Rationale for the Development of a new system for lodging and administration of prospecting and mining rights

1. This is part of the implementation of the MIDGETT work aimed at streamlining administrative processes – to improve efficiencies in the (administrative) work of the Department
2. The implementation of the recommendations of DG visit (in January/ February 2010) to all Regional offices to reduce timeframes in processing various categories of Rights and permits.
3. To improve the competitiveness of South African mining industry
4. To protect integrity of the mining regulatory framework, by infusing transparency (in decision making), and accountability into the system - **Organisational performance**
