## INTRODUCTION

This plan is submitted in compliance with section 53 of the Public Finance Management Act. (PFMA) 1999 as amended and section 5 of the Treasury Regulations (2005) The plan is developed in the context of The IMC's mandate, as revised in 2009, as well as the national imperatives of South Africa, including the Medium Term Strategic Framework It is a 3-year rolling plan, and builds on the strategies and activities of previous cycles which overlap into this cycle. The projects and activities fit within the budget allocations provided through the MTEF process

Note: Projects are describe at a highlevel in this document. The detailed activities to achieve each strategy/project are contained in the business plan and operational plan

### **Development of the Plan**

The first draft of the 2010-13 strategic plan was prepared in April/May 2009 following a planning workshop involving IMC, GCIS, DTI, DFA (now DIRCO) and SA Tourism. The plan was reviewed by GCIS and the IMC Board in May 2009. The plan was used as the basis for the 2010-13 MTEF submission to National Treasury in July 2009. Following the final allocations received from Treasury in November 2009 (there were slight budget reductions), the plan was updated during December 2009 and January 2010 and approved by the IMC Board on 25 February 2010. It shall be tabled at the Parlimentary Portfolio Committee in March 2010, before being finally submitted to the Executive Authority by 1 April 2010.

#### Amendments to the Plan

The major amendments to the strategic plan from 2009-12 version, include the following:

- 1. The addition of an extra objective around Business Sustainability
- 2. The addition of 3 new performance measures around stakeholder satisfaction, corporate reputation, and business sustainability
- 3. The additional of a new strategy around prudent financial management and control

#### **Budget Allocations**

It is to be noted that the annual budget reduces by 21% from 2010/11 to 2011/12, due to additional allocations received in 2010/11 for the FIFA World Cup. From 2011/12 to 2012/12 the annual budget increase is 6%, which is again in line with normal inflationary increases.

End.

Note: Please see the Appendix for detailed explanation of each of these performance measures.

The definition of target markets is a work in progress that requires further and ongoing collaboration with key stakeholders. We are aiming for a segmentation model (to be developed in 2010/11) which will assist in bringing together a view of the world that will inform resource allocations and messaging in different markets. Detailed segmentation will allow markets to be differentiated into various categories, such as Watch; Pioneer; Growth/Invest; Maintain/Defend.

The categorisation is driven by imperatives such as investment, exports, tourism, diplomacy, etc. Certain markets also become relevant for fixed periods of time, such as football nations around the time of the World Cup.

From inputs given by the IMC key stakeholders, the core target markets for South Africa are the following:

#### COUNTRIES IMPORTANT FOR SOUTH AFRICA

#### 2010 FIFA World Cup Specific (and those in which 2010 FIFA Roadshows are taking place):

o Asia:	Australia, New Zealand		
o Europe:	Italy, Portugal, Spain, France, Germany, Netherlands,	Switzerland, England	
o Middle East:	-		
o Americas:	Brazil, Argentina, Paraguay, Mexico. USA

o Americas:	Brazil; Argentina, Chile, USA	US (Canada)	South - South
o Africa:	Egypt, Nigeria, Kenya, DRC, Tanzania, Zambia, Ango	la Nigeria, Kenya, Angola, Tanzania	Pan-African focus

#### IMC Specific Target Markets (preliminary segementation)

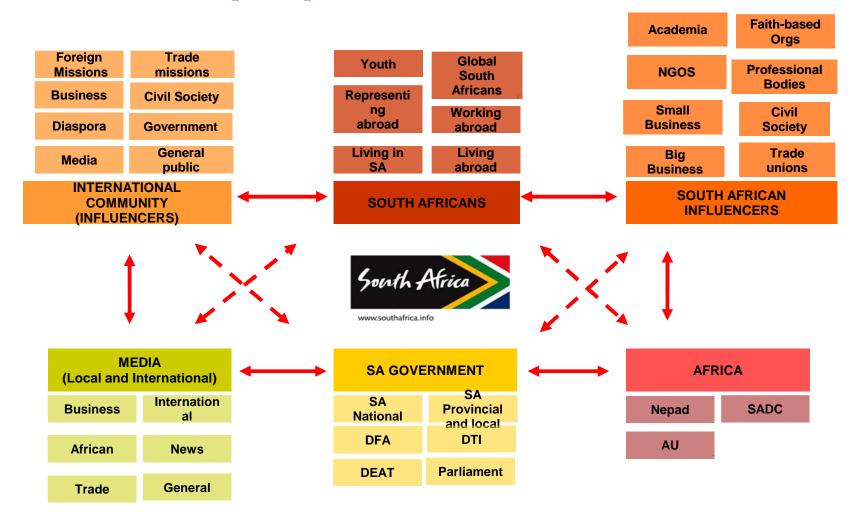

Countries in which the IMC will activate directly and/or with and through stakeholders

It is planned to develop a detailed segmentation model in 2010, working with stakeholders, to assist with further refining key markets An allocation for this is contained in the 2010/11 budget

# **EXPLANATION OF PERFORMANCE MEASURES**

## 1. <u>REPUTATION INDEX</u>

Media Tenor's Global Reputation Score represents an in-depth analysis of media coverage in 42 countries, over 200 print and broadcast media and their reporting on South Africa. Every report with significant relevance to South Africa (editorial coverage in news and business sections featuring the government, politics, nature, business, society and non-results sport, amongst others) is assessed according to the four pillars of a country image (see Anholt and others): Nature/Geography/Tourism; History/Culture/People; Business/Economy; Politics/Government.

Evaluated are both the context of the coverage as well as any particular explicit comments made by sources. The score, on a scale of 1 to 100 indicates the reputation of a country, as expressed by the media. The report is based only on the evaluation of media coverage, no stakeholder surveys. Analysis is conducted through human, trained analysts following Media Tenor's methodology of 15 years.

### What is a 'good score' and what is a 'bad score'?

To establish this, a country has to be compared to other countries. The challenge is that a country's perception depends on the volume of coverage it receives – as this indicates the awareness created. This can change over time, as issues and positions are shifting. Media Tenor, on the basis of analysing coverage on all countries in 20 international core media, has established the following scale for 2009 (on the basis of 2008 data): 0-30: Very Poor / 31-40: Poor / 40-45: Mediocre / 45-50 Average / 50-60: Good / 60-65: Very Good / >60 Exceptional

### 2. ANHOLT GFK ROPER NATION BRAND INDEX

The Anholt-GfK Roper Nation Brands Index measures the power and quality of each country's 'brand image' by combining the following six dimensions:

Exports – Determines the public's image of products and services from each country and the extent to which consumers proactively seek or avoid products from each country-of-origin. Governance – Measures public opinion regarding the level of national government competency and fairness and describes individuals' beliefs about each country's government, as well as its perceived commitment to global issues such as democracy, justice, poverty and the environment.

Culture and Heritage – Reveals global perceptions of each nation's heritage and appreciation for its contemporary culture, including film, music, art, sport and literature.

People – Measures the population's reputation for competence, education, openness and friendliness and other qualities, as well as perceived levels of potential hostility and discrimination.

Tourism - Captures the level of interest in visiting a country and the draw of natural and man-made tourist attractions.

Investment and Immigration – Determines the power to attract people to live, work or study in each country and reveals how people perceive a country's economic and social situation.

The Nation brand Index gauges the perceptions of citizens in developed and developing countries that play important and diverse roles in shaping global foreign policy as well as the flow of business, cultural, and tourism activities around the world. Interviews are conducted among citizens of 20 countries around the world. In each survey country, about 1,000 online interviews are conducted with people age 18+. Each of the 50 nations is

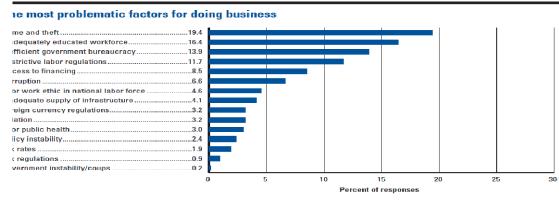

### 3. WEF GOLBAL COMPETITIVENESS INDEX

The Global Competitiveness Report's competitiveness ranking is based on the Global Competitiveness Index (GCI), developed for the World Economic Forum by Sala-i-Martin and introduced in 2004. The GCI is based on 12 pillars of competitiveness, providing a comprehensive picture of the competitiveness landscape in countries around the world at all stages of development. The pillars include Institutions, Infrastructure, Macroeconomic Stability, Health and Primary Education, Higher Education and Training, Goods Market Efficiency, Labour Market Efficiency, Financial Market Sophistication, Technological Readiness, Market Size, Business Sophistication,

## Appendix

The rankings are calculated from both publicly available data and the Executive Opinion Survey, a comprehensive annual survey conducted by the World Economic Forum together with its network of Partner Institutes (leading research institutes and business organizations) in the countries covered by the Report. This year, over 13,000 business leaders were polled in 133 economies. The survey is designed to capture a broad range of factors affecting an economy's business climate. The Report also includes comprehensive listings of the main strengths and weaknesses of countries, making it possible to identify key priorities for policy reform.

#### 4 STAKEHOLDER SATISFACTION INDEX

#### the level of satisfaction

obtained each year. This process will be undertaken over the first quarter of 2010/11.

#### 5 CUTTING EDGE ORGANISATION

The IMC is currently investigating an appropriate measure to determine it's success as an organisation against other,. Similar organisations. It is working with Anholt GfK Roper to develop a *Corporate Reputation Scorecard* for nation branding organisations, to look at:

- A current assessment of the IMC's reputation vs. its 'competition', as well as how its reputational strengths and weaknesses compare with leading organisations globally
- Consistent measurement across constituencies based on key drivers of reputation
- Market-based guidance for communications planning to set goals, identify and prioritise targets, formulate messages to influence positive outcomes
- Benchmarks against which progress can be measured over time

#### 6 SUSTAINABILITY INDEX / TRIPLE BOTTOM LINE

A process is underway to find a relevant sustainability indicator that is suitable for the IMC and will be implemented as soon as possible.
