FOREWORD BY THE MINISTER

Strategic planning is guided by the Medium Term Strategic Framework (MTSF), which reflects political, legislative and regulatory outcomes priorities. The plan must give meaning and effect to the National Development Plan (NDP), which sets out where we want to be in 20 years' time as a country.

A diverse media is critical in the creation of an informed and knowledge society. The success of our democracy, the NDP, the massive infrastructure development drive and the hopes of our people are dependent on access to information to the people in languages of their choice.

As Executive Authorities, we are expected to take overall responsibility for developing strategic priorities for the five-year period of our term of office and beyond, developing policy and obtaining approval for the planned outcomes of the department within the political collective – either the national Cabinet or the provincial executive committees.

The MDDA is a juristic person, which acts only through the Board and is required to act in terms of the Public Finance Management Act (PFMA), 1999 (Act No. 1 of 1999). The Agency is independent and must be impartial, exercising its powers and performing its duties without fear, favour or prejudice and without any political or commercial interference. The MDDA Act requires the Agency not to interfere in the editorial content of the media. Section 16 of the MDDA Act provides the accountability framework that requires the Board to submit approved Annual Reports to the Minister for tabling in Parliament. Chapter 7 of the PFMA further accords responsibility to the Executive Authority over an entity such as the MDDA.

The policy priorities that have guided the development of this Strategic Plan are set out clearly in the MDDA Act. The objectives of the MDDA Act are in line with the national policy priorities and the Constitution Act, 1996 (Act No. 108 of 1996), which are to promote media development and diversity, media freedom, the right to freedom of expression and freedom to receive and impart information or ideas. It is for this reason that we believe that the South African story must be told by South Africans united in their diversity, in their own language and expressed in their own culture and heritage. During my recent budget speech, I committed to a review of the MDDA Act to ensure that the MDDA accelerates transformation in the media sector. This will be a priority activity in the medium term.

I hereby approve and endorse this Strategic Business and Annual Performance Plan and commit to ensuring its implementation.

Faith Muthambi
Executive Authority
Minister of Communications

FOREWORD BY THE CHAIRPERSON OF THE BOARD

It is with great pleasure as the Chairperson of the MDDA to present to our Executive Authority, the Department of Communications, represented by the Minister of Communications, the Honourable Faith Muthambi, the Agency's Strategic Business and Annual Performance Plan for the period 2016/17-2020/21. This builds on our broader strategic focus for the MTSF period 2015/16-2018/19, submitted in January 2015.

The 2016/2017 financial year started with the community media sector at the advent of exciting changes in South Africa's media landscape with the launch of the migration to digital, as well as other developments such as the review of the Electronic Communications Act (ECA).

Such developments will have significant impact on community media and reinforce the importance of the role the MDDA plays in leading the discussions on and championing the necessary changes for the sector. Going forward and as outlined in the Strategic Business Plan for 2016/2017 – 2020/2021, the MDDA intends to strengthen its position as a change and innovation agent for the sector, providing the leadership that will ensure the sustainability of community media in such dynamic times.

Strengthening the role of the MDDA in social transformation and access to information for all must require the MDDA to expand its activities to reach a much wider audience through innovative means and public platforms. This includes the promotion of indigenous languages and making a contribution to community development and the alleviation of poverty and inequality.

As a result, while the core activity of the MDDA remains grant and seed funding for community media projects, the Agency has reviewed and intends to reinforce its capacity building, training, advocacy and lobbying roles. For example, the MDDA will support the Department of Communications with implementation of digital terrestrial television (DTT) through supporting projects that are structured to enhance the switch-over and operate effectively in this new digital environment. These projects will cover both the provision of infrastructure and digital equipment, as well as focus on information and training. In addition, a content portal will be established on the MDDA website to enable regular contact with the community media sector and support the generation of quality content.

The MDDA will also continue to carry out research in the sector and interrogate the implementation of the findings. This will be valuable for the sector, and will allow the MDDA to identify gaps in the sector and improve its intervention measures. With the Agency now in operation for over a decade, an Impact Assessment Study was commissioned in 2015/2016 to reflect and evaluate the extent to which the MDDA is responding to its mandate of community media development and diversity by, amongst other objectives, describing the impact of MDDA funded projects and identifying and sharing best practices.

Similar reviews will be done on the MDDA capacity building interventions, both those that have been undertaken and those that are currently offered to the sector. This will enable the MDDA and its partners to address the real needs of the sector in an effort to further ensure its sustainability.

Our stakeholder management processes will also be strengthened. We will work closely with the Minister of Communications, the Department of Communications and our sister entities and sector bodies to support and engage the community and small commercial media in their initiatives. The MDDA will also be more active in the sector, playing a stronger lobbying and advocacy role on the many issues facing the community sector.

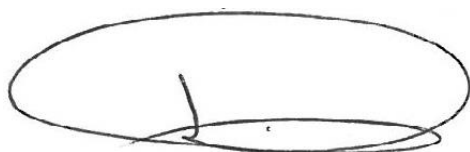

Following the announcement of the Minister of Communications in her budget vote speech regarding a review of the MDDA Act and its associated regulations, we note that this will be a major strategic initiative for the Agency over the coming years. I commit the MDDA, on behalf of the Board and Management, to supporting this initiative, to ensure that the MDDA accelerates its impact on media transformation.

The MDDA is governed by a unitary Board of Directors, which is independent and impartial, and has a separate role and authority from the Chief Executive Officer (CEO). The Board is primarily responsible for setting the strategic direction of the organization, whilst the CEO is entirely responsible for the implementation of the strategic business and annual performance plans.

We welcome Parliament's initiative to restore the Board to a full quorum.

The Board has reviewed and approved Management's reassessment of its work to date, and its resulting redefined focus for 2016/2021 to ensure the promotion of a vibrant and diversified media in South Africa. Management's approach provides structured and measurable targets of what and how the Agency will fulfil the mandate and mission of the MDDA in pursuance of its constitutional prescripts. Further, the MDDA is committed to strengthening relations between its various stakeholder groupings in the best interests of the organization and to the community media sector. It will also continue to uphold its values of, amongst others, integrity and professionalism, ensuring effective, transparent communication with its stakeholders to maintain and build on their trust and confidence.

On behalf of the MDDA, I commit management and the MDDA to a compact between the Department of Communications and the MDDA based on this strategic plan.

Phelisa Nkomo
Chairperson of the MDDA

OFFICIAL SIGN-OFF

It is hereby certified that this Strategic Plan:

Was developed by the management of the MDDA under the guidance of THE DEPARTMENT OF COMMUNICATIONS.

Takes into account all the relevant policies, legislation and other mandates for which the MDDA is responsible

Accurately reflects the strategic outcome oriented goals and objectives which the MDDA will endeavour to achieve over the period 2015/2016 – 2019/2020

FIVE YEAR PRIORITIES

In reviewing its achievements over the past decade and the changes in the external environment, the MDDA has identified five priorities to guide its activities over the next five years. This will ensure that it remains a relevant and powerful leader in the transformation of the media, thereby ensuring that all people and communities have access to the media.

1. **Lead MDDA Act Review Processes:** place the MDDA at the forefront of discussions to review the MDDA Act to ensure that the legislative review is completed with an understanding of the needs of the sector.
2. **Organisational Renewal:** review the current MDDA organisation structure, capacity, policy frameworks and funds to promote enhanced organisational delivery.
3. **Support Organisational Delivery and Growth:** promote implementation with cutting-edge research and effective communication systems
4. **Expand Funding and Capacity for Community Media Development:** review current community media funding models to ensure sustainable funding as well as responsible asset management support.
5. **Position MDDA as a Leader in the Sector:** build Public and Media Sector Awareness in order to influence national policy.

PART A: STRATEGIC OVERVIEW

1. Vision

Access to diversified media for all

2. Mission

Ensuring the sustainable development of vibrant, innovative and people centered media

3. Values

Integrity: We are honest, transparent, reliable, fair, accountable and responsible for our actions to staff and clients

Ubuntu: We are people centered: empathetic, courteous and respectful to our staff and clients alike

Professionalism: We are efficient, effective, service delivery orientated, punctual, performance driven and work collectively

Commitment: We are passionate, go the extra mile, responsive, have a strong work ethic, and are consistent and accessible

Innovative: We lead with innovative solutions while embracing change and transformation

4. Legislative and other mandates

The Media Development and Diversity Agency (MDDA) is a statutory development agency for promoting and ensuring media development and diversity. It is a partnership between the South African Government and major print and broadcasting companies to assist in, amongst others, developing community and small commercial media in South Africa.

It was established in 2003, in terms of the MDDA Act No. 14 of 2002 and started providing grant funding to projects on 29 January 2004.

The mandate of the Agency is therefore enshrined in law and aims to:

- Create an enabling environment for media development and diversity which reflects the needs and aspirations of all South Africans.
- Redress exclusion and marginalisation of disadvantaged communities and persons from access to the media and the media industry.
- Promote media development and diversity by providing support, primarily to community and small commercial media projects.

The MDDA's approach to grant funding in pursuit of the Agency mandate includes financial and non-financial support in the form of:

- Grant funding - provision of subsidies to individual media projects and to create an enabling environment for the development of a diverse media.
- Leveraging resources and support through technical assistance.
- Conducting and funding research.
- Facilitating capacity building.
- Advocating for media diversity, development and transformation

4.1 Constitutional mandate of MDDA

The MDDA derives its mandate from Section 16 and 32 of the Constitution Act No. 108 of 1996, thereby providing for freedom of expression and access to information.

4.2 Legislative mandates

The MDDA is governed by legislation and regulations that support and strengthen its role in transforming society and the developmental state. Such legislation includes the MDDA Act of 2002, the Public Finance Management Act No.1 of 1999 (PMFA), the Electronic Communications Act No.36 2005 (ECA), the Promotion of Administrative Justice Act.No.3 of 2000 (PAJA) and a number of related legislations and regulations that promote media development and diversity and encourage diverse ownership and control as well as the administration of justice.

4.3 Relevant court rulings

There have been no court rulings during the planning period.

5. Updated situational analysis

The Strategic Business Plan and the Annual Performance Plan of the Media Development and Diversity Agency (MDDA) for the period 2016/17 to 2020/21 are informed by the prevailing socio political and economic environment operating in South Africa, the National Development Plan (NDP) and the media environment.

5.1 Performance environment

Political imperatives

The current political environment suggests that the MDDA will continue to operate within the legislative and policy framework adopted by the Government, the NDP, the Medium-term Strategic Framework and the Medium-term Expenditure Framework.

Media development and diversity form part of the priorities the Government is pursuing, with much still needing to be done in deepening media transformation and ensuring that disadvantaged communities directly partake in all aspects of media development and management.

The MDDA's mandate as outlined by the MDDA Act is currently undergoing a review. This review takes place in an environment where there is a growing political need to accelerate media transformation. Delivery on digital migration will be key in changes made in the media policy framework.

The MDDA saw a change in its Executive Authority in 2014 and now reports to the Minister of Communications. In preparing this strategic plan, the MDDA has explored potential areas of alignment with the Department of Communications' priorities.

Economic imperatives

The South African economy is performing weaker than expected and growth has slowed to an expected 1% in 2015.

In his 2015 budget speech, Finance Minister Nhlanhla Nene noted that global economic growth was expected to remain sluggish over the period ahead. The media therefore operates in an economic environment that reflects government's commitment to cost containment and spending wisely. Government's competing priorities must be impact based.

The media consumer has changed dramatically, a shift that requires innovative media owners who can respond to the changing media landscape to remain sustainable.

Social imperatives

At the social level, South Africa continues to be plagued by issues of unemployment, poverty, and inequality, including some degree of lack of social cohesion and increasing service delivery protests.

The NDP Vision 2030 suggests that unemployment levels must drop from 27% in 2011 to 14% by 2020, requiring 11 million jobs, and that the proportion of working adults should increase from 41% to 61% in the same period. Black youth constitute the major proportion of the unemployment rate.

The NDP 2030 points out that, whilst global integration has brought about sustained growth, it has also been marked by negative trends. It points out that the gap between the rich and the poor worsened globally from 0.44 in 1950 to 0.54 in 2000. This is projected to rise going forward.

Literacy and numeracy remain a challenge in South Africa, in spite of major changes and achievements that have been reported in the increase of literacy rates in general. The limitation in functional literacy levels inhibits media diversification and undermines efforts of promoting democratic participation and development of disadvantaged communities. There is therefore a greater role for the MDDA in sharing information and knowledge with these communities through a wide range of media platforms and in developing these communities to be knowledge centres and instruments of self-empowerment.

Technological imperatives

Rapid technological advancements have promoted change across the globe and South Africa is not immune. A key challenge for the MDDA's broadcasting stakeholders is digital migration where digital terrestrial television (DTT) requires members to have the equipment and capacity to compete in a digital environment. The same is true of radio.

There are early indications that the migration will not be without cost for the MDDA's stakeholders, with increased costs for transmitters already being identified by community television stations. The costs include ensuring a good balance of local content, as well as

available cheaper content that services a public mandate. The MDDA must ensure that the new technology's benefits are not outweighed by its costs.

Breaking news is now digital. The increasing trend is for stories to be first told on social media before migrating to legacy platforms such as print, radio and television. This means that print media needs more support in an ever changing print landscape that competes with online media, including social media.

Community media - like their mainstream colleagues - need business models to sustain these new forms of storytelling.

The MDDA's role is vital before, during and after migration to ensure that community media's interests are identified, fought for and maintained.

Environmental imperatives

Aligned to the technological imperatives are global concerns on greening economies. The NDP 2030 commits South Africa to reducing its dependency on carbon, natural resources and energy, while balancing this transition with its objectives of increasing employment and reducing inequality and poverty through adaptation and mitigation. Adaptation includes significant investments in new and adaptive technologies and rehabilitating and restoring natural ecosystems to improve resilience and mitigate climate change.

The MDDA has a major role to play in promoting and supporting these global and national initiatives in its messages and technologies and those of its beneficiaries, as well as promoting recyclable technologies and discouraging unfriendly environmental practices.

Media transformation

The Print and Digital Media Transformation Task Team (PDMTTT) defined transformation as “changing the country and its institutions from an oppressive, exploitative and unrepresentative past into a free and democratic dispensation. In the PDMTTT context, transformation is a process of repositioning print and digital media from being a minority white controlled sector to a truly South African industry that not only resonates with the aspirations of the country but also jealously guards and protects the freedom won at a price beyond measure”.

Ownership, skills development, management control and employment equity, digital media migration, support for community and small independent publishers, possible new revenue and funding models for community print and shared intelligence are all part of the transformation agenda.

Role and mandate of MDDA

Current media (in particular print) lacks diversity and recognition of indigenous languages and culture. Approximately 80% of the South African population is African, yet a huge number of indigenous language media products are written and produced in English. This is in direct contradiction to the notion of recognising all languages on an equal basis as prescribed by the constitution.

Advertising tends to be biased toward media houses with adequate financial resources. Marketing skills are also lacking in the sector. In many communities, especially rural

communities, frequency spectrum allocation, printing facilities and distribution are inadequate. This frustrates efforts of small community initiated media to advance and to be effective.

The community broadcasting sector continuously faces challenges in respect of signal distribution tariffs which have an impact on their sustainability efforts. The Agency needs to ensure that meaning is given to Section 62 (3) of the Electronic Communications Act, which provides that a common carrier must:

- (a) subject to its technological capacity to do so and to the provisions of paragraph (b), provide broadcasting signal distribution to broadcasting licensees upon their request on an equitable, reasonable, non-preferential and non-discriminatory basis;
- (b) in determining its tariffs, duly take into account the following: (i) the different categories of broadcasting service licenses referred to in sections 49, 50 and 51; and (ii) the nature and technical parameters of the service provided to each broadcasting licensee with a view to ensuring that the different tariffs are appropriate to and commensurate with the various broadcasting services to which they relate.

Digital broadcasting presents an opportunity for community broadcasting; for example, besides being beneficiaries of the digital dividend; they can also be beneficiaries of the dual-illumination period. The Digital Migration Regulation prescribed by ICASA needs to ensure that public and community broadcasting is protected during the digital broadcasting era.

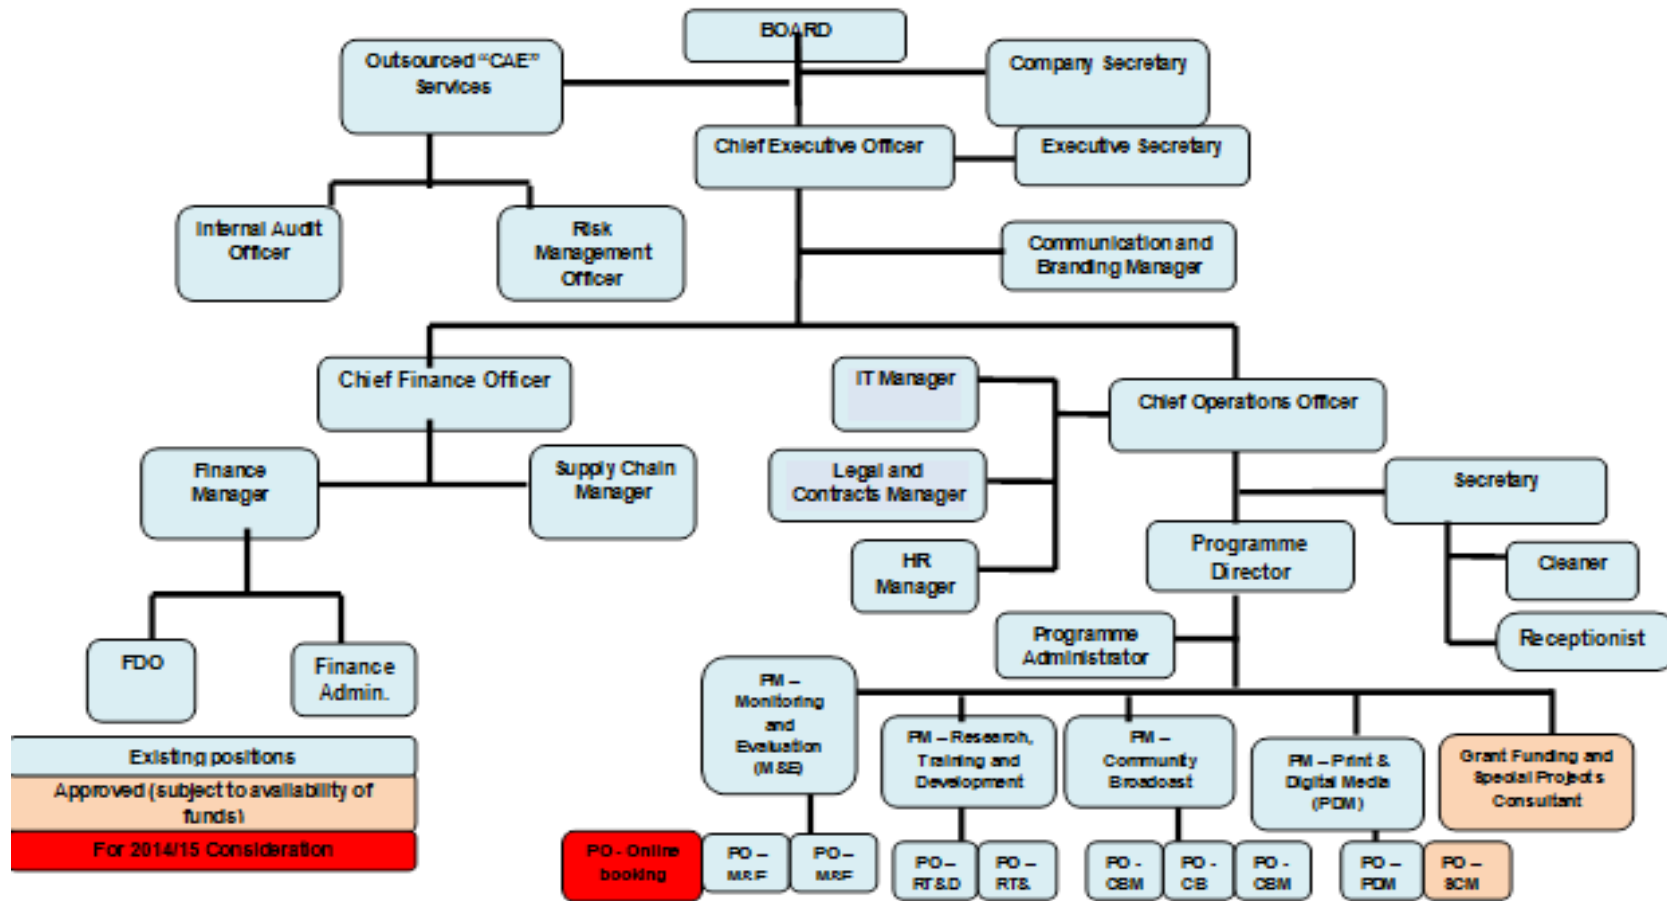

The legislative and policy framework is likely to change, particularly with regard to the transformation of print media, media charter, and media accountability mechanisms, etc. There is already concern about possible anti-competitive behaviour in the value chain of print media business. The Agency needs to be at the centre of assisting and ensuring that these processes enhance its agenda of media development and diversity.

5.2. MDDA organisational environment

The enabling legislative environment and the positioning of the MDDA in the Department of Communications present it with an opportunity to reach wider audiences and entrenches the relevance of its value proposition. The core of the MDDA is the Programmes – Grant and Seed Funding and Research and Training, which are currently organised under the Programme Director structure. In light of the changing media landscape, including the migration to digital, to which the MDDA strategy is aligned, the structure is being reviewed to provide the internal capacity that strengthens its ability to deliver on its mandate and the evolving requirements of the media landscape. Such changes will potentially elevate the accountability of the various programmes as well as include expertise to guide and direct the MDDA’s strategic and policy making role.

5.3. Description of the strategic planning process

The Agency has updated its five year strategic plan. This annual update is done by taking into consideration several inputs; a scan of important developments in the internal and external environment, an updated analysis of perceived strengths, weaknesses, opportunities and threats (SWOT), and engagement with internal and external stakeholders. Changes in the strategy are influenced by the availability of funding, recommendations from institutional reviews and changes in leadership.

MTSF allocations were made to enable the Agency to participate in the integrated implementation of the plan, especially when advancing the philosophy of a digital society.

Monitoring implementation of the strategy provides regular feedback on the progress of operational plans, and together with evaluating the achievement or non-achievement of predetermined objectives and targets provides managers, decision makers and other stakeholders with performance measurements. This information informs the Agency's progress in its Annual Report and in turn is used in the next planning cycle.

In accordance with prescripts stipulating that the Accounting Officer must establish procedures for quarterly reporting to facilitate effective performance monitoring, evaluation and corrective action, the Agency has a formal reporting framework with emphasis on quarterly progress reporting against the quarterly targets committed to in the APP. This informs the Annual Report which provides an overall indication of the Authority's progress towards achieving the strategic objectives and targets set out in this Strategic Plan.

The review of the MDDA Strategic Business Plan 2016/17 – 2020/21 is done in the context of the country entering into the second phase of the transition of ensuring socio-economic transformation of the country. Key documents that inform the strategic review are the MDDA Act (14 of 2002), the National Communication Strategy Framework 2014-2019 and the NDP Vision 2030. The review gives the MDDA an opportunity to align itself to the rapidly changing media landscape and develop programmes that are responsive to the needs of the citizenry.

Financial perspective

The strategic objective for this perspective is to strengthen, grow and protect the MDDA funding base. The revenue of the MDDA is however affected by the fact that the PDMSA has withdrawn its funding, indicating the need to determine the impact of its funding before committing to a new funding agreement. This funding gap results in a decrease in the number of small commercial media projects able to be funded by the Agency. The budgeted revenue will be achieved by ensuring that legislated submissions to National Treasury are submitted in time within the agreed framework and protocols.

The financial management systems of the MDDA will be upgraded to ensure that expenditure is kept within budget and that variations to actual budget are kept within the 8% range either way at the worst case scenario.

Stakeholder perspective

The MDDA delivers its work through strategic partnerships with other government departments, industry bodies and stakeholders. The partnership principle as articulated in the National Communication Strategy Framework 2014-2019 is to deliver output-based programmes that contribute to innovative products and services that delight the stakeholder expectations. In this regard, the Agency aligns its performance programmes to contribute towards the realisation of key priorities of the NDP.

Through the community radio support programme, the Agency will continue to provide digital broadcast equipment to ensure access to this valuable communication platform in communities. Partnerships with the ICASA and SENTECH, as a signal distributor and State Owned Entity, remain key to enhancing uninterrupted community broadcast services that provide the majority of South Africans with access to information and a platform to express themselves and contribute to participatory democracy.

As part of the media transformation mandate, the Agency will work in partnership with industry bodies such as the PDMSA, NAB, NCRF and AIP to create sustainable models for grassroots and independent media that is owned by small and medium enterprises (SMME) and are produced in indigenous languages.

Business process perspective

The strategic objective is to strengthen MDDA processes, systems and procedures. As a media development agency, the MDDA should lead compliance and accountability measures.

The Agency's monitoring and evaluation framework will be revised to ensure that grant funded projects are compliant with the relevant funding agreements and that all identified gaps in the monitoring process are corrected to give effect to the planned impact.

A Human Resources Information Management System (HRIMS) will be implemented in order to ensure that there is accuracy of personnel data.

Learning and growth perspective

The MDDA is focused on establishing and nurturing an environment conducive to learning, growth and development.

Alignment to the Department of Communications

The Department of Communications' mandates are derived from the President's pronouncement at its establishment. These are:

- Develop an overarching communications and broadcasting policy and strategy.
- Provide information dissemination and publicity to promote an informed citizenry.

The Department has set itself the following strategic goals which will be achieved when implementing the President's mandates:

- A responsive communications policy and regulatory environment.
- Improved government communications and country branding.
- Improved capacity of the department and its entities to deliver.
- Transformed communications sector.

The July 2013 Cabinet Lekgotla approved 14 Outcomes for the 2014-2019 MTSF and are well understood to be a delivery mechanism for the NDP. The following two outcomes are relevant to the MDDA:

Outcome 12: An efficient, effective and development orientated public service (This speaks to MDDA as an institution and its values.)

Outcome 14: Nation building and social cohesion (This speaks to content and production elements.)

NDP Outcome 14 envisions a society where South Africans will be more conscious of what they have in common than their differences.

The MDDA by virtue of being a delivery agent for the Department of Communication must contribute to the attainment of this outcome.

PART B: STRATEGIC OBJECTIVES

7. Programme 1: Administration

Purpose: The programme ensures effective leadership, strategic management and administrative support to the MDDA through continuous refinement of organisational strategy and structure in line with appropriate legislation and best practice. The programme consists of six strategic objectives, encapsulated in six sub-programmes.

7.1 Strategic objectives

Strategic Objective 1.1	<i>To provide transactional and transformational Human Resource Management to attract and retain suitably qualified staff across the Agency</i>
Objective Statement	Provides transactional and transformational HR support enabling MDDA. The Human Resources component of the MDDA is a strategic partner of the MDDA's core business, fostering and embedding the values and the strategic objectives of the Agency as espoused in the strategic plan. The focus areas of the Human Resources Management sub-programme are: <ul style="list-style-type: none"> - Organizational development - Review of Human Resource policies - Building skills and competency base within the Agency - Job profiling - Improving employee benefits - Team building and organizational structure
Baseline	90% filled positions
Strategic Objective 1.2	<i>To ensure that the MDDA delivers on its strategic objectives by monitoring and evaluation grant agreement compliance and impact of MDDA funded projects</i>
Objective Statement	Overall development and implementation of reliable planning, monitoring and evaluation reporting.
Baseline	65 Monitoring Reports and 20 Evaluation Reports
Strategic Objective 1.3	<i>To manage the Legal and Regulatory Affairs of the MDDA to enable the Agency to execute its mandate effectively within the rule of law.</i>
Objective Statement	Provides a comprehensive legal and regulatory advisory and contracts management service to enable the Agency to execute its mandate effectively.
Baseline	Positive contribution towards policy development, and legally sound contract management as well as a litigation free Agency

Strategic Objective 1.4	<i>To facilitate accountability, governance and oversight through Finance and auxiliary services which ensure effective, efficient, economic and transparent management of revenue, expenditure, assets and liabilities across the Agency.</i>
Objective Statement	Provides the administration, financial management, supply chain management and essential services needed for the effective operation of the Agency
Baseline	Sustainable funding base

Strategic Objective 1.5	<i>To assist the MDDA achieve its strategic objectives by evaluating and improving the effectiveness of governance, enterprise-wide risk management and accountability of the Agency.</i>
Objective Statement	Provides strategic advice, practical insights and recommendations, based on an understanding of the business and best practice. The unit services the Board and supports the Office of the Accountant Officer, acting as a frame of reference in providing guidance and support to the internal audit functions. Enterprise Risk Management ensures that a risk management culture is embedded within the Agency. Fraud prevention is an integral part of the strategy, operations and administration. A strategic risk profile register is maintained, to ensure a coordinated approach to strategic initiatives across the Agency.
Baseline	Approved internal audit 3-year rolling plan

Strategic Objective 1.6	<i>To provide Information and Communication Technology (ICT) solutions and services that support the Agency's business needs and expectations.</i>
Objective Statement	Provides long term planning and day to day support in respect of the needs, services and systems of the Agency. Ongoing implementation and maturing of ICT governance focuses on minimising ICT risks; optimising investment in, and the use and allocation of, ICT resources; and maximising the value and effectiveness of ICT.
Baseline	IT infrastructure and systems that deliver the adaptive and cost-effective service

7.2 Risk management

Section 38(1) of the Public Finance Management Act (PFMA), 1999 (Act 1 of 1999), as amended and Section 3.2 of the Treasury regulations requires the Agency to put a risk management system in place. The Agency has identified the following strategic risks:

Strategic Risk	Mitigation Strategy
Skills and capacity gap	Provide project management training for staff. Purchase a Human Resources Information Management System Implement the staff retention policy Fill in critical positions Implement succession planning policy
Inadequate funding	Raise alternative funding and/or securer non-financial for print media
Financial mismanagement and poor financial reporting	Update the relevant policies, Fill critical vacant posts timely Invest in ongoing training and development initiatives
Fraud and corruption	Effective implementation of fraud prevention strategy and plan
Non-compliance with relevant legislation, regulations, policies and procedures	Align policies and procedures to PFMA, TR, PPPFA, other relevant laws and regulations. Monitor Irregular, Unauthorised, Fruitless and Wasteful Expenditure
Supply chain inefficiencies	SCM Workshop for MDDA officials
Poor governance	Develop and review terms of reference for all governance committees Audit effectiveness of internal controls and systems of risk management
Poor information and document management	Procure an electronic information management system, and/or Electronic document management system
Lack of business continuity	Update integrated Business continuity strategy and plan Offsite data storage

8. Programme 2: Grant and Seed Funding

Purpose: The programme promotes media development and diversity through support for community and small commercial media projects. The programme consists of two strategic objectives, encapsulated in two sub-programmes.

8.1 Strategic objectives

Strategic Objective 2.1	<i>To promote ownership, control and access to information and content production by historically disadvantaged communities, diminished indigenous language and cultural groups through appropriate grant and seed funding to the Community Broadcast sector.</i>
Objective Statement	Provides financial support for digital broadcast infrastructure (on-air and production studio equipment), transmission subsidy, audio streaming, programme production/content generation and operational costs.
Baseline	Community radio and TV stations supported to promote ownership, control and access to information and content production by communities

Strategic Objective 2.2	<i>To promote ownership, control and access to information and content production by historically disadvantaged communities, diminished indigenous language and cultural groups through appropriate grant and seed funding for the Community and Small Commercial Print and Digital Media sector.</i>
Objective Statement	Provides financial support for printing and distribution cost, on-line platforms, and operational costs to both community and small commercial print media projects.
Baseline	Financial support provided for printing and distribution cost, on-line platforms, and operational costs to both community and small commercial print media projects

8.2 Risk management

Section 38(1) of the Public Finance Management Act (PFMA), 1999 (Act 1 of 1999), as amended and Section 3.2 of the Treasury regulations requires the Agency to put a risk management system in place. The Agency has identified the following strategic risks:

Strategic Risk	Mitigation Strategy
Lack of project management capacity	Staff members to be sent for training in project management and other related fields i.e. broadcast and print.
Poor financial reporting	Conduct on-site capacity building programmes, i.e. Grantee orientation workshop(s) and training in financial management, compliance and reporting.
Poor ownership and control by communities	Tighten the section criteria and monitoring mechanisms for community ownership and control.
Fraud and corruption	Implement the relevant clauses in the Grant in Aid Agreement.
Insufficient funds for print and digital projects	Leverage fundraising efforts and lobby the print sector (Big four) support for small commercial media.
Limited sustainability of projects	Partnership with government, government entities and industry bodies

9. Programme 3: Advocacy and Lobbying

Purpose: This programme seeks to position the MDDA as a leading influencer in the community and small commercial media, by playing a key role in the national dialogue on the sector.

In fulfilling its role as an advocate for community and small commercial media, the MDDA needs to position itself as a strong influencer in policy making and legislative review processes affecting the sector. In addition, on behalf of the sector, it must take the lead publically on issues such as digital migration to influence implementation to the benefit of the sector. In continuing to achieve and strengthen its ability to deliver on its mandate, the MDDA is also committed to mobilising the resources across the various stakeholders in the sector by promoting collaboration and fostering mutually beneficial partnerships to avoid duplication of mandates. The programme consists of two strategic objectives, encapsulated in two sub-programmes.

9.1. Strategic objectives

Strategic Objective 3.1	<i>To provide input into the legislature and policies and publically take the lead in developments and strategic programmes which will impact the sector.</i>
Objective Statement	Implements cross-cutting projects to provide input into the legislature, policies and initiatives such as the review of the MDDA Act, digital migration and media transformation.
Baseline	Input into the legislature and policies and publically taking the lead in developments which will impact the sector

Strategic Objective 3.2	<i>To position the MDDA as an authoritative leader in and voice on community and small commercial media and build public support for this sector by stakeholder management and brand building.</i>
Objective Statement	Increase stakeholder engagement to strengthen and facilitate the MDDA capability to achieve its mandate to promote media development and diversity through greater resource mobilisation. Partnering with relevant organisations in the media space is particularly important in this era of rapid technology advancement as partners play a crucial role in assisting the MDDA stay at the forefront of new trends in the market. Content generation, a major challenge facing the sustainability of community and small commercial, has also been highlighted by the impending digital migration and in this respect the MDDA strengthens its delivery by partnering with relevant content partners. Raise the public image of the MDDA through a co-ordinated communications, brand building and public relations.
Baseline	Strong awareness of community and small commercial media as a key element in the national and local dialogue.

9.2 Risk management

Section 38(1) of the Public Finance Management Act (PFMA), 1999 (Act 1 of 1999), as amended and Section 3.2 of the Treasury regulations requires the Agency to put a risk management system in place. The Agency has identified the following strategic risks:

Strategic Risk	Mitigation Strategy
Lack of capacity	Outsourcing of specific activities if necessary
Budget constraints	Reassessment of external production costs for activities
Stakeholder internal issues affecting joint interventions	Manage interventions to enable capacitating by MDDA if necessary
Poor information and document management	Procure an electronic information management system, and/or
Lack of project management capacity	Staff members to be sent for training in project management

10. Programme 4: Capacity Building

Purpose: One of the objectives of the agency outlined in the MDDA Act of 2002 is to “encourage the development of human resources, training and capacity building within the media industry, especially amongst historically disadvantaged groups”. In response to this, the Agency has developed capacity building programme with the aim to provide community and small commercial media people with necessary skills needed for effective performance in day to day work.

10.1 Strategic objectives

Strategic Objective	<i>To advance the community and small commercial media sector through capacity building, providing media skills and expertise to deliver professional media services to communities served.</i>
Objective Statement	<p>Partners and collaborates with various external support institutions and accredited training providers for effective implementation of the programme. The programme offers bursaries and training workshops on various media skills as per identified needs. These include, amongst others, journalism, financial management, governance and local content production. Partners potentially include the Open Society Foundation for SADC, ANN7/New Age, Sanlam for financial journalism; MICT-SETA, SAASTA, Media24 Training Academy, the IEC and SALGA.</p> <p>The Media Literacy programme provides training on the critical ways to consume and produce media information for young people. The programme teaches learners and teachers the best way to enjoy media content, and at the same time, understand, analyse and critique various levels of information that different media platforms convey. It also creates an opportunity for participants to realize and consider the importance and opportunities to produce own media product, critically contribute to debates, participate on various issues through media, thereby enhancing democracy. The MDDA partners with various institutions and service providers in order to effectively implement the programme in various areas where access to media choices is limited.</p>
Baseline	Facilitation of capacity building for the development of human resources in the sector.

10.2 Risk management

Section 38(1) of the Public Finance Management Act (PFMA), 1999 (Act 1 of 1999), as amended and Section 3.2 of the Treasury regulations requires the Agency to put a risk management system in place. The Agency has identified the following strategic risks:

Strategic Risk	Mitigation Strategy
Skills and capacity gap	Fill in critical positions Implement succession planning policy
Inadequate funding	Raise alternative funding
Fraud and corruption	Effective implementation of fraud prevention strategy and plan
Poor governance	Develop and review terms of reference for all governance committees Audit effectiveness of internal controls and systems of risk management
Poor information and document management	Procure an electronic information management system, and/or Electronic document management system

11. Programme 5: Research and Development

Purpose: The MDDA Act 14 of 2002 on Section 3 (vi) outlines the objectives of the Agency to include (amongst others) to “encourage research regarding media development and diversity”. There is also the lack of research and information specific to the sectors that inform program development and strategic focus (e.g. not much information on the number of indigenous language newspapers in SA, number of readers of such newspapers, etc.

11.1 Strategic objectives

Strategic Objective	<i>To create and enhance a body of knowledge regarding the media landscape through Research and Development.</i>
Objective Statement	Supports commissioning of research and development projects focusing on various relevant and emerging media issues to improve the delivery. The MDDA partners with research and content based institutions to identify research areas and conduct media based research. The unit interprets and coordinates research findings into practical solutions. It is through this opportunity in which the Agency assesses and considers available and possible opportunities for growth. This programme also assists the Agency to make informed decisions and improve on its services.
Baseline	Enhanced impact and service provided by the Agency as a development funding agency.

11.2. Risk management

Section 38(1) of the Public Finance Management Act (PFMA), 1999 (Act 1 of 1999), as amended and Section 3.2 of the Treasury regulations requires the Agency to put a risk management system in place. The Agency has identified the following strategic risks:

Strategic Risk	Mitigation Strategy
Skills and capacity gap	Fill in critical positions Implement succession planning policy
Inadequate funding	Raise alternative funding
Fraud and corruption	Effective implementation of fraud prevention strategy and plan
Poor information and document management	Procure an electronic information management system, and/or Electronic document management system
Lack of project management capacity	Staff members to be sent for training in project management and other related fields i.e. broadcast and print.

12 . Resource Considerations

The programmes' budgets for the period 2016/17 to 2020/21 have been projected based on the performance indicators and targets for the five year period.

In the Administration Programme, it is anticipated that skills will be retained in house and that the current approved positions and number of positions should remain stable over this period.

In the Grant and Seed Funding Programme, it is anticipated that the number of community broadcast and community and small commercial media projects requesting start-up or strengthening funding should grow, particularly with the successful digital migration programme of the Department of Communications. The major portion of the budget will be directed towards such funding. Project staff will be retained in house with minimal expenditure required to source external consultants.

The Advocacy and Lobbying Programme will see increasing partnerships being established with stakeholders in the delivery of its strategic objectives. While the number of interventions will increase, these will be carried out and funded jointly through these partnerships. Skills will be retained in house.

The number of studies and research projects funded by the Research Programme is expected to remain stable over the five-year period with the major portion of the budget directed towards consultants undertaking this research.

The Capacity Building Programme will see increasing focus on training of community media through partnerships being established with stakeholders and training providers. The major portion of the budget will be directed towards training providers for capacitating community media.
