Nelson Mandela Road (To be officially opened on 20.06.08)

## Monitoring Capacity:

The following mechanisms exist to monitor delivery and the concomitant capital expenditure

- Submission of business plan to Provincial Treasury and Office of the Premier.
- Regular site visits which sometimes includes

Provincial and National Treasuries.

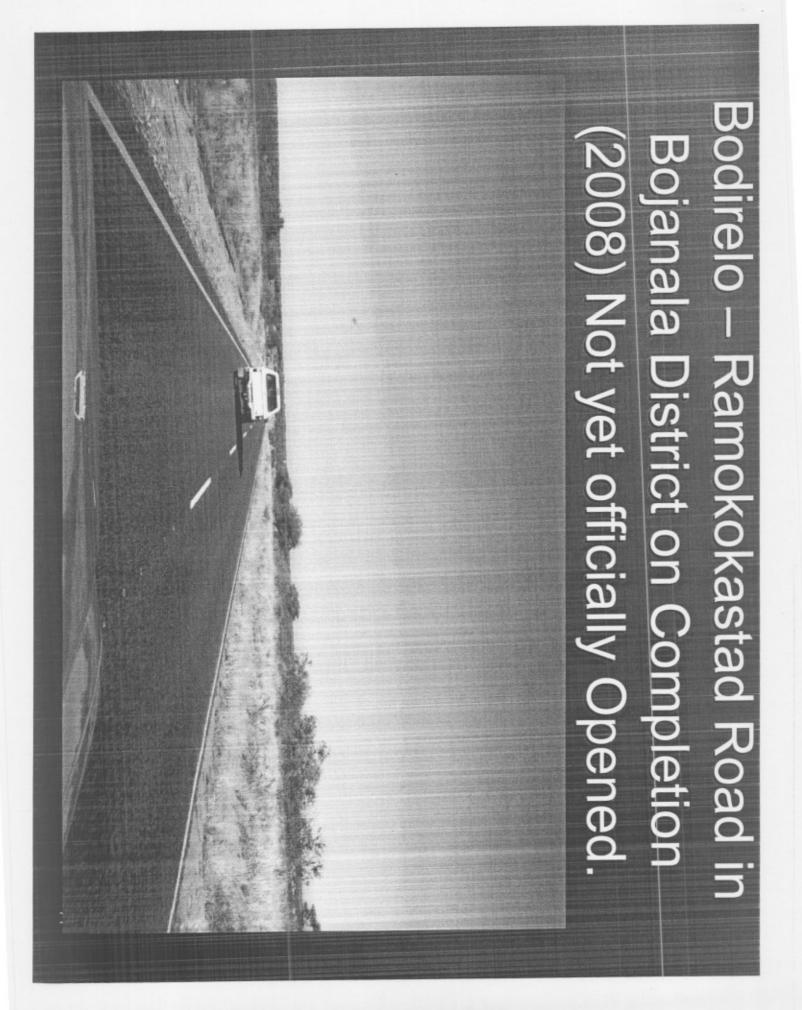

- Capex Manager's monthly meetings with Consulting Engineers and produce a detailed monthly capex report.
- Systems for reporting to Treasury: Infrastructure Reporting Model (IRM), In-Year Monitoring Report (IYM) and Promis.

## Monitoring Capacity: Continued

- Quarterly Infrastructure progress report to Premier's office
- EPWP quarterly report to Provincial: Works Public Works for National: Public
- Compilation of monthly internal variance report.
- Provincial Roads assets register

## 2007/08 Outcomes

- 90km of gravel roads was upgraded into surfaced condition.
- 33km of badly affected surfaced roads was rehabilitated.
- 31km of our road network was resealed.

## Capacity Constraints:

The following factors have a negative impact on service delivery;

- 1. Recruitment and retention of:
- Engineers and
- Technicians
- 2. Capacity of emerging contractors and consultants
- 3. Lack of road repair unit personnel, appropriate equipment for rapid response and material supply

#### Bosplaas - Babelegi Road which is failing (2008) Challenges:

### Other Challenges:

- Lack of adequate funding
- The Construction industry fees increase due to CPIX
- No inclement weather
- Agreements not honoured by other authorities

## Kraaipan Road (begging for repairs)

#### FUNDING REQUIREMENTS ANALYSIS OF BACKLOGS:

The Department has a backlog maintenance investment of R1.2 billion annually for an of R6 billion and requiring an average unbroken period of five years to clear the backlog maintenance.
