#### FOREWORD BY THE MINISTER OF POLICE

The ruling-party led government have placed the issue of crime high on the agenda over the five-year period of this current administration. The task that confronted us then was to act urgently to galvanize the Service into action. However, without high levels of discipline, command and control this would not be possible. That is why three years ago we began paying attention to this issue, to ensure clear lines of command and control and instil a sense of discipline amongst members. At the centre of this perspective, was the need to strengthen the foundation for community-orientated policing, improved accessibility and accountability.

Minister of Police EN Mthethwa

We are in the last lap of the review process of the White Paper on Safety and Security which was adopted in 1998. Since 1998, there have been changes in the policing environment that need to be incorporated and reflected in our policy and approaches. Part of the review process will take into account the issue of police demarcations. The policy relating to the new demarcations is being reviewed, as part of the broader review of the White Paper.

We have now developed and are putting into implementation the Public Order Policing Policy. Our approach was necessitated by the need we identified regarding Public Order Policing. In the South African context, any operational policing strategy must take into account the operational environment and should be based upon sound democratic principles, which do not infringe on the human rights of citizens, whilst simultaneously protecting innocent citizens against any threat which might be posed by the public protest. There is also a need to implement approaches that would in the immediate term have an impact on crime levels, which would also lead to communities having greater confidence in the Police.

We have also begun with the legislative review of the private security industry to ensure that it is properly regulated and managed. Amongst the current challenges facing this industry, which poses difficulties in our crime-fighting endeavours, is the prevalence of un-accounted for firearms and ammunition which are in the hands of some of these mushrooming private security companies. The private security industry is growing at a fast pace and we must also align our strategies to deliver effective regulation. Currently in South Africa, we have around 10 000 active private security companies, which Government regulates through the Private Security Industry Regulatory Authority, with over 1,9 million people on their database and over 400 000 active security officers to regulate. It is widely acknowledged that crime prevention is not simply the business of Government, but that the role of civil society is equally important. The private security industry must form part of these collective efforts. South Africa is fortunate to have a well developed, vibrant, and organised civil society participating in the safety and security sector.

We have also begun with implementation of the Second-Hand Goods Act, 2009 (Act No. 6 of 2009), which came into effect on 1 May 2012. In essence, the Act stipulates that any person who buys a stolen good is as guilty as the person who stole the goods; and harsher sentences will apply to both the buyer and the suspect. If an unscrupulous dealer is found guilty, a court may impose a prison sentence of up to 10 years.

In recent years, we began stressing the smart-policing approach. We emphasised that an approach of working in silos must become a thing of the past as we are now creating synergies and must ensure that information is optimally utilised. These systems are now beginning to yield considerable successes in the fight against crime, both provincially and nationally. We can also attribute our successes to the aspect of smart policing, which is anchored around utilising information, communication and technology to fight crime. Through command centres at various provinces, we are now able to not only share information about some of the most wanted suspects, but we can also improve our effectiveness.

We must as a matter of urgency, review and begin to improve the quality of services offered at local police stations. We have to focus on some of the fundamental questions such as: are we making sure our Community Service Centres are functioning properly because they are often the communities' first experience of how the Police perform? Are we able to ensure our police officers are able to take statements properly? How do we respond to emergency calls and

complaints? Are we making effective use of our resources at a local level and are we properly monitoring them? Is the station ensuring that we are able to manage crucial areas such as the SAPS 13 stores and firearm licenses? Do stations comply with Standing Orders and National Instructions or do they treat these as suggestions?

We also need to put in place implementation, monitoring and evaluation mechanisms around the management of firearms within SAPS. The number of firearms lost by the Service is of concern and the proper control and management of firearms is crucial if we are to take forward Government's priority of reducing the availability of firearms. Stations need to take seriously the issue of police officers who are negligent with their firearms and support all national initiatives to reduce firearm losses in the SAPS.

As we embark on the transformation of the SAPS, our approach to transformation must also speak about the type of police service we want to see. We have begun to inculcate a new type of police officer, an officer that inspires confidence. To create this cadre of cop, what is required is the continuous de-education of unwanted old practices and re-education of the kind of cop we have. The Police are, and always must be subject to the will of the people they serve. It should therefore not be the opposite where people have to beg and plead the Police to serve them. The response time to victims of crime must be improved, the courtesy and treatment we give to victims must not be seen as a favour. To succeed in this challenging mission of crime reduction, we need an officer who respects and upholds the Constitution. We need a police officer who does not tolerate disloyalty and ill-discipline but who enforces the law without fear or favour. We need a police officer who recognises that we are a developmental state and embraces effective service delivery within the SAPS and a police officer that demonstrates through his/her deeds a firm commitment to ensuring Government's priorities are realised. We have to ensure that the culture of human rights and the importance of upholding the law at all times becomes a central part of the training of the Police. The changes form part of our efforts to strengthen oversight over the Police through legislative changes regarding the Independent Police Investigative Directorate, the Civilian Secretariat for Police, as well as steps to the review the SAPS Act in its entirety.

The upsurge in the killing of police officers stands in direct opposition of our attainment of a safe and secure nation. It poses a direct threat to our hard-won Constitutional democracy. We therefore challenge all law-abiding citizens of our land, to take a stance against police killings, to protect our men and women in blue against vicious attacks and killings.

Part of our community-centred philosophy is around galvanizing active Community Policing Forums (CPFs). CPFs are elected forums at station level that represent the community in their engagement with the SAPS. A key aspect of the CPF system is that the SAPS and the CPF have different roles in this partnership, but work towards the same objective.

However, it is essential that we also emphasize the issue of fraud, corruption and criminality within the SAPS. Such actions by police officers not only divert resources away from the fight against crime but also tarnish the image of the Department. While it is important to recognize that the majority of police officers are dedicated officials, we need to deal with officers who are abusing their positions. We need to constantly emphasize that police officers must uphold the law and be faithful to the Constitution at all material times. During the next financial year, we have instructed that SAPS effectively implement both internal and external measures available to them to deal with corruption, fraud and criminality.

The struggle to reclaim our streets from criminals, who seek to instill fear and compromise the safety of citizens, must be intensified. Accordingly, the struggle for a reduction in crime in our country has also become a struggle for the restoration of the dignity of all citizenry, in their homes, in the workplaces and in their recreational areas. In doing this, there are no quick fixes. Like the road to social progress, it is always under construction. This would mean conviction to our cause of building a developmental state, it would mean selfless sacrifice to ensure that through our contribution amongst others, we propel our nation to high places of social progress.

In the final analysis, this struggle must become the epitome of the programme to ensure that all people in South Africa are and feel safe.

E.N. Mthethwa, MP Minister of Police

### Introduction by the National Commissioner of the South African Police Service

It is my humble honour and privilege as the National Commissioner of the South African Police Service (SAPS) to introduce the Annual Performance Plan (APP) that will guide policing operations for the duration of the 2013/14 financial year. The underlying principles and values that are drawn from the Constitution will continue to govern the implementation of the SAPS mandate through this plan. The planning process that culminated in this document has taken into consideration, among others, the priorities espoused in the 2013 State of the Nation Address; the National Development Plan; the Ministerial priorities; and key government strategic priorities and policy imperatives.

National Commissioner General MV Phivega

Notwithstanding the varying intricacies that the organization encounters in the operational environment, of keen interest is putting more emphasis on the critical role that the SAPS occupies as the entry point in the Criminal Justice System (CJS) value chain. The main thrust will be on value derivation (qualitative offerings) from SAPS by other role-players in the CJS towards the realization of the Justice, Crime Prevention and Security (JCPS) Cluster's strategic objective outcome: All people in South Africa are and feel safe.

As part of the operational challenges that the SAPS will continue to encounter in the implementation environment are public order incidents that accommodate disconcerting violent demonstrations, particularly those associated with unprotected and copy cat strikes. Over the past three years this growing pattern is an emerging phenomenon that requires specific attention as it impacts heavily on the resources required for normal policing to stabilize these situations and the rest of the CJS is also affected. The introduction of the Public Order Policing Policy by the Minister of Police, the Honourable Nathi Mthethwa, which provides direction for a human rights-based approach to dealing with public disorder, and the introduction of the Dangerous Weapons Bill will be of aid in this regard. The call by His Excellency, President Jacob Zuma, for the JCPS Cluster to put measures in place to ensure that any incidents of violent protest are stabilised, investigated and the perpetrators prosecuted is being implemented through the configuration of a dedicated capacity from the SAPS.

The emphasis on the combating of gender-based violence will be further escalated by the Family, Child Protection and Sexual Offences environment, as directed by the President, through prompt detection and investigations of these offences. This will be complemented by the enforcement of the newly introduced Protection from Harassment and the Combating of Trafficking in Persons Bills. The SAPS will continue to participate in crime prevention initiatives or structures such as the National Council on Gender-based Violence as the police alone will not uproot the scourge of sexual offences. Continuous efforts will be implemented in 2013/14 intended to deal a heavy blow on illegal firearms, drugs and substance abuse which manifest as some of the causative factors for crime. These include conducting police operations inland and at all ports of entry, intended to confiscate illegal firearms, drug and liquor confiscations, dismantling clandestine drug laboratories, and effecting quality arrests and convictions in partnership with the rest of the JCPS Cluster. One of the key role-players in this regard is the detective environment that continues to be capacitated in order to improve on the detection and trial-ready rates.

As part of implementing the National Development Plan (NDP), the SAPS will espouse an integrated approach to issues of safety and security within the JCPS Cluster. The partnership relationship that the SAPS has with the Community Police Forums will serve as the best vehicle for enhancing sustainable community-police relations and mobilization. In the support environment, as a means of ensuring professionalism in the SAPS, a multiple-entry recruitment drive, skills development (growing our own timber) and career pathing practices will be applied to emphasise operation excellence over quantity recruitment. This will be coupled with the implementation of a holistic transformation agenda that is professed by the Minister and SAPS leadership, and support to government initiatives on equity in decision-making structures. Fundamental to the transformation of service delivery is the inculcating of organisational values and the Code of Conduct of the organization through the implementation of a focused programme. Furthermore, the SAPS will continue to demonstrate zero tolerance on corruption and upholding high ethical standards by holding SAPS members accountable for misconduct, corruption and fraud. As part of its mandate, the organization will continue to investigate cases of corruption in support of the JCPS Cluster outputs and beyond.

In line with the Criminal Justice Review on modernisation, the SAPS will focus on the Ministerial imperative for the

development and harmonization of SAPS systems, coupled with the valuable interface within the broader CJS.

Frontline service delivery continues to be a government imperative for all departments. The SAPS will implement a revised Service Delivery Improvement Programme that is aimed at empowering the coalface of service delivery.

Needless to say, the implementation of key legislation such as, inter alia Domestic Violence Act, the Second-Hand Goods Act and the Child Justice Act will be done beyond simple compliance and in accordance with allocated resource levels.

Notably, the priority areas outlined in this plan rely on a concerted effort by each member of the organisation, irrespective of their functional level. The SAPS, as part of the integrated approach to safety and security in the Cluster and in government, will not be complacent until it has made an impact on the feelings of safety by all in South Africa. Therefore, I call upon every member of the SAPS to focus their actions towards implementing this Plan, guided by numerous capabilities of our Management who will lead and direct members in their efforts to give full effect to this APP for 2013/14.

.

National Commissioner of the South African Police Service General MV Phiyega

#### **OFFICIAL SIGN-OFF**

It is hereby certified that this Annual Performance Plan:

- Was developed by the management of the South African Police Service under the guidance of the Minister of Police
- Takes into account all the relevant policies, legislation and other mandates for which the South African Police Service is responsible
- Accurately reflects the strategic priorities, objectives and performance standards which the South African Police Service will endeavour to achieve during the 2013/14 financial year

Maj. General M Menziwa

### **PART A:** STRATEGIC OVERVIEW FOR THE ANNUAL PERFORMANCE PLAN 2013/14

#### 1. SITUATIONAL ANALYSIS

The context within which the SAPS operates is dynamic and is characterised as being a constantly changing combination of circumstances and influences that impact on the manner in which policing is conducted. The current situational analysis must be seen as a vital tool in identifying those issues that require proper planning to address current and emerging challenges for 2013/14. The situational analysis invloved an in-depth study of salient issues within the political, economical, social, technological, legislative, environmental and geographical domains to ensure the intergration of these issues within the annual planning process of the Department.

#### 1.1 Performance Delivery Environment

The current policing environment is driven by various external factors including issues such as national security threats and serious crime levels, which have intensified over time and which require the Police to deal with these issues in a smarter, more coordinated manner.

Public violence is an emerging issue that requires specific attention. **Levels of public violence** have increased since 2009, as indicated by data gathered by researchers, which revealed that there was a 289% increase in the number of violent protests against municipalities, from 27 such protests in 2008 to 113 incidents in 2011. According to the SAPS Annual Report 2011/12, the Police attended to 1 194 incidents of public violence as opposed to 971 in 2010/11. The increasing number of violent protests results in the Police having to redirect resources normally deployed to combat, prevent and investigate crime. Researchers argue that the Police have a pivotal role to play in preventing protests that turn violent by means of timeous interventions in order to ensure continuous engagements with communities, efficient and effective crime intelligence systems, the speedy mobilisation of public order policing units, and effective support to the first responders to public disorder. In order to give effect to this, the Minister of Police has introduced a new Public Order Policing Policy which provides direction for a human rights-based approach to dealing with public disorder, and which will be supported by the introduction of the Dangerous Weapons Bill. In addition, in the State of the Nation Address on 14 February 2013, his Excellency, President Jacob Zuma, directed the JCPS Cluster to put measures in place, to ensure that any incidents of violent protest are acted upon, investigated and the perpetrators prosecuted. The Department will ensure that the dedicated capacity that exists to manage public disorder integrates with other JCPS Cluster Departments to ensure that the President's requirements in this regard are achieved.

The reduction in serious crime, in particular contact crime and trio crime is one of the key outputs within the JCPS Cluster Delivery Agreement. These crimes invoke negative perceptions among South Africans, investors and potential tourists of the general level of safety and security in the country due to the violence that usually accompanies these crimes. A comparison of the figures recorded during the period 2004/05 to 2008/09 (5 years) with those recorded during the period 2009/10 to 2011/12 (3 years), reveals that during the preceding period, the average annual decrease of serious crime stood at 5,2 % as total levels decreased by 25,8% over a period of 5 years and 2,7% in the second period as total levels of crime decreased by 8,09% over the 3 year period. The average annual decrease in contact crime and trio crime for the preceding 5 year period stood at 5,3% and 13,6% respectively as they decreased by 26,4% and 68% over the 5 year period. This longitudinal perspective on crime statistics indicates on the one hand that great strides have been made in reducing levels of serious crime, and on the other hand that a concerted effort is needed to further reduce these crimes. The targets set in the JCPS Delivery Agreement indicate that serious crime must be reduced by 4-7%, contact crime by 34% and trio crime by 31% by 2014.

The emphasis on the combating of **gender-based violence** will be escalated further during 2013/14, as directed by the President in the State of the Nation Address on 14 February 2013. This focus will include the re-introduction of Sexual Offences Courts to ensure the swift investigation of these offences, and the newly introduced Protection from Harassment and the Combating of Trafficking in Persons Bills, which will be utilised by the Police to arrest, investigate and prosecute perpetrators of these crimes. The Department will also participate in the National Council on Gender-based Violence to ensure a coordinated approach across all relevant departments and non-governmental

organisations in dealing with these crimes.

With regard to the **Detective Service**, the detection rate for contact crime increased by 3,53% from 53,46% to 56,99% in 2010/11 and increased further by 3,67% to 60,66% in 2011/12. The detection rate for trio crimes increased by 1,25% from 14,77% to 16,02% in 2010/11 and increased by another 4,96% to 20,98% in 2011/12. When comparing the first six months of 2012/13 with the corresponding period in 2011/12, the detection rate for contact crime increased by 2,52% from 59,68% to 62,20% and the trio crime detection rate increased by 2,95% from 19,51% to 22,46%. These increases are attributed to the special emphasis that was placed on the expansion of the human resource capacity of detectives, which increased by 16,80% from 20 291 in 2009/10 to 23 701 in 2011/12 as well as the focused, specialised training of these members.

As indicated in the SAPS APP 2012/13, illegal **drug usage and the abuse of alcohol** are some of the main contributors to the perpetration of violent crime. Whilst from an operational perspective much effort has been put into the confiscation of illegal drugs, the dismantling of clandestine drug laboratories, the confiscation of liquor from illegally operating premises and the arrest of drug syndicates, indications are that the volume and use of illegal drugs is still escalating. It therefore becomes important to review current drug policies and practices to possibly view illegal drugs as having multi-dimensional social implications, with practices embedded within broader social contexts. It will be crucial to ensure greater coordination of efforts between JCPS Cluster departments to combat drug trafficking, manufacture and distribution.

**Cyber crime** is a growing international phenomenon which poses significant threats to national and financial security and the integrity of data and information globally. The absence of a clear policy remains a key risk factor as well as a lack of institutionalised mechanisms to facilitate a coordinated approach to combat cyber crime. Cyber security has been prioritised by Government within Output 7: "Secure Cyber Space" of the JCPS Delivery Agreement, with a view to the establishing of a coherent and integrated cyber security approach. The Cluster will invest in research in order to understand the nature of cyber crime and its impact on the economic and technological development of the country. In line with this, a comprehensive cyber threat assessment will be done in order to determine cyber security baselines as well as the skills development requirements of cyber crime investigators.

The NDP proposed that safety and security should be analysed holistically and that an integrated approach be adopted whereby crime prevention and social development are linked through coordinated efforts at all levels, especially at local government level, by taking the root causes of crime into consideration. Sustainable **community safety** requires high levels of community mobilisation and involvement, supported by a thorough understanding of the nature of crime impacting on individual communities through intelligence-led policing. This approach requires other departments, local government and civil society to participate in crime combating initiatives. The underlying assumption is that community involvement leads to greater community responsibility for safety and social cohesion. Existing structures at local level such as the CPFs, Sector Policing Forums, Neighbourhood Watches and Community Safety Volunteer Programmes will be utilised to enhance safety and community involvement.

#### 1.2 Organisational Environment

Investment in **Human Capital** is one of the key organisational priorities of the Department. Considerable emphasis is placed on the skills development of all human resources, guided by the Department's constitutional remit as per Section 205(3) of the Constitution and the strategic objectives and priorities, but specifically in the following areas:

- The effective implementation of key legislation such as, inter alia, the Domestic Violence Act 1998, (Act No. 116 of 1998), the Second Hand Goods Act 2009, (Act No. 6 of 2009) and the Child Justice Act 2008; (Act No. 75 of 2008)
- The detective environment, including the DPCI in order to increase the detection, trial-ready and conviction rates;
- The development of the crime intelligence capacity to support proactive and reactive intelligence requirements; and
- Public Order Policing, reinforcing a human-rights approach to managing public disorder.

The Department's recruitment, skills development and career pathing practices will be reviewed within the context of a more holistic, transformation-orientated "recruitment to retirement" approach to managing human resources, including the continuous assessment of these processes to ensure that they are in line with international norms and standards. The effective transformation of the SAPS, as outlined by the Minister of Police and the NDP, requires that the Department provides the kind of police officer that understands and supports the imperatives of Government and provides a professional policing service to the people in this country. Transformation talks to the "cadre of cop" that the citizens and Government want to see on the streets of this country and is supported by the premise that SAPS members should be "upholders of the law" and not consider themselves as being "the law" by ensuring that the principles contained in the Bill of Rights and Section 195 of the Constitution, guide the practice and behaviour of all police officers.

Transformation also requires the establishing of a community-orientated philosophy and approach to policing that will include the inculcating of the organisational values and the Code of Conduct of the organisation. The SAPS will implement a Service Delivery Improvement Programme to focus the on the improvement of various aspects of frontline service at all stations, in support of the Presidency's initiative in this regard.

The Minister also identified improved **command and control** as being one of the key requirements for the effective management of personnel and resources, specifically at station level. The accountability of senior members in terms of the conduct and discipline of members, the implementation of policies and instructions and the effective and efficient utilisation of resources needs to be improved. To address this, the SAPS has adopted a combined approach to quality assurance that will integrate the efforts of the various internal and external assurance providers towards the improving of the control environment. The combined approach to assurance will also contribute to the addressing of the lack of **proper accountability and transparency** on performance information relating to predetermined objectives by managers. Repeat findings by the Auditor-General emphasize a lack of proper control procedures and discrepancies surrounding the validity, reliability and completeness of performance information. In order to address these findings, detailed action plans have been compiled and every effort will be made to ensure corrective measures are put in place to ensure compliance with accounting principles.

Although there has been decrease in the number of **members murdered on and off duty**, from 93 to 81, comparing 2010/11 with 2011/12, this figure remains unacceptably high. This is an indication that some elements of society have a total disrespect of law enforcement and have no compunction in taking the life of a SAPS member, thus contributing towards feelings of insecurity amongst communities as well as having a negative impact on the morale of SAPS members. Subsequent to a summit on police killings in June 2011, the Minister of Police announced a Ten Point Implementation Plan to address this issue. A multi-disciplinary Police Safety Committee is currently overseeing the implementation of the Ten Point Plan.

The **number of escapes from police custody** is a matter of grave concern for the SAPS. The high numbers of escapes from custody are primarily due to policies and procedures not being adhered to and/or inadequate infrastructure at various police station holding facilities. Specific measures are currently being implemented to address vulnerable areas such as the upgrading of police detention facilities; the training of members in the management of detainees and the conducting of targeted inspections to monitor the implementation of preventive measures.

Renewed efforts have to be made to improve the development and maintenance of SAPS infrastructure with the focus being on the improving of accessibility to SAPS **service points** and the services provided to communities that do not have adequate access. The location of service points must be informed by a scientifically verifiable process that takes the geographic location and dispersion of communities into account and includes all relevant socio-political factors. The location of SAPS service points must be linked to key initiatives such as the Government's Strategic Infrastructure Projects, the Rural Safety Strategy, the establishment of specialised units such as Stock Theft and FCS Units and inputs derived from structured engagements with affected communities. Particular emphasis will be placed on establishing police stations and access points within the rural environment to correct previous imbalances.

Science and technology can be leveraged to solve some of the biggest challenges in the CJS. The institutional arrangements to manage the **technological environment** need to be better structured to enhance the efficiency and effectiveness of the Police and the CJS at large. To this end, the 2007 Review of the South African Criminal Justice System recommended a seven-point plan, which was adopted by Cabinet. The Plan advocates an integrated, holistic approach with regard to all CJS systems and equipment driven by a new, coordinated management structure at all levels. Although the Office for Criminal Justice System Reform began implementing the Plan, the NDP advocates that specific activities and programmes should be enhanced through inter-departmental coordination, monitoring and reporting. The Minister of Police has emphasised the need for the synchronisation of the SAPS's Information and

Communication Technology Systems and the interface of these systems within the broader CJS, which includes key initiatives such as the E-docket, the AFIS and the CMIS. The interfacing of these and other associated systems is at an advanced stage of implementation and will be expediting during 2013/14.

**Corruption and fraud** undermine the rule of law and hinder the State's ability to effect development and socio-economic transformation. The performance of state systems of accountability has been uneven, enabling corruption to thrive. Although the entire country is harmed by corruption, the costs fall most heavily on the poor as corruption and fraud undermine the quality and accessibility of public services. Overcoming the twin challenges of corruption and lack of accountability in our society requires a resilient system consisting of political will, sound institutions, a solid legal foundation and active citizenry that is empowered to hold public officials accountable. The SAPS supports Government's 2030 vision of zero tolerance for corruption, in which SAPS members are held to account and in which leaders hold themselves to high ethical standards and act with integrity. SAPS, as an integral role-player within the JCPS Cluster has the resources and powers to investigate corruption and these investigations will be expedited during 2013/14.

The escalation of the implementation of the Anti-corruption Strategy to ensure its continued relevance is an ongoing process that is driven by Output 3 within Outcome 3 of the JCPS Cluster Delivery Agreement. The Cluster has embarked on a process of ensuring that all departments within the Cluster have effective anti-corruption capacities to ensure the efficacy of these departments in the fight against corruption, both within the Cluster and country as a whole. This process will culminate in the developing of an Anti-corruption Framework specifically for the Cluster that will guide and coordinate the individual corruption combating capacities within all JCPS Cluster departments.

The recent promulgation of the Independent Police Investigative Directorate Act 2011, Act No. 1 of 2011, has further strengthened the investigation of acts of corruption perpetrated by SAPS members. The Minister of Police has prioritised the further capacitating of the Independent Police Investigative Directorate (IPID) over the medium-term as an integral part of the overall strengthening of oversight of the SAPS. The SAPS will work towards enhancing its relationship with IPID to ensure the effective and efficient investigation of cases against SAPS members.

The Minister of Police has also provided strategic direction that is being addressed by the SAPS over the medium-term. This direction addresses fundamental behavioural issues that impact on the involvement of SAPS members in corruption and fraud. It also includes the requirement that the SAPS addresses the transformation of its service delivery and the improving of levels of professionalism, command, and control, all of which are included within the Prevention Pillar of the Anti-corruption Strategy.

#### 2. Revisions to Legislative and Other Mandates

#### **POLICY**

During the 2013/14 financial year, two crucial policy development processes will be undertaken arising out of the review of the 1998 White Paper on Safety and Security. The review process has been premised on a number of factors, which include re-examining pertinent safety, security and policy issues pertaining to policing and highlighting gaps in the implementation of multi-agency approaches while also identifying additional measures for building a professional and responsive police service. Government-wide consultations on the draft White Paper on Safety and Security of 2012 identified the need for a more coherent policy framework that will guide the development of policing strategies and operations over the short to medium-term. A proposal was put forward to split the draft White Paper into one on Police and one on Safety and Security. To this end, the Green Paper on Police aims to build on the gains made since 1994 while working towards entrenching the values of professionalism, accountability and transparency.

Importantly, the development of two stand-alone Green Papers will not detract from nor minimise the importance of dealing with safety and security holistically. Furthermore, this does not abdicate the Police of any responsibility when dealing with cross-cutting issues. Essentially, the development of targeted strategies emanating from the two pieces of legislation must continue to take cognisance of the interrelated, causal relationship between the broad ranges of factors (e.g. social and environmental), that impact on safety and security.

#### **L**EGISLATION

- Criminal Procedure (Forensic) Amendment Bill. This Bill will enable the Police to develop and maintain a DNA database of convicted criminals for reference in criminal cases.
- The South African Police Service Amendment Bill: This will entail an entire review of the current South African Police Service Act in order to align the current Act with the Constitution and with policing policies developed since 1995.

# 3. OVERVIEW OF THE 2013/14 BUDGET AND MTEF ESTIMATES

## 3.1. EXPENDITURE ESTIMATES

The expenditure trends in the programme's budget and economic classification over the seven-year period are the following:

|                                  | Ar         | Audited outcome |            | Adjusted appropriation | Revised estimate | Average<br>growth rate<br>(%) | Expenditure/<br>total:<br>Average (%) | Medium-te  | Medium-term expenditure estimate | estimate   | Average<br>growth rate<br>(%) | Expenditure/<br>total:<br>Average (%) |
|----------------------------------|------------|-----------------|------------|------------------------|------------------|-------------------------------|---------------------------------------|------------|----------------------------------|------------|-------------------------------|---------------------------------------|

#### 3.2 EXPENDITURE TRENDS AND STRATEGIC OUTCOME ORIENTED GOALS

The spending focus over the medium term will be on maintaining overall capacity in terms of personnel numbers, physical resources, capital infrastructure, skills development, and technological enhancements with regard to the information and telecommunications environments in order to support the reduction of serious crime by 4 to 7% per year over the medium term. The largest driver of spending over this period is the *Visible Policing* programme, which accounts for 46.6 % of the Department's budget owing to the labour intensive nature of policing.

A significant increase is evident in expenditure in the Detective Service and Crime Intelligence programmes between 2009/10 and 2012/13. These increases are due to additional allocations for: investing in capital infrastructure and technological enhancements, especially in the forensic science and investigative functions; additional capacity for the DPCI; upgrading the IT network; and reviewing and modernising the CJS to create an integrated criminal justice environment. Over the same period, expenditure on buildings and fixed structures decreased due to the Department of Public Works rescheduling the projects to 2013/14, which explains the growth projected over the medium term.

The 2013 Budget sets out additional allocations of R1.3 billion in 2013/14, R1.5 billion in 2014/15 and R2.2 billion in 2015/16 for improved conditions of service, and R72.5 million in 2013/14 for security during the African Cup of Nations Championship 2013. R300 million in 2013/14, R400 million in 2014/15 and R450 million in 2015/16 have also been reprioritised from this Department to the Department of Justice and Constitutional Development for the CJS revamp and modernisation programme.

The Department has a funded establishment of 199 038 posts, 854 of which were vacant as at the end of September 2012, as a result of natural attrition. 1 752 posts will be filled in 2013/14, particularly for those that provide additional capacity at the Forensic Services and for additional cleaners and security personnel. Personnel numbers are expected to remain at 199 936 during each year of the Medium-term Expenditure Framework (MTEF) period, implying a significant change to the outcome of the 2012 budget process where personnel numbers were seen to be decreasing. The ratio of support to line function staff is 1:0.2.

Spending on consulting services increased from R111.4 million in 2009/10 to R136.4 million in 2012/13, and is expected to increase to R149.2 million in 2015/16. Consultants are mainly used for analysing the maceration of human remains, forensic accounting and auditing for investigations, and translating documents and transcribing the proceedings of hearings for investigations.

#### 3.3 INFRASTRUCTURE SPENDING

Spending on infrastructure decreased from R1.1 billion in 2009/10 to R794.6 million in 2012/13, and is expected to increase to R1.1 billion over the medium-term. The decrease in 2011/12 is mainly due to the rescheduling of projects from that year to begin later, in 2013/14.

Allocations earmarked for infrastructure will be used to build and upgrade police stations. The construction of a forensic science laboratory in Parow began in 2003/04 and was completed in 2012/13, at a cost of R658.3 million. The new laboratory complex will accommodate all the different forensic disciplines to eliminate the duplication of certain administration processes. The laboratory will also increase the Department's capacity to analyse exhibits.

#### 3.4 Relating Expenditure Trends to Strategic Outcome Oriented Goals

Due to programme spending over the medium-term showing average growth rates, baseline costing has been adjusted to more accurately reflect the underlying input costs to ensure service delivery continuation at an acceptable level. Intervention of a logistical nature is therefore of the utmost importance to enhance service delivery and therefore the need to prioritise the spending in terms of the following, amongst others:

- Increase police access points on a geographical basis to improve police response times;
- Maintain a level of spending to replace boarded vehicles;

- Further implementation of sector policing to increase the visibility of SAPS personnel members and the management of the community's perception of crime;
- Rationalisation of crime prevention-related functions in support of sector policing;
- Provision for specialised equipment and training for detectives to enhance the process of investigation of crime;
- Training on various aspects of crime including the aspects of crime intelligence gathering and analysis;
- Expenditure in relation to the deployment of new recruits;
- Victim Support programmes;
- Implementation of an integrated CJS to ensure a single, coordinated management of the continuum of criminal justice and performance across the CJS utilisation, essentially focussing on funding for the Forensic Services and broader Detective Service environments with regards to crime scene management;
- Implementation of the Domestic Violence Act, 1998;
- Maintaining a specialised capacity that allows for interventions through external deployment;
- Implementation of the Anti-corruption Strategy through specific funding that allows for vetting of personnel
- Implementation of the Firearm Control Amendment Act, 2006;
- Capacity at police stations to implement the Service Delivery Improvement Programme;
- Establishment of victim friendly facilities;
- Investment in capital equipment in support of basic policing services;
- Maintaining and upgrading the fixed wing aircraft and helicopter fleet;
- Policing of major events;
- Purchasing of firearms and ammunition;
- Implementation of Closed Circuit Television Systems in high crime areas;
- Youth and Social Crime Prevention;
- > Further resourcing of the FCS Units;
- Intensifying attention in relation to Firearms, Liquor and Second Hand Goods Control (FLASH);
- Imbizo's to mobilise communities;
- Specific focus on Stock Theft Units in terms of the Rural Safety Strategy;
- Employee Health and Wellness call centres to be expanded;
- Further capacitating of the DPCI;
- Further roll-out and implementation of war rooms;
- Strengthening of the equestrian capabilities;
- Conducting of high risk operations; and

> Strengthening the resource capacity of the National Intervention Unit and Special Task Force in support of operational reaction services and the policing of incidents of public disorder.

Reprioritisation was performed to sustain current funding levels in the Vote, especially the compensation budget, in respect of which R400 million was diverted from the goods and services budget baselines to that of compensation.

In addition to the aforementioned, the following are a selection of specific baseline budgetary provisions for 2013/14:

- Uniform;
- Weapon purchases;
- Network and hosting upgrades to continue;
- Basic services at police stations (water, electricity and sanitation);
- Ramps at police access points for disabled individuals;
- Furnishing and expanding Victim Friendly Facilities through Criminal Asset Recovery Account (CARA) funding;
- Eastern Cape Radio Communication System;
- Vehicles Annually in the vicinity of R1 billion is spent on the purchasing of new vehicles;
- Maintaining a level of funding that allows for the management of the Police's vehicle fleet through the Automated Vehicle Location System (AVL); and
- > Specific specialised equipment to be purchased in the Operational Response Services environment with specific focus on the National Intervention and Special Task Force Units.

#### EXPENDITURE TRENDS

The spending focus over the medium-term will be on sustaining corporate support functions to support the execution of the line function operational activities of the SAPS.

The significant increase in the Corporate Services sub-programme between 2009/10 and 2012/13 was due to the Department's renewed focus on developing human capital and skills; creation of new employee health and wellness centres; and purchasing of uniforms, weapons and ammunition. Significant growth is evident in operating leases and the *Office Accommodation* sub-programme between 2009/10 and 2012/13 due to general increases in the leasehold prices in 2012/13 and annual increases in accommodation budgets.

The significant increase projected in spending over the medium-term in buildings and other fixed structures is for the provision of basic services at police stations and to build ramps to improve the stations' accessibility to disabled individuals.

Spending on consultant services increased from R105.4 million in 2009/10 to R129.5 million in 2012/13, and is expected to increase to R141.4 million in 2015/16. Consultants in the programme are mainly used for legal services.

#### EXPENDITURE TRENDS

The spending focus over the medium-term will be on providing basic policing services. In addition, victim friendly facilities will be further enhanced and the capacity of Equestrian, National Intervention and Special Task Force Units will be strengthened. The bulk of spending over the seven-year period is concentrated in the Crime Prevention subprogramme, mainly as a result of its labour intensive nature. The allocations to this programme are focused on visible policing services rendered at police stations and community service centres. Thusfar, the allocations have contributed to a decrease in the number of trio crimes (house robbery, business robbery and carjacking), from 47 222 in 2009/10 to between 40 504 and 39 239 in 2012/13. The number of serious crimes is expected to decrease from 1 909 566 in 2009/10 to 1 683 827 in 2015/16 while the number of trio crimes is expected to decrease further to between 35 836 and 31 562 in 2015/16.

Expenditure on compensation of employees increased significantly between 2009/10 and 2012/13 due to the additional allocations for new recruits, security for the 2010 FIFA World Cup and improved conditions of service. In 2012/13, funds were reprioritised from spending on goods and services to compensation of employees for capacity building. This also accounts for the decrease in spending on goods and services over this period. Spending fluctuations in machinery and equipment over the seven-year period are attributed to once-off capital purchases made in 2009 for the 2010 FIFA World Cup. Spending on this item normalises over the medium-term.

# PROGRAMME 3: DETECTIVE SERVICE

#### **EXPENDITURE TRENDS**

The spending focus of the programme over the medium-term will be on investigating crime and support to criminal investigations in order to contribute to the successful prosecution of criminal offences.

Expenditure in the *Forensic Science Laboratory* sub-programme increased significantly between 2009/10 and 2012/13 as a result of an additional allocation for the CJS revamp initiative and the acquisition of specialised technical analysis equipment and related resources, including semi-automated equipment with enhanced chemistries for better results to be obtained on degraded and difficult DNA samples. Expenditure in the *Criminal Record Centre* sub-programme also increased significantly over the same period due to funding received for the CJS revamp initiative.

Expenditure on compensation of employees increased significantly between 2009/10 and 2012/13 due to increased provisions made for capacitating the detective service function, including the transfer of the Directorate of Special Operations from the Department of Justice and Constitutional Development to this programme in 2009/10.

# PROGRAMME 4: CRIME INTELLIGENCE

## **EXPENDITURE TRENDS**

The spending focus over the medium-term will be on enhancing overall capacity and aligning functions with the organisational profile of crime intelligence, which will be reviewed in 2013/14. Spending on compensation of employees is the main driver of spending increases and is also where the bulk of the programme's allocation is spent, mainly in the Intelligence and Information Management sub-programme, as crime intelligence functions are labour intensive. As such, expenditure on compensation of employees increased significantly between 2009/10 and 2012/13 due to the Department enhancing the capacity of crime intelligence in support of the programme's objectives. This enabled the Department to increase the number of operational and strategic analysis reports produced from 234 020 reports in 2009/10 to 353 628 analysis reports in 2011/12. These reports are used for the supporting of crime prevention and the investigation of crime. Over the medium-term, total expenditure is expected to increase to provide for an increased number of crime intelligence operations in support of crime prevention, investigation and prosecution.

# PROGRAMME 5: PROTECTION AND SECURITY SERVICES

## **EXPENDITURE TRENDS**

The spending focus over the medium-term will be on maintaining sufficient capacity in order to provide protection and security services to identified individuals and buildings. The programme's allocations over the medium-term will provide for an increase in the number of national key points evaluated from 83.3 % or 130 in 2009/10 to 100 % or 197 in 2015/16.

growth mainly as result of the establishment of the Protection and Security Services Division in 2002, which had carry through effects over the subsequent periods. Over the Expenditure on the Government Security Regulator sub-programme increased significantly between 2009/10 and 2012/13 as new capacity was created to deal with the operational requirements in delivering on the sub-programme's mandate and functions. Over the same period, expenditure on machinery and equipment showed strong medium-term, expenditure is expected to increase to provide for increased capacity in terms of personnel numbers for protection and security services. The programme's establishment is projected to decrease by 329 posts between 2012/13 and 2015/16.

# **PART B: PROGRAMME AND SUB-PROGRAMME PLANS**

# 4. PROGRAMME 1: ADMINISTRATION

## 4.1 Purpose

Develop policy and manage the Department, including administrative support.

# 4.2 STRATEGIC OBJECTIVE, ANNUAL TARGETS AND PERFORMANCE INDICATORS FOR 2013/14

<sup>&</sup>lt;sup>3</sup> Please refer to paragraph 9.1 below. <sup>4</sup> This indicator was revised to 74/26% for compensation / operational expenditure during the 2012 Adjustment Estimate process.

<sup>&</sup>lt;sup>5</sup> Refer to the funded IS/ICT projects as per par. 9.2. <sup>6</sup> Refer to the funded IS/ICT projects as per par. 9.2..

Programme 1 performance indicators will be measured on an annual basis as they do not have quarterly targets. However, performance on all areas will be reported upon on a quarterly basis (in-year reporting).

## 5. PROGRAMME 2: VISIBLE POLICING

### 5.1 Purpose

Enable police stations to institute and preserve safety and security, and provide specialised interventions and the policing of South Africa's borders.

# 5.2 STRATEGIC OBJECTIVE, ANNUAL TARGETS AND PERFORMANCE INDICATORS FOR 2013/14

|                               | Strategic Objective: 1             | To discourage all crime                                 | s by providing a proa                                   | Strategic Objective: To discourage all crimes by providing a proactive and responsive policing service that will reduce the levels of priority crimes | olicing service that w   | ill reduce the levels of   | priority crimes   |   |

|                               | Number of contact crimes           | 676 445 (1 371,4<br>per 100 000 of the<br>population)   | 638 468 (1 277,2<br>per 100 000 of the<br>population)   | 623 486 (1 232,5<br>per 100 000 of the<br>population)   | Reduced by 4-7% to<br>between<br>598 547 and<br>579 842 (Between<br>1 183,2 and 1 146,2<br>per 100 000 of the<br>population) | Reduced by 4-7% to between 574 605 and 539 253 (Between 1135,9 and 1066,0 per 100 000 of the population) | Reduce by 4-7% to between 551 620 and 501 505 (Between 10 90,5 and 991,4 per 100 000 of the population) | Reduce by 4-7% to between 529 555 and 466 400 (Between 1 046,9 and 922,0 per 100 000 of the population) |
|                               | Number of trio crimes <sup>8</sup> | 47 222 (95,7 per<br>100 000 of the<br>population)       | 42 183 (84,4 per<br>100 000 of the<br>population)       | 42 192 (83.4 per<br>100 000 of the<br>population)   | Reduced by 4-7% to between 40 504 and 39 239 (Between 80,1 and 77,6 per 100 000 of the population)                           | Reduced by 4-7% to between 38 884 and 36 492 (Between 76,9 and 72,2 per 100 000 of the population)       | Reduced by 4-7% to between 37 329 and 33 938 (Between 73,8 and 67,1 per 100 000 of the population)      | Reduced by 4-7% to between 35 836 and 31 562 (Between 70,8 and 62,4 per 100 000 of the population)      |

<sup>7</sup> Serious crime includes contact crime, contact-related crime, property-related crime and other serious crime and excludes crime detected as a result of police action.

The performance indicator relating to trio crimes will in future be reported on as part of serious crimes in order to avoid dual measurement.

<sup>9</sup> The targets are currently based on urban and rural stations collectively. Stations will be categorized into the categories: urban, rural and urban/rural mix where after the reaction times will be

measured separately for these stations from 2014/15 onwards.

<sup>10</sup> Serious crime includes contact crime, contact-related crime, property-related crime and other serious crime and crime detected as a result of police action.

<sup>&</sup>lt;sup>11</sup> A trial-ready docket is a fully investigated and completed case docket, which is ready for trial.

<sup>12</sup> It should be noted that the performance indicators relating to trio crimes will in future be reported on as part of serious crimes in order to avoid dual measurement.

| Strategic Objective: Contribute to the successful prosecution of crime, by investigating, gathering and analysing evidence, thereby increasing the detection rate of priority crime. |                                    | Strategic Priority Performan |                        |  | against women and case dockets for crimes related crimes, and crimes dependent on police action for detection assault and assault GBH)                                 | Conviction rate for crime against women 18 years and above (Murder, attempted murder, all sexual offences, commor assault and assault GBH)  | Detection rate for crimes against children under 18 years (Murder, attempted murder, all sexual offence common assault and assault GBH)   | Percentage of trial-ready case dockets for crimes against children under 1 years (Murder, attempted murder, all sexual offenc common assault and assault GBH)     | Conviction rate for cr<br>against children und<br>years (Murder, attem)<br>murder, all sexual off<br>common assault and<br>assault GBH)    |

13 This target was set by taking into consideration the increase/decrease of the actual performance during 2009/10, 2010/11 and 2011/12 and the current performance.

14 & 15 According to the JCPS Delivery Agreement, 100 people must be convicted for corruption where the amount involved is more than R5 million by 2014. Targets for the 2015/16 financial years will be dependent on the mandate of the new Government.

### **PART C:** LINKS TO OTHER PLANS

### 9. Links to Other Plans

### 9.1 INFRASTRUCTURE AND CAPITAL ASSET PLAN

The infrastructure budget of the SAPS will be allocated per project per category per implementing agent, i.e. National Department of Public Works (NDPW) and/or SAPS during 2013/14. The performance of progress against the percentage completion of projects and the concomitant expenditure (allocations against devolved police facilities over which the SAPS has control) will be measured as such in the 2013/14 SAPS Annual Performance Plan.

All reports will be based on allocated funding for that particular year and how it translates into work done and work completed for that particular year. Cognizance is taken to support the published strategic plan of the SAPS in relation to the prioritized projects but it is deemed essential to report not only on this projects as it create the impression that only those projects are funded from the allocated budget.

To support consistent and accurate reporting the following indicators and targets will be reported on for the 2013/14 financial year in relation to the SAPS Building Programme the allocations per category of projects and implementing agent (NDPW or SAPS) will therefore be as follows for the 2013/14 SAPS Annual Performance Plan:

|               | 2              | SAPS Infrastructure Budgets | S            |          |
|---------------|----------------|-----------------------------|--------------|----------|
|               | ALLOCATION     | NDPW                        | SAPS         | Comments |
| Capital Works | R1 036 884 000 | R877 340 436                | R159 543 564 | None     |

|   | D              | evolved from NDPW to SAP | S            |  |
|---|----------------|--------------------------|--------------|--|
| Maintenance and<br>Property Rates<br>(accommodation<br>charges) | R1 220 067 000 | R1 022 404 440           | R197 662 560 | NDPW uses income from<br>accommodation charges<br>to pay for property<br>rates and maintenance.<br>Payments are quarterly in<br>advance.   |
| Private Leases  | R1 009 783 000 | R1 009 783 000           |              | NDPW continues to enter into leases to supply in the accommodation needs of SAPS. NDPW thus still procure and manage leases on behalf of SAPS. Payments are made quarterly in advance.                                       |
| Municipal Services  | R800 600 000   | R800 600 000             |              | SAPS have an agreement with NDPW to pay municipal services on their behalf, for which NDPW charge a 5% management fee. Payments are made based on monthly invoices based on actual expenditure plus a 5% administrative fee. |
| Total:  | R4 067 334 000 | R3 710 127 876           | R357 206 124 |  |

### 9.2 Information and Communication Technology Plan

The organisational capabilities provided by Information and Communication Technology are brought about through the Systems Development Life Cycle (SDLC) consisting of four phases namely: technology solution definition (user requirements, solution design and project funding), technology solution development (solution construction or acquisition and customisation), technology solution provisioning (implementation and deployment) and technology solution maintenance (continuous operation).

Emanating from the SAPS Strategic Plan for 2010 - 2014, the following initiatives relate to the definition and development phases of the SDLC and are therefore not available for deployment and use by the organisation, These and other non-strategic and maintenance projects, according to the total budget of Technology Management Services Division (TMS), are accounted for in the TMS Operational Performance Plan (2013/14):

- Detention Management (SAPSDM);
- Modernisation at Ports of Entry;
- Mobile Operational Vehicles Project (IMVDCS);
- War Rooms;

<sup>&</sup>lt;sup>17</sup> This consists of the construction of actual buildings and as per the categories of New (N), Newly Re-Established (NRE), Re-Established (RE) and Repair and Upgrade (R&U).

<sup>18</sup> This consists of the construction of actual buildings and as per the categories of New (N), Newly Re-Established (NRE), Re-Established (RE) and Repair and Upgrade (R&U).

<sup>&</sup>lt;sup>19</sup> The placement and/or construction of a facility (park homes) for utilisation as a support to victims of crime

<sup>&</sup>lt;sup>20</sup> Installation of new generators as backup facility for electricity

- Secure Email Technologies;
- Firearm Control System; and
- Ballistic Interface Unit (BIU).

The provisioning of additional technology solutions for the year 2013/14, beyond the solutions that are already being maintained, are as follows (an indication of the primary source of funding is provided according to the following colour codes):

### Legend:

| SAPS project |
|--------------|
| CJS project  |
| IJS project  |

| No                  | Initiative name  | Description  | Annual Target 2013/14  |  |  |  |  |  |
|---------------------|--|--|--|--|--|--|--|--|
| Information Systems |  |  |  |  |  |  |  |  |
| 1                   | Action Request for Service (ARS)                           | A crime-related complaint or request could<br>be lodged directly with a police official on<br>duty at an Emergency Response Service<br>Centre (CSC). It entails the recording of<br>incidents reported by the public and the<br>consequent actions to be taken | Provide an Integrated Action Request for<br>Service solution (GEMC3) at 14 x 10111<br>centres  |  |  |  |  |  |
| 2                   | Automatic Fingerprint Identification System (AFIS)         | Establish a more cost-effective solution for the capturing and storing of fingerprints on AFIS   | Provide AFIS capabilities to an additional 17 x LCRC's   |  |  |  |  |  |
| 3                   | Mobile Search Capability                                   | Real-time enquiries of stolen vehicles, firearms and missing/ wanted persons (Mobile Connectivity Devices)   | Provide 3200 new Field Terminal devices to create enquiry capabilities   |  |  |  |  |  |
| 4                   | E-Learning   | Provide a Learning Content Management<br>System (LCMS) capability to enable on-line<br>distance training/ learning to promote<br>knowledge and talent management in SAPS.  | Establish access to E-Learning capability via SAPS Internet and Intranet   |  |  |  |  |  |
| 5                   | ID Services (IJS)  | Provide a single, unified approach and capability to ensure that an individual can be uniquely identified upon his/her entry into the IJS process  | Deploy the Fingerprint Enrolment System (FES) at 20 police stations  |  |  |  |  |  |
| 6                   | Case Docket Management System (Administer Case)            | The management and administration of criminal cases, inquests and enquiries throughout the life cycle of a case, i.e. from inception to disposal   | Provide Case Docket Management System enhanced capability at 40 priority police stations   |  |  |  |  |  |
| 7                   | Property Control and Exhibit Management (PCEM)             | To manage exhibits and property items from the time they enter the SAPS process until the lawful disposal thereof, without terminating the current system  | Implement the firearm functionality of the<br>Property Control and Exhibit Management<br>solution at 142 police stations   |  |  |  |  |  |
|                     |  | ICT Infrastructure   |  |  |  |  |  |  |
| 8                   | SAPS Network Modernisation Programme                       | Redesign the SAPS network to cater for modern technology capabilities and the replacement of redundant infrastructure  | <ul> <li>Upgrade network capacity at 525 sites<br/>nationally</li> <li>Implement microwave radio links at 30<br/>prioritised sites.</li> </ul>   |  |  |  |  |  |
| 9                   | Modernisation and expansion of hardware and software       | Replace redundant and expand current hard/<br>software at Crime Intelligence, Detective<br>Services, Support Services, Ports of Entry,<br>Criminal Record Centers and Forensic Science<br>Laboratories, Police Stations and 10111<br>Centres.                  | • Workstations and screens – 23, 028<br>• Notebooks – 2, 673   |  |  |  |  |  |
| 10                  | Closed Circuit Television (CCTV), including access control | Design, develop, test and implement (rollout) capabilities   | Implement at 24 x priority sites: The Forensic Science Laboratories in Western Cape, Eastern Cape, KwaZulu-Natal and Silverton; Firearm Destruction Centres and all National Vehicle Investigation Safeguarding Units (Pounds) |  |  |  |  |  |

### 9.3 HUMAN RESOURCE MANAGEMENT PLAN

The following human resource priorities will be addressed during the last two years of the MTEF period:

### **STAFFING PLAN**

| Target date      | Establishment target |
|------------------|----------------------|
| By 31 March 2013 | 199 039              |
| By 31 March 2014 | 199 936              |

The following development priorities will be focused on during 2013/14:

|    | Identified Priorities             | 2013/14   |                            |   |  |
|----|-----------------------------------|---|----------------------------|---|--|
|    | Category                          | Course Name                                     | Total Number of<br>Courses | Total Number of<br>Members to be<br>Trained |  |

### 9.4 RISK MANAGEMENT PLAN

Section 38 (1) (a) (i) of the Public Finance Management Act 1999, Act No. 1 of 1999, provides the legislative requirement that necessitates the application of risk management. The third King Report on Corporate Governance (King III), 2009, advocates the establishment of sound corporate governance, including the managing of organisational risks in support of the improving of overall organisational performance.

There are specific strategic risks that significantly inhibit the achievement of the SAPS strategic priorities, involving significant impact, a high likelihood of occurrence and generally unacceptable levels of internal control. The Risk Management Plan focuses the mitigation of the strategic and operational risks at all organisational levels through the improving of controls over the medium-term with a specific performance focus for 2013/14.

The following strategic risks were included in the revised SAPS Strategic Plan 2010 to 2014 and are therefore included in the APP 2013/14. These risks have specific performance indicators, baselines and annual and medium-term targets to allow for the measuring of the mitigation of these risks over the medium-term.

There are, however, two strategic risks, namely: Inadequate police response and service delivery at local level and compromised detention management leading to escapes from custody, which have been removed as they are included in the performance tables within the APP and will therefore be addressed within the APP and not also reflected in the Risk Management Plan.

Additional strategic risks have been included for the purposes of the specific mitigation of these risks over the medium-term towards the down-managing of the risks to the point of removal from the strategic risk register and the maintaining of controls to ensure the managing of the risks.

| Strategic<br>Priority   | Identified Risk   | National Risk<br>Owner                             | Key Risk<br>Indicator  | Planned Mitigating<br>Action / Existing<br>Controls  | Baseline  | Target                       |

Bi-annual     verification of     firearm audits with     actual amounts     by Supply Chain     Management | 879      | Reduce by 5%<br>to 835   |

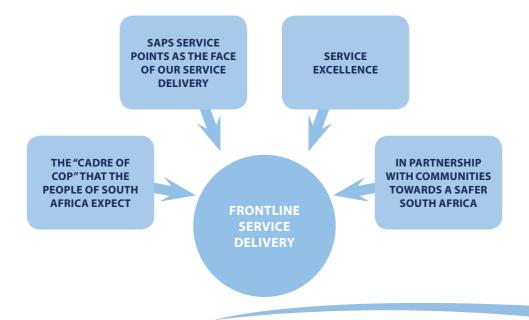

### 9.5 Service Delivery Improvement Plan

The Department implements a Service Delivery Improvement Plan (SDIP) to direct the continuous improving of service delivery to the people of South Africa in support of the fundamental principles of "Batho Pele" or "People First".

The SAPS's SDIP focuses on the improving of those key services that create an enabling environment in support of the Department's mandate as prescribed in constitutional remit applicable to the SAPS, as per Section 205(3) of the Constitution, the guiding values as espoused in Section 195 of the Constitution, and the strategic objectives and priorities as reflected in the APP 2013/14, which are designed to give effect to the vision and strategic direction of Government.

The SAPS has identified four key service outcome areas that will be the focus of the SDIP for 2013/14, namely:

- The "cadre of cop" that the people of South Africa expect;
- SAPS service points as the face of our service delivery;
- Service excellence; and
- In partnership with communities towards a safer South Africa

Key service objectives have been identified for each of the key service outcomes, which have been broken down into a number of key services, each of which will reflect the potential beneficiaries of these services, the current service standards and the desired service standards that will be addressed during 2013/14. The key service outcomes, objectives and services comprise the "Quadrants of Frontline Service Delivery" for 2013/14, as depicted below:

### **The Quadrants of Frontline Service Delivery**

### THE "CADRE OF COP" THAT THE PEOPLE OF SOUTH AFRICA EXPECT

Key Service Objective: To ensure all of our members understand and subscribe to that which governs policing in South Africa.

- Entrenching the strategic direction of the SAPS in support of the 2030 Vision of Government;
- Institutionalizing the basic values and principles governing public administration, as contained in Section 195 of the Constitution;
- Ensuring a thorough understanding of the spirit and customerorientated principles underlying "Batho Pele – People First"
- Living the SAPS Code of Conduct; and
- Ensuring command and control through the correct application of the rules that govern us.

### SAPS SERVICE POINTS AS THE FACE OF OUR SERVICE DELIVERY

Key Service Objective: To ensure SAPS service points adequately support professional policing.

- Clean, tidy and properly maintained service points;
- A standardized corporate image at all service points, including signage to and at all service points;
- Clean, functional and visible vehicles;
- Properly attired and adequately equipped members;
- Adequately equipped Victim Friendly Facilities;
- Improved access to our services by marginalized communities; and
- Easy access to our service points for disabled people, in support of the mainstreaming of disability.

### **FRONTLINE SERVICE DELIVERY**

### SERVICE EXCELLENCE

Key Service Objective: To provide a professional, accountable service to the people in South Africa.

- -Timely, professional response by Community Service Centre and 10111 Centre response vehicles;
- Professional service to all people visiting our service points, including queue and waiting times management;
- -Timely, courteous response to people telephoning our service
- Timely response to people contacting us via snail mail or electronic mail:
- Visible SAPS members responding professionally and courteously;
- Dignified, empathetic and professional support to the victims of crime:
- Professional managing of detainees; and
- A structured programme of service delivery improvement through station visits to all 1 131 stations by SAPS Senior Management Service members

### IN PARTNERSHIP WITH COMMUNITIES TOWARDS A SAFER SOUTH AFRICA

Key Service Objective: To ensure effective engagement with all our stakeholders in the fight against crime.

- Structured stakeholder engagement and participation, including the managing of specific communication methods;
- Effective redressing of complaints against the SAPS, including the managing of Suggestion Boxes at all stations;
- Effective managing of compliments directed to the SAPS for excellent service delivery;
- Visible, concise Service Delivery Charters; and
- The conducting of exit polls on people using our services to ensure continuous improvement of service delivery.
