hi valerie

that would be beneficial to those that were the victims of motor vehicle accidents. but the question that we need to ask ourselves is what does the sa law say when amending the law. do we amend it retrospectively or not? if we cannot amend it retrospectively then we need not to consider the victims prior 1 august 2008. my fear is that if we amend it retrospectively that would open a floodgate of victims of other crimes who would want their judgements where compensation was granted to be reviewed with the aim of improving their lives
