SELECT COMMITTEE ON APPROPRIATIONS

1. My suggestion is that the budget must be drawn with reference to statistics excluding pensioners.
2. Then, every person must be allocated a certain amount which is to be deposited his/her account, for example, R1m each.
3. The people who must receive this money must also be given jobs, for example, jobs such as in road construction and maintenance, police service, defence, etc.
4. The money that is going to be allocated to these people, it is the same money they will earn their salary from and it must be enacted that no money shall be paid out if a person did not fulfill his responsibilities listed above.
5. There must be a provision stipulating how much money a person shall receive a month and it cannot be taken for free.
6. This suggestion is to create a situation where there will not be a single person who does not have anything to do or just loitering in the streets, or drinking in a tavern which will lead to stealing and rape.
7. It is only school learners who will be at school during school time and only people who are earning pension shall be at home.
8. Any person found roaming around town or anywhere being not a pensioner shall be arrested and prosecuted.
9. The police and soldiers which are going to be there, their duty will be to ensure that no one eats and drinks without working.
10. There are children who have matriculated who are currently not doing anything; these are the children who should go and study engineering and train for other jobs at FET colleges and universities.
11. This will also reduce the misappropriation of funds which hinders service delivery. It will also reduce public protests that are as a result of service delivery.
12. There must be a budget allocated for construction of streets in all provinces of South Africa. What I am saying is that there must trucks that will carry sand, and machines that can pave our streets.
13. No ward councilor shall receive money for providing a service.
14. People must alternate working hours since they will be working day and night shifts.

15. No bar shall be operated; only bottle stores shall sell alcohol to the people and who shall then take it with them to drink at home after working hours or when they are off work.
16. No person shall eat and drink without doing anything.
17. There must be money allocated to learners who want to further their studies.

Thank you.
