that is not beneficial to the service delivery of the Department
- To develop a pathway for change by starting projects, initiatives that have a great impact for the service delivery of the Department
- To continue with projects that are yielding intended outcomes, results and have significant impact on service delivery.

The Department’s four Branches and the two Funds developed their proposals on the STOP (Current State), START (Strategy) and CONTINUE (Desired State) Concept for implementation during 2019/20 and the MTEF.

Action plans have been developed by Branches and the Funds to execute the Stop (Current State), Start (Strategy) and Continue (Desired State) Concept. The expectation was that Branch Plans and those of the Funds will continue to reflect the Stop (Current State), Start (Strategy) and Continue (Desired State) Concept for 2020/21. Conducting situational analysis during the planning exercise is key in coming up with realistic priorities. The Stop (Current State), Start (Strategy) and Continue (Desired State) exercise is a practical example of a situational analysis with a view to effect change that will take the organisation to its desired state. The 2020/21 Planning Cycle is taking place following the elections; therefore, it is a requirement for the department to align its plans with a renewed government agenda and start to implement new priorities. Most importantly, the 2020/21 Planning Process requires the Department to position itself to deliver on its new and expanded mandate of Employment.

## 5.4 External Analysis

### PESTEL

According to the Department of Planning, Monitoring and Evaluation (DPME), SWOT and PESTEL analysis are planning tools suitable for the planning process. The new DPME Planning Guideline provides clear guidelines for conducting Environmental Analysis for a government planning exercise.

The Departmental Environmental Scanning process followed the guidelines provided by DPME in an attempt to identify strategic internal capabilities while trying to understand external influences. Branches and Provinces responded with their unique inputs to the Departmental Environmental Analysis.

Internal strengths within an organisation include dedicated and properly skilled human resource, motivated employees, and adequate financial resources, initiatives for IT systems, developmental performance management system, and strong seamless communication channels. Both Branches and Provinces provided inputs highlighting areas of strengths. The analysis of the internal weaknesses focused on shortfalls in areas that if not strengthened the organisation might not achieve its intended results. Some of the examples that are known as weaknesses include, lacking the required resources, (human, financial, ICT, processes and structure supported by strong organisational culture towards managing for results) is an indication that an organisation will not achieve its mandate and no public value will be created. The Branches and Provinces provided inputs highlighting areas of weaknesses in their respective operational units.

The analysis of the external environment was guided by a PESTEL Analysis with a focus on identifying Threats and Opportunities. The identified threats and opportunities are situations that are presented by the external environment. Some areas that can be considered as threats or challenges include: reduction in budget allocation due to poor economic conditions, unfunded mandates which may lead to failure to meet organisation goals which will affect the image of the organisation, poor or weak relations with unions, lack of support from the public, etc.

This exercise provides an organisation a chance to exploit these opportunities presented by the external environment in order to meet the goals of the organisation and create public value. The external environment presents opportunities. It should be noted that based on the inputs received, the Department has many opportunities that need to be exploited.

A comparison summary of the PESTEL analysis focusing on external opportunities has been provided. Below is a summary of Branches and Provincial inputs of the Department:

The Department of Employment and Labour does not project an additional funding requirement. However, the items above were not budgeted for in the 2020/21 budget process, and as such, Virement will be required. It is anticipated that funding will be available for Virement under items such as Travel and Subsistence, Venues and Facilities, etc.

The COVID-19 pandemic, being an unprecedented situation for the world at large including South Africa, has come with major legal challenges. Accordingly, the Department of Employment and Labour is navigating through the challenges brought on by COVID-19. The Directive on COVID-19 Temporary Employer/Employee Relief Scheme was issued by the Minister of Employment and Labour was amended several times due to grey areas and gaps. These amendments required expert knowledge and advice in order that litigation is avoided. Counsel was briefed to assist.

Emanating from the Directive on Temporary Employer/Employee Relief Scheme there were many communications received from Attorneys representing Trade Unions, Employer Organisations and NGOs. In order to avoid litigation on these matters, legal opinions were sought from Counsel.

Furthermore 10 Court Applications were received during the period 01 April 2020 and 19 May 2020 and most of these Applications relate to the COVID-19 situation. The Department through its Inspectors issued Prohibition Notices which had the effect of shutting down workplaces. In other Applications, the Department was requested to provide PPE's to self-employed individuals. Many more legal challenges are likely to arise. The Department cannot afford to have the budget allocated for legal costs to be cut. Legal costs are required to defend the position of the Department in order to ensure that the Department and the Minister are not exposed to reputational damage.

The work of the Department needs to be marketed, this need liaising with media, produce media statements, set up interviews, write opinion pieces, design graphics to promote the work of the department on different media platforms, and engage the stakeholders in relation to the government economic cluster demands at GCIS including NEDLAC social partners. The communication team needs to be up scaled to manage social media platforms, write stories in real time, monitor media and advice political principals on what is in the media for effective responses.

R298 million cut in compensation of employees will mean that some filled posts will have to be cut and some employees laid off. The 20% cut on Operating Lease amounts to R31 million and as it is the department is projecting an over spending of R10 million on this item.

Overall the department is prepared to cut 7.2% (R261, 8 million) of its main appropriation for 2020/21 financial year; R96, 8 million on Compensation of Employees, R88, 2 million Goods & Services, R78 Million on Transfers & Subsidies and R13, 7 million on Payments of Capital Assets.

Most of the funds were sourced from the assumptions that the spending will be slow due to the effects of the pandemic on the departmental activities. The filling of vacancies is anticipated to be delayed; travel will be reduced for all the programmes and some will be left. Inspection and Enforcement Services inspectors, computer services was also reduced mainly due to the historic underspend over the years. Operating leases were not cut due to the fact that the department is expecting to overspend on this item, as a result all other item under Goods & Services were severely cut to reach the minimum required by National Treasury. The transfer to CCMA was cut by R55.4 million despite the expected increase in the number of cases and interventions relating to COVID-19. NEDLAC was also cut by R5 million, which the entity will be able to accommodate. Payments of capital assets was also reduced by R 13.7 million; the acquisition of some fleet cars will be suspended for the current financial year, on the building project will realise a saving for the current financial year and less computer equipment will be purchased than it was budgeted.

### 7.1.3 Explanation of planned performance over the medium term period

The planned outcomes above will contribute towards an ethical and corrupt free public service and lead to building of trust by the Public. The settling and resolution of Hot line cases will contribute towards a citizenry that has confidence in government processes.

The outcome indicators have a direct relationship with the outcome intended and will ensure a direct response and achievement of the set outcome.

Over a period of five years the outcomes should lead to the changed perception of the Public service by citizens and bring the citizens closer to the Public service. Further the Public service should project and ethical behaviour that is representative of people holding public office and that care about the citizens.

**Narrative: Explanation of the contribution of resources towards achievement of outputs.**

Administration consists of 1740 posts. The officials in this section are responsible for the administrative support toward the Department. This programme is also responsible for the printing and publishing of the Departmental publications, rental of suitable office accommodation and maintenance of government owned buildings that the Department occupy. Administration also carries the bulk of the telephone expenses, audit cost and the ICT costs to ensure that the Department can execute its duties. This programme carries the capital expenses for the Departmental Fleet.

The work of the Department needs to be marketed, this need liaising with media, produce media statements, set up interviews, write opinion pieces, design graphics to promote the work of the department on different media platforms, and engage the stakeholders in relation to the government economic cluster demands at GCIS including NEDLAC social partners. The communication team needs to be up scaled to manage social media platforms, write stories in real time, monitor media and advice political principals on what is in the media for effective responses.

Payments of capital assets was also reduced by R 13.7 million; the acquisition of some fleet cars will be suspended for the current financial year, on the building project will realise a saving for the current financial year and less computer equipment will be purchased than it was budgeted.

## 7.2 Programme 2: Inspection and Enforcement Services

**Programme purpose:** Realise decent work by regulating non-employment and employment conditions through inspection and enforcement, to achieve compliance with all labour market policies.

### Objectives

Protect vulnerable workers through the inspection and enforcement of labour legislation by ensuring that decent work principles are adhered to by:

- Conducting 220 692 compliance inspections by March 2021
- Serving 85 per cent of noncompliant employers inspected with a notice in terms of relevant employment law within 14 calendar days of inspection
- 65% of non-compliant employers received by Statutory Services referred for prosecution within 30 calendar days
- At least four Seminars and two Conferences (formal Advocacy) conducted per year to increase awareness of employment law by March 2021.

### Subprogrammes

*Management and Support Services: Inspection and Enforcement Services* manages the delegated administrative and financial responsibilities of the office of the Deputy Director General, and provides corporate support to line function subprogrammes within the programme.

*Occupational Health and Safety* promotes health and safety in the workplace by conducting inspections on compliance with the Occupational Health and Safety Act (1993), and regulating dangerous activities and the use of plant and machinery.

*Registration: Inspection and Enforcement Services* registers incidents relating to labour relations and occupational health and safety, as reported by members of the public, and communicates these to the relevant structures within the *Compliance, Monitoring and Enforcement Services* sub programme for investigation.

*Compliance, Monitoring and Enforcement Services* ensures that employers and employees comply with labour legislation by conducting regular inspections and following up on reported incidents.

*Training of Staff: Inspection and Enforcement Services* defrays all expenditure relating to staff training within this programme.

*Statutory and Advocacy Services* gives effect to the legislative enforcement requirement and educates stakeholders on labour legislation.

### 7.2.5 Explanation of planned performance over the medium term period

The Inspection and Enforcement Services Branch derives its mandate from the following relevant legislation:

- Basic Conditions of Employment Act, Act 75 of 1997, as amended (BCEA)
- Employment Equity Act, Act 55 of 1998, as amended (EEA)
- Unemployment Insurance Act, 30 of 2001, as amended (UIA)
- Occupational Health and Safety Act, Act 85 of 1993, as amended (OHSA)
- Compensation for Occupational Injuries and Diseases, Act 130 of 1993, as amended (COIDA)
- Employment Services Act, Act 4 of 2014, as amended (ESA)
- Unemployment Insurance Contributions Act, Act 4 of 2002, as amended (UIC)
- National Minimum Wage Act, Act 9 of 2018 (NMWA)

a) The contribution of outputs towards achieving the outcomes and impact in the Strategic Plan aligned to the mandate of the institution; as well as the achievement of priorities of women, children and Persons with Disabilities

IES contributes to the overall Departmental mandate by providing advocacy, inspections and enforcement services on the relevant labour market laws administered to employers, employees and the general public. The main purpose being the compliance of employers to labour market laws thereby creating decent work. Women, Persons with Disabilities are covered by the Employment Equity Act and children are covered in terms of the Occupational Health and Safety Act and the Basic Conditions of Employment Act.

b) Explanation of planned performance in relation to outputs must be discussed within budget programmes, the rationale for the choice of the outcome indicators relevant to the respective outcomes

Increased compliance and therefore improved conditions of employment (decent work) will be achieved through the achievement of the following outcome indicators:

- Conducting 221 556 compliance inspections by March 2021;
- Serving 90 per cent of noncompliant employers inspected with a notice in terms of relevant employment law within 14 calendar days of inspection;
- Percentage of non-compliant employers received by Statutory Services referred for prosecution within 30 calendar days;
- Four (4) seminars and two (2) Conferences conducted per year to increase awareness of employment law.

The allocated budget for the Branch to implement its Programmes, is R **631 133m**, R**679 735m** and R **723 472m** over the medium term.

c) Explanation of the outputs contribution to the achievement of the outcomes

The outputs that have been selected are expected to provide the greatest improvement in workplace compliance in line with the IES business model and strategy. Decent work is a right and

not 'nice-to-have whenever if feel like it' matter. Employees, including the most vulnerable will enjoy the protection of the labour market laws as was intended in the Bill of Rights.

The rationale for the choice of the outcome indicators relevant to the respective outcomes

The indicators are based on the IES business model as the vehicle most relevant and appropriate for maximum impact.

Explanation of enablers to achieve the five-year targets

Key to the achievement of the five year targets will be:

- Adequate budget in goods and services to ensure inspectors are mobilised;
- Adequate tools of trade;
- Sufficient capacitated inspectors;
- Trained resources and
- Strong partnerships

Any compromise in any of the aforementioned will have a broad impact on achievements.

Explanation of the outcomes contribution to the achievement of the impact

The achievement of the outcome indicators will have the impact of improved compliance by increased protection in all sectors. Intended impact:

- Employers are registered with UIF and CF and pay what is required of them;
- Workers are paid what is due to them;
- Labour market is transformed and
- Workers work in healthy and safe workplaces

**Narrative: Explanation of the contribution of resources towards achievement of outputs.**

The IES Branch delivers one of the core functions of the Department of Employment and Labour and is responsible for ensuring compliance with all labour laws of the Republic of South Africa. This document will provide a rationale for the IES Branch's contribution to the 20% reduction in its budget that has been proposed at this critical time in IES. The Branch is expected to show how it will contribute by reducing its allocated budget of R676 893 000 to R135 379 million. The reduction will impact on the Goods and Services as well as the Compensation of Employees budgets.

**Compensation of Employees**

The consequence of reducing the budget on CoE is that any posts that have been advertised and on the verge of filling, will be filled and the budget will not be available against those posts. Every inspections post that will be cut or not filled will result in 15 inspections for the month not being

achieved per inspector. In the case of the OHS inspector it would mean incidents not being investigated. On the other hand, it would mean the NMW not being monitored, etc. The culling of posts would therefore have a major impact on the enforcement of labour laws overall.

#### Goods & Services

Having considered the Table provided to IES in the meeting by the OCFO, IES has decided that it would cut costs on the following items as listed:

- Training & Development – original allocation R4 664 000. This can be slashed by 50% to R 2 332 000.
- Venues & Facilities – original amount allocated R 4 483 000. This can be slashed by 50% to R 2 241 500.
- Catering will be taken away as indicated and there is no discussion on this R 3 148 000.

The impact of the budget cut on the NDP and the MTSF would result in workers living in abject poverty as a result of employers not paying workers what is due to them. Incidents would not be investigated and compensation not being paid to workers from the Compensation Fund. Workers that die or may be permanently or even temporarily disabled would not be compensated and would therefore be a burden to the public health system as opposed to them being able to get proper medical treatment through the Compensation Fund.

Having feet on the ground is the most important part of inspections and investigations as it impacts directly on the lives of the most vulnerable. The greatest impact on the Programmes budget will be felt by Travel and Subsistence; Venues & Facilities and Property and Payment. The greatest variable on the IES budget is due to the operations arm of the Programme at Provincial level.

Travel & Subsistence is the life blood of the IES programme and is linked to inspections on the ground. The inspectors are required to travel on a daily basis all over the country. Any cut in Travel and Subsistence will result in the inspectors being office bound and as a consequence, no work or very little work being done, depending on the size of the budget cut. The nature of inspections and investigations is that it is out of the office and is evidence based. In the case of reactive inspections, clients will report a matter for which an inspector would be required to go out and do an investigation.

The number of complaints reported is a thumb suck year on year and is dependent on several variables. Proactive inspections are more controlled and rely on the inspectors planning their work. The inspectors now identify sectors that they will inspect in a year and plan accordingly. There is therefore more control over this aspect. By reducing the budget however, the bread and butter area of the Programmes work will be affected radically.

Adding to the pressure on the budget is the month-on-month increase on the petrol price (occasional decrease) and the threat on the overall targets of the branch which is required to meet a certain number of inspections monthly.

Over and above these concerns raised, the programme will have to put on hold any of its projects. Due to these budget cuts, the Branch will need to re-evaluate how it will move forward.

In addition to the aforementioned, the programme is currently running the following model: advocacy, inspections and enforcement and the current structure is hopelessly understaffed to the

extent that certain components of the model are skewed and not working synchronously with other components of the model. An example would be the current ratio of enforcement officers in statutory services that is required to prepare and submit cases to court for recommending prosecutions. This component is undoubtedly understaffed to the extent that there is an overlap of cases month after month due to cases that too numerous to be sent through. All cases are required to go through the statutory services officers before being submitted to court. Additional work was put onto the inspectors in the form of the National Minimum Wage Act (NMWA) without the addition of staff to monitor this sector. Staff was therefore redirected to monitor this area.

### In Conclusion

The Branch is able to squeeze together the amount of R 95 363 899 from its overall allocation of R 676 893 000 for the FY 2020/2021 which amounts to 14%. Furthermore, R95 363 899 is 70% of the amount sought by the Department from IES Branch.

### 7.3 Programme 3: Public Employment Services

**Purpose:** Assist companies and workers to adjust to changing labour market conditions.

#### Objectives

- Provide public employment services by:
  - Registering 750 000 work seekers on ESSA by 31 March 2021
  - Registering 95 000 work opportunities on the employment services of South Africa database system by 31 March 2021
  - Providing employment counselling to 220 000 work seekers by 31 March 2021
  - Filling 47 500 registered employment opportunities by 31 March 2021
  - Conclude 30 partnership agreements with various stake holders
  - Develop Employment Policies to be tabled to the ES Board
- Increasing employment for Persons with Disabilities by providing quarterly funding over the medium term, and monitoring disability organisations on an on-going basis.

#### Sub-programmes

- *Management and Support Services: Public Employment Services* manages delegated administrative and financial responsibilities; coordinates all planning, monitoring and evaluation functions; and provides corporate support to line function subprogrammes.
- *Employer Services* registers work opportunities, facilitates the employment of foreign nationals where such skills do not exist in South Africa, oversees placements, responds to companies in distress, provides a social plan and regulates private employment agencies.
- *Work Seeker Services* registers work seekers, retrenched workers, work and learning opportunities, training and income-generating opportunities on the Employment Services of South Africa system, and facilitates access to employment and income-generating opportunities for the unemployed and underemployed.
- *Designated Groups Special Services* facilitates the transfer of subsidies to national organisations to promote the employment of Persons with Disabilities.
- *Supported Employment Enterprises* transfers promote supported employment for persons with long-term physical, mental or sensory impairment disabilities
- *Productivity South Africa* transfers funds to Productivity South Africa, which promotes workplace productivity, competitiveness and social plan interventions.
- *Unemployment Insurance Fund* provides for the possible future funding of the Unemployment Insurance Fund.
- *Compensation Fund* provides for costs incurred through claims from civil servants for injuries sustained on duty or occupation- related illnesses and diseases, and provides for the funding of claims from the Compensation Fund.
- *Training of Staff: Public Employment Services* defrays all expenditure relating to staff training in the programme to easily identify this expenditure for reporting purposes.

### 7.3.4 Explanation of planned performance over the medium term period

Public Employment Services derives its mandate from:

- Employment Services Act 4 of 2014
- Applicable provisions that remain in the Skills Development Act 14 of 1998 and
- Applicable provisions of the Immigration Act 2002

a) The contribution of outputs towards achieving the outcomes and impact in the Strategic Plan aligned to the mandate of the institution; as well as the achievement of priorities of women, youth and Persons with Disabilities.

PES contributes to DEL mandate by providing assistance to companies and workers to adjust to changing labour market conditions, and to regulate private employment agencies.

Branch activities and outputs are focused on increased placement of work seekers to work and learning opportunities.

b) Explanation of planned performance in relation to outputs must be discussed within budget programmes, the rationale for the choice of the outcome indicators relevant to the respective outcomes

Increased placement of work seekers to work and learning opportunities will be achieved through the outcomes outlined below.

- (i) Number of work seekers registered on Employment Services of South Africa per year
- (ii) Number of work and learning opportunities registered
- (iii) Number of work seekers provided with employment counselling
- (iv) Number of work seekers placed in work and learning opportunities
- (v) Number of partnership agreements concluded with various stakeholders
- (vi) Number of policies developed and approved.

The allocated budget for the Branch to implement its Programmes, is R 643 467m, R685 905m and R711 437m over the medium term.

c) Explanation of the outputs contribution to the achievement of the outcomes

All outputs identified by the Branch contribute to improvement of work-seekers' work readiness and placement.

The rationale for the choice of the outcome indicators relevant to the respective outcomes

The outcomes will assist many work-seekers, to register themselves as work-seekers on the national register of the employed, and receive job preparation support, including counselling, psychometric assessment and job preparation.

Explanation of enablers to achieve targets

Sufficient budget to enable the establishment of employment centres and provision of equipment is required.

Explanation of the outcomes contribution to the achievement of the impact

The achievement of the outcome indicators will have the impact of improved placement of work-seekers into learning opportunities and permanent jobs.

**Narrative: Explanation of the contribution of resources towards achievement of outputs.**

South Africa' levels of unemployment levels remains very high at an estimated 10 million people unemployed. These numbers are projected to increase by another 690 000 to 1,79 million due to the impact of the Covid-19 and adjustments that companies are likely to make post the lockdown. The Department of Employment Labour was put under tremendous pressure to pay workers under the Unemployment Insurance Fund and this trend is likely to continue with the millions that are likely to lose employment.

As part of the reconfiguration of the Department to reposition itself to deal with the levels of high unemployment, a process has been initiated to develop an National Employment Policy that will amongst others have sub-themes to deal with Labour Migration to address the influx of undocumented migrants and the resultant unfair employment competition and exploitation and the Employment Schemes to provide short term employment and income relief. Whilst the policy may take two years to complete, the two sub-themes are at an advanced stage given their urgency.

Due to the Covid-19 outbreak and resultant restrictions, the Department's plans were impacted upon and savings will be realized in the Compensation of Employees due to delays in filling of vacancies, massive reduction in the travelling between Head Office and the Provinces due to Covid-19 restrictions and suspension of Capital Project on establishment of Youth Centres. The proposed budget reduction and suspension of a number of interventions will in turn impact on the 2020/21 targets as outlined in the Annual Performance Plan and on the Department's initiatives to play a much more active role in facilitating job creation, registration of the work seekers and providing them with counselling services.

The reduction on Transfers to entities especially the Supported Employment Enterprises budget will impact on the projected 100 increase, in the number of people with disabilities employed, percentage increase in the revenue generated and expansion to Mpumalanga will not be realised during the 2020/21. The 10 Designated organisations receiving employment subsidies for employing people with disabilities administration costs will be reduced and the investments into youth centres assets will be reduced to one and the balance of the budget will be allocated towards funding the VAT component of the Education for Employment (E4E) Youth Centres to be funded by the European Union.

**Supporting work seekers**

The sub-programme Work-seeker Services has adjusted the manner in which work seekers are to be registered as long as covid-19 exists and will also innovate and modify its operations going forward. The registration will be mostly online; drop boxes at Labour Centers and visiting points, and will also draw on the UIF retrenchment and dismissals UI 17 form. The development of the Youth Centers model under the E4E will be adjusted to mobile units that can reach out to outlying areas and avoid

congestion in the limited Labour Centre spaces. The model centres will also accommodate the counselling services and screening of work seekers in their communities.

The registration of work seekers will require further discussions with the Department of Social Development as there are far reaching implications posts the six months Covid-19 R350 grant period. The 2020/21 target of 800 000 will be exceeded although it will put tremendous strain to the Labour Centres due to shortages of Client Services Officers within PES across the country. The suspension of the Youth Centre Roll-out and installation of self-service stations to the 64 remaining Labour Centres will also impact on the PES employment intervention processes. The target of Employment counselling will be provided to 800 000 registered work seekers over the medium term. The targets for counselling services, employment opportunities and placement will depend on the agreements concluded with a range of stakeholders, the new electronic and social distancing method of providing them, the acceptable means of verification by both Internal Audit and the Auditor General.

## 7.4 Programme 4: Labour Policy and Industrial Relations

**Purpose:** Facilitate the establishment of an equitable and sound labour relations environment, support institutions that promote social dialogue; promote South Africa's interests in international

labour matters, conduct research, analysis and evaluation of labour policy and provide statistical data on the labour market.

### Objectives

- Improve employment equity implementation and compliance monitoring mechanisms in the labour market by:
  - publicising the 2019/20 employment equity annual report and public register by 30 June 2020
  - developing the 2020/2021 employment equity annual report and public register by 31 March 2021
- Extend protection to vulnerable workers by publishing national minimum wages for all sectors
- Promote sound labour relations and centralised collective bargaining through the extension of collective agreements and 100 per cent registration of qualifying labour and employer organisations by 31 March 2021
- Monitor and evaluate the impact of labour legislation to promote an evidence-based labour policy framework through the production of research and labour market trend reports by 31 March 2021.

### Subprogrammes

- *Management and Support Services: Labour Policy and Industrial Relations* manages delegated administrative and financial responsibilities; coordinates all planning, monitoring and evaluation functions; and provides corporate support to line function subprogrammes
- *Strengthen Civil Society* transfers funds to various civil society organisations that protect vulnerable workers by providing resources, support and expertise to improve the independence and self-reliance of workers, in order to contribute to a stable and well-functioning labour market
- *Collective Bargaining* manages the implementation of the Labour Relations Act (1995) through policies and practices that promote sound labour relations by: registering labour organisations and deregistering those that are noncompliant, publishing and extending collective agreements; supporting and advancing participation in collective bargaining structures, and participating in relevant National Economic Development and Labour Council activities
- *Employment Equity* promotes equity in the labour market through the elimination of unfair discrimination and the promotion of equitable representation in the workplace
- *Employment Standards* protects vulnerable workers in the labour market by administering the Basic Conditions of Employment Act (1997)
- *Commission for Conciliation, Mediation and Arbitration* transfers funds to the Commission for Conciliation, Mediation and Arbitration, which promotes social justice and fairness in the workplace through dispute prevention and dispute resolution services
- *Research, Policy and Planning* monitors and evaluates the impact of labour legislation and policies that affect the South African labour market
- *Labour Market Information and Statistics* collects, collates, analyses and disseminates internal and external labour market statistics regarding changes in the South African labour market as a result of the implementation of labour legislation
- *International Labour Matters* contributes to global policy formulation and facilitates compliance with international obligations through multilateral and bilateral relations
- *National Economic Development and Labour Council* transfers funds to the National Economic Development and Labour Council, which promotes economic growth, participation in economic decision making and social equity through social dialogue.

### 7.4.3 Explanation of planned performance over the medium term period

Outputs contribute positively to Priority2 Economic transformation and job creation by ensuring that policy environment supported through policy instruments developed and promoted to enhance the implementation of the EEA. Outputs contribute positively to priority 6 Social cohesion and safer communities by promoting sound labour relations through extension of collective agreements and registration of labour organisation. Research conducted over the medium term is aimed at assessing policies and programmes made to ensure that South Africa create and sustain decent jobs for its citizens. The results of the research will be used in amending policies and programme outlined in the department's strategic plan and even creating new ones as guided by research evidence.

Outputs will be implemented within the allocated planned budget for the programme. No additional budget will be required. Outputs are aligned with the allocated budget for the programme. No additional resources will required to achieve them.

Research reports will provide findings that would be used to review legislation, policies and programmes aimed at reducing unemployment and creating and sustaining decent employment similarly, best practice derived from bilateral and multilateral engagements inform the policy decisions that assist in the improvement of our labour markets. Outputs will create a workplace environment that is fair, just and inclusive workforce that embraces diversity. Outputs will moderate workplace conflict and contribute to orderly collective bargaining in the labour market.

**Narrative: Explanation of the contribution of resources towards achievement of outputs.**

In line with In-Year budget reductions to fund the COVID 19 relief as announced by the President, the Department did a rigorous process to ascertain where savings would result from the National Lockdown period. As a whole, R104.675 million / 8% could be identified. However, in line with National Treasury instructions, further reductions had to be made.

- **Compensation of Employees** - A projected savings of R10.919 million / 9%, resulting from anticipated savings until end July 2020 due to vacant posts. The remaining amount is to cater for both filled and vacant posts. Further reductions would result in insufficient funds to cater for currently filled posts.
- **Goods and Services** – Budgets have been reduced to such an extent that it is highly probable that the Department will overspend at the end of the financial year. Further reductions cannot

be made due to leases, contracts, maintenance, prior commitments, etc. Reductions total to R15.663 million / 32%.

- **Transfers and Subsidies –**

- **Strengthen Civil Societies** – Due to the May Day Celebration that did not take place, the budget can be reduced with R3 million. Social distancing could result in further reductions.
- **CCMA** – The minimum indicated by the National Treasury as reduction, is R55, 4 million, however, the Department cannot carry the remaining 20%. Within the current economic climate, as well as the resultant effects of the lockdown, the workload of the CCMA will increase dramatically both in terms of the envisaged retrenchments, as well as the unfair labour practice issues eventuated by the lockdown. It is envisaged that the organisation will run short on its current budget allocation as a result of the increase in numbers of mining wage cases. In addition to this, the need to procure sanitation materials and personal protection equipment has had a serious impact on the budget of the organisation. The organisation would further be required to do significant work in relation to the assistance required for struggling businesses within the context of the TERS system. The combination of factors in addition to the proposed budget cut will have a deleterious effect on the ability of the organisation to function effectively.
- **NEDLAC** – The entity cannot afford to carry the remaining 20% cut on its budget.

The National Economic Development and Labour Council is a statutory body governed by the National Economic Development and Labour Council Act (1994), from which it also derives its legislative mandate, which is to promote the act's goals of economic growth and social equity. The legislative and policy programme of government, as well as issues tabled by its constituent chambers, determines the council's work programme.

The work of the NEDLAC Chambers focuses on enhancing the promotion of economic growth, social equity, decent work and employment creation. Over the medium term, the National Economic Development and Labour Council will continue to focus on accelerating development and tackling the challenges of unemployment, inequality and poverty by advancing social dialogue and recognising the role of social partners (organised business, organised labour, government and communities) in jointly contributing to the accomplishment of inclusive economic growth in South Africa. The council will aim to strengthen its role as South Africa's pre-eminent facilitator of social dialogue by concentrating on the capacity, conduct and commitment of the social partners involved in socioeconomic policy-making and legislation, and on the achievement of the work programmes of the council's chambers.

The council's total budget for 2020/21 was R62.9 million. The decrease is in response to COVID-19 measures that will be implemented in 2020/21. Imperative to note is that the work programme of Nedlac will continue, while travel and accommodation costs will significantly reduce. Social dialogue will take place largely on virtual platforms.

- **ILO and ARLAC** – The budgets were already approved and can therefore not be reduced. There is a possibility that further budgets might be lowered as possible funding could be available to these institutions due to non-utilisation for events in 2020.

The Department of Employment and Labour does not project an additional funding requirement. However, the items above were not budgeted for in the 2020/21 budget process, and as such,

Virement will be required. It is anticipated that funding will be available for Virement under items such as Travel and Subsistence, Venues and Facilities, etc.

The COVID-19 pandemic, being an unprecedented situation for the world at large including South Africa, has come with major legal challenges. Accordingly, the Department of Employment and Labour is navigating through the challenges brought on by COVID-19. The Directive on COVID-19 Temporary Employer/Employee Relief Scheme was issued by the Minister of Employment and Labour was amended several times due to grey areas and gaps. These amendments required expert knowledge and advice in order that litigation is avoided. Counsel was briefed to assist.

Emanating from the Directive on Temporary Employer/Employee Relief Scheme there were many communications received from Attorneys representing Trade Unions, Employer Organisations and NGOs. In order to avoid litigation on these matters, legal opinions were sought from Counsel.

Furthermore 10 Court Applications were received during the period 01 April 2020 and 19 May 2020 and most of these Applications relate to the COVID-19 situation. The Department through its Inspectors issued Prohibition Notices which had the effect of shutting down workplaces. In other Applications, the Department was requested to provide PPE's to self-employed individuals. Many more legal challenges are likely to arise. The Department cannot afford to have the budget allocated for legal costs to be cut. Legal costs are required to defend the position of the Department in order to ensure that the Department and the Minister are not exposed to reputational damage.

The work of the Department needs to be marketed, this need liaising with media, produce media statements, set up interviews, write opinion pieces, design graphics to promote the work of the department on different media platforms, and engage the stakeholders in relation to the government economic cluster demands at GCIS including NEDLAC social partners. The communication team needs to be up scaled to manage social media platforms, write stories in real time, monitor media and advice political principals on what is in the media for effective responses.

## Part C: Measuring performance

### 1. Performance Information

#### Programme: Supported Employment Enterprises

##### Purpose:

- facilitates supported employment;
- provides work opportunities for persons with disabilities;
- develops and implement programmes that promote the employability of persons with disabilities, including persons with permanent disablement as defined in the Compensation for Occupational Injuries and Diseases Act, 1993 (Act No. 130 of 1993), in the light of their evolving needs in a changing economy; and
- performs any other function as may be prescribed by the Minister.

## 2. Explanation of planned performance over the medium term period

The employment of persons with disabilities will assist in reducing their dependency on social grants, provide them with therapeutic employment and promote their participation in the economy.

The SEE will aim to conclude 3 strategic MoAs that are to assist the entity to increase its sales by 5% and to expand its current establishment by employing additional 25 people with disabilities in identified factories..

During 2019/20 the SEE generated annual sales of R60million and managed to increase its establishment to 1250 persons with disabilities across the 13 factories. The SEE will increase its sales by 5% or to R63 million during the current financial year.
