**Subject:** Transport laws repeal bill(b19-2010)

The bill should stop the construction of railway lines that crosses right on the road, railway line must be built to cross the road over the bridge or under the bridge, this will help in prevention of unnecessary accidents that occurs when a train collides with a vehicle, this usually happens because some of those intersections have no traffic lights, the existing intersections of this type must be reconstructed so that either the road or the railway be built over or under the bridge. Regards mr Vusumuzi Emmanuel  
Gcuma from Harding, 0720682854 i would have like to make a verbal presentation, but i cant afford to come down to Cape Town
