CLEAN CITIES/TOWNS  
CLEAN AUDITS 2014

OPERATION  
CLEAN AUDIT  
PROGRAMME  
(2009 - 2014)

## Problem statement

Post 1994, the government has and still puts service delivery improvement on the agenda. However, Auditor-General's reports continue to spell-out queries relating to ineffective institutions, ineffective structures (internal audit units and audit committees), poor performance or absence of systems, especially financial management and systems. This negative picture seriously affects government service delivery plans in general and corporate governance in particular.

Both provincial and local governments are faced with challenges which among others include

- Inadequate skills on planning, budgeting; public financial management, including expenditure management
- Poor interface between financial and non-financial information (in-year-monitoring and quality annual reporting)
- Inability to manage cash-flow significantly
- Inadequate skills on credit and debt management, including basic financial accounting and filing or record keeping in most instances
- Duplication of payments in some instances and amounts not accounted for (lack of financial accountability)
- Lack of systems to manage audit queries and recommendations, both internal and external auditing
- Inadequate systems with regard to corporate governance (especially, conflict of interest and accountability frameworks, and effective Integrated risk management system) within provincial departments and municipalities

Minister Sicelo Shiceka  
Department of Co-operative Governance and Traditional Affairs

## Vision:

By 2014, all the 283 municipalities and 9 provinces' departments in South Africa will have achieved clean audits on their Annual Financial Statements and maintaining systems for sustaining quality financial statements and management information.
